1 January 2016

Whilst xyl was phoning around wishing everyone a Happy New Year I was doing something far more interesting. I had been monitoring
the situation on my Nexus 6P phone during the evening so made my escape and dashed upstairs. I missed the 2300 to 0000 opening but
caught the rest.

Audio grabber did a wobbly over midnight into the new year. I record in one hour segments using the timer facility. When it went
over to 2016 it recorded a 4 gig wav audio file for 0000 to 0100 instead of the usual 400 meg one. When I came to edit it, it was
only 9 minutes long despite the massive file size, weird. So I have no recordings for that hour which is a pity as I had quite a
few new ones there. Still when I get time I will edit the 0100 to 0200 I have.

Iceland appeared off the side of the beam on 99.90MHz. so I quickly turned it NW. Then had to go back to NE again as that was the
main direction of activity.

Hi All

Aurora Es on Band 2 (in my experience) are very rare and will typically only last a few minutes. So to have an opening for 2.5 hours is unprecedented, see logs below:

http://www.fmlist.org/fm_logmap.php?datum=2016-01-01&band=ALL&hours=0&omid=1419

AuEs is usually on beam just like normal Sporadic E. Both are forward scatter.

Aurora reception is backscatter reflected from the Auroral curtain, so you beam in approx a Northerly direction. NW-N-NE

Hello Paul.

AuEs (Aurora Es) can only occur a few hours after an Aurora and there hasn't been one today.
Generally AuEs occurs only after about 2200 local time following an Aurora event. (It can be several hours after 2200 like the last event)
Normal Auroral propagation occurs from about 1600 local time, with another event around local midnight.

I just had a thought.
A phenomenon called "FAI" (Field Alignment Irregularity) can occur in the evening following an earlier Sproadic E opening.
FAI can sound similar to Auroral Es.

A handy reference is the 2 meter [144 MHz] traffic, to conclude
whether it is about Auroral Es. Were there no lots of Au-QSOs by 2 mb
ham operators, the band 2 Es-like conditions are less likely about Auroral Es.

FAI only occurs just either side of the equator on north/south paths. It occurs in the F layer and is not linked to Es, E layer!

You’re getting mixed up with TEP (Trans-Equatorial Propagation).

FAI occurs after an intense Es opening but is much weaker then Es. The effect is particularly apparent on Band 2, after (say) an intense opening to Italy, where some time after the main opening has subsided, the band is still full of rather weak watery signals.

FAI only occurs just either side of the equator on north/south paths. It occurs in the F layer and is not linked to Es, E layer!

I just had a thought.

A phenomenon called "FAI" (Field Alignment Irregularity) can occur in the evening following an earlier Sproadic E opening.

FAI can sound similar to Auroral Es.

OK.. logically, that is probably correct that TEP is a form of FAI.

But in 30 years I have never before heard of TEP being referred to as anything other than, well…. TEP!

FAI, until now, I have only seen in reference to the post Es, er, “glow” I referred to in my last mail.

Hence my comments.

Every day is a school day, I guess.

Great catch, Andy!

As you say, just one day before the analogue TV transmitters in Belarus are due to go off for good.
This is most likely the very last time we will ever see Belarus TV on Band 1!

I saw a flicker of it this afternoon, but nothing like as good as your colour reception.

Chris. Lincoln, UK.

You are correct, TEP and FAI are two seperate things! Anyway this is enough quibbling about terms - its all bloody fantastic! Brings back my many years of analogue TVDX and 50Mhz - to be able to watch Australian TV on A0 and then work a few VKs on 50Mhz is something I will never forget!

Tim

Very nice winter log Andy. Just missed out here.

I saw you had a station called Buzz in 87.9. It doesn't seem to fit in with what else you were hearing, but there is a Buzz FM in Buzau, Romania, on 87.9.
http://www.tvbuzau.ro/

Nearest I could get, Googling.

38526. Fmlist/Greece

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-01-04 09:32:42 UTC
From: thanos.thessaloniki@...
Topic: 38526 Message: 38526

Hello to everyone and happy new year.
I haven't wrote for a very long time, I know.
But yesterday , me and my friend Panos finished updating Fmlist for all the Greek stations.
We removed 500+ non working stations which have closed many years ago; we also added new Rds data and Pi's
So, now Fmlist contains only the broadcasting stations from Greece and it's ready for a new Sporadic E year!
Of course if you have any unID Greek stations, just contact me and I will find the station as soon as possible !
Thank you for your time ,

Thanos

38528. Quadrantids: Bressay (Shetland)

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-01-04 11:02:51 UTC
From: pe1etr@...
Topic: 38528 Message: 38528

88.3 BBC R2
Bressay (Shetland)
713 km /443 miles 50 kW
Quadrantids peak
NB: Forfar and Sutton Coldfield are also on this
frequency but I feel Bressay is more likely.
https://youtu.be/-8YfDMKBt3I

38529. Band 2 Es 3rd January

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-01-04 11:12:19 UTC
From: Jim Smith G0OFE
Topic: 38529 Message: 38529

After a couple of near misses in recent days, finally had an opening to Italy at lunch-time.

Noticed the European beacons on 10m building then saw activity at the bottom end of Band 2. MUF reached 100Mhz at one point and the band got decidedly soupy at the bottom end.

AS often the case with Italy, hard to log much especially at the bottom end due to the duplication of station/frequency combos.

Logs and maps:

http://www.fmlist.org/fm_logmap.php?datum=2016-01-03
<http://www.fmlist.org/fm_logmap.php?datum=2016-01-03&omid=2748> &omid=2748

==========

Jim, Bournemouth, Dorset. IO90BR.

Elad FDM-S2, Perseus/FM+ and Funcube Dongle SDR Recievers

8-element OP-DES for Band 2, 12-ele ZL Special for 2m, plus wideband vertical.

Wellbrook 1530 Loop for LF

38530. Scandinavian unids MS Quadrantids

87.6 OM with song
https://app.box.com/s/sy7iide6j0r46mxnoa9c3h11gj4b6bl2
https://app.box.com/s/sy7iide6j0r46mxnoa9c3h11gj4b6bl2
87.9 YL (with co-channel station)
https://app.box.com/s/pt2zel866baffy0xq08yb7dz0e9h1bh6
https://app.box.com/s/pt2zel866baffy0xq08yb7dz0e9h1bh6

Each MP3 file contains two bursts. (0307UTC & 0309 UTC 04/01/2016)
These stations were actually received on more than one frequency. (No RDS received)
Thanks

Peter Wilson

38531. RDS from Algeria via Es

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-01-04 11:43:29 UTC
From: pe1etr@...
Topic: 38531 Message: 38531

Anyone else get RDS from ALG yesterday?
I received 88.4 Chaine 3 Chrea twice. The first time there was no RDS, but I got a PI code 2203 (Same as Lyric FM IRL) when it returned.
The clip with the PI is at the end of this video:

** Personal First via this mode

Possibly the best Auroral Es I have known, though I remember another sustained AuEs opening to the top of the band, very similar to this, in which Finland and Sweden gave good signals late one evening when living in Nottinghamshire - I cannot remember the date for that and those loggings may have been lost.

What surprised me was the number of low power transmitters I received.

My antenna was best when beamed NNE. I tried other directions but this seemed to be best, though it did seem to need a gradual nudge to the north as conditions progressed. That would make sense with the aurora moving more to the west over time.

I didn't receive the Faroes, probably because I was just too close for the conditions at the time. Iceland was a nice surprise, but I had hoped to receive more from there too. I did have a pop station on 90.4, however, while Vestmannaeyjabær was in on 88.1, probably Radio X from the same site - a station occasionally received via summertime Es.

I rotated the antenna north-west for the remainder of the morning, looking for meteor scatter and, potentially, more AuEs, but none were received. The only meteor scatter received was from France and Spain and nothing from North America (if only!).

A great start to 2016!

Happy New Year to all and Good DX!

Yes, my first mistake of 2016 (and there will plenty more to come! ;O),
the year was in fact 2016 for these loggings, not 2015.

I also meant to add that I have uploaded all six FDM-S2 files to my
Mediafire page, should anybody wish to have a listen to the opening.
They are available at:

http://skywavesdx.org/viewtopic.php?f=65&t=2082&p=9343#p9343

Good DX!

John

a German Dxer logged FAI from Finland in Reflexion a couple of
summers back, but I always understood that Finland was too far
north

i'd read that FAI was limited to southerly paths like italy

87.6 might be NRK P1 with national Music

87.9 MHz is danish - and can only be Nova FM at that Time with Talk.

Dear Thanos and Panos,

I had noted an enormous improvement of FMLIST GRC, without knowing who was putting all the hard work into it. But now I know and I wish to thank you both very much! Greece has always been a country with many received UNID's, but this should be history from now on. Soon I will go through my personal GRC UNID's, anxious to see how many can be resolved.

Thanks again.

Janpeter van Dijk

Onderwerp: [SkywavesDX] Fmlist/Greece

Hello to everyone and happy new year.

I haven't wrote for a very long time, I know.

But yesterday , me and my friend Panos finished updating Fmlist for all the Greek stations. We removed 500+ non working stations which have closed many years ago; we also added new Rds data and Pi's

So, now Fmlist contains only the broadcasting stations from Greece and it's ready for a new Sporadic E year!

Of course if you have any unID Greek stations, just contact me and I will find the station as soon as possible !

Thank you for your time ,

Thanos<!--

Hi Ian

(Apologies) Buzz (as well as high pitch) is referring to the buzzing/tone coming from the radio station as opposed to a station named Buzz.

Andy.

Very nice winter log Andy. Just missed out here.

I saw you had a station called Buzz in 87.9. It doesn't seem to fit in with what else you were hearing, but there is a Buzz FM in Buzau, Romania, on 87.9.
http://www.tvbuzau.ro/

Nearest I could get, Googling.

Andy,

I received the stations on 87.9 and 92.5 also.
Sounded like a test tone to me. Maybe from some Spanish stations that closed, or new stations about to come on air.

Peter

Hi Peter

(Not sure if you have spotted this feature)

The RDS Data Logger < and > buttons can be used in conjunction with skip locals to go up and down the FM band filtering out local stations.

Andy.

Hello Andy,
I was aware of the feature but not sure how to set it up. Thanks for the info.
There is a snag when recording IQ WAV files continuously with the Funcube Dongle Pro+ when running your RDS Data Logger .. The frequency in the filename is the last frequency visited as a new file is created, thus the centre frequency is incorrect. It means I have to play back in real time. I also needed to use the locals as markers so I could ascertain which freq I was on.
Not sure if there is a way around this?

BTW Your RDS Data Logger found 3 PI codes and RDS Spy found 6 :)

I'll give it a try tonight with an RTL SDR and skip the locals and see how it goes.
Peter

This would have been a decent opening by July standards!

I don't know if I missed much of this opening. South-east France was
already reaching the top of the band when I first tuned in at 1215.

I made a few FDM-S2 recordings, which I checked later in the day. I tried to be methodical about how I did this, concentrating on the French reception.

I switched off once the conditions moved into Spain, mostly because I was still going through my auroral E2 files from January 1st, but I kept a close ear out for the canaries and the Azores, neither of which made it through, although I thought I briefly heard music on 87.7 which was being played on the RDP3 web stream. This was meteor scatter if so, probably helped along by the conditions, but it was too brief to be certain. Just for the record.

Five FDM S2 files of this event can be downloaded here:

Janpeter, it's really my pleasure to update Fmlist, whenever there's a change I can't wait to tell t to my friend Panos so that he can update the site.
I'm looking forward to identify your Greek stations, can't wait !!

Thanos

Yes, ex iCat FM. 87.9 MHz is Collsuspina, 92.5 MHz is Collserola. iCat FM was switched off mid 2014, crazy they still keep these txs on. Would drive me crazy as DX-er, if I would be living nearby those locations.

73, Janpeter

Andy,

I received the stations on 87.9 and 92.5 also.
Sounded like a test tone to me. Maybe from some Spanish stations that closed, or new stations about to come on air.

Peter

Dear Thanos,

thank you for your kind reply, you made my day!

I'm not a very skilled dxer and I haven't a sophisticated equipment for listening.
So, everytime I receive a dx signal it's always a joy to me, especially when I listen very local stations like in this case.

Topic: 38559 Message: 38559

Does anyone know the ident of a station which is using 89.1, it is strong in Arrecife and along the east coast of Lanzarote. Its a mystery. there are no announcements or adverts just a few seconds sec silence between discs
Incidently UK Away has closed as has O2 radio and Radio Taxi. Only english stations on island are now Power FM and Monster FM, plus I guess you can include AWR which has some english programs
Thanks

From: thanos.thessaloniki@...
Topic: 38570 Message: 38570

Many times a station can't be strong enough to come with its rds , or even a station doesn't even have rds. Or you receive a station and wait for an Id but that never happens.-Anyway

I am thinking of making a list of streams for Greek stations (as much as I can) which I am sure are working and have the same programme with FM. What do you think ? Please write your opinion.

Thanos

38571. RE: [SkywavesDX] Greek streams

Thanos,

Thanks for all your efforts so far. Really appreciated!

Yes, having working streams is a great idea. I went through the Algerian ones last year adding as many as I could, as all/many of them don’t have RDS.

Being able to quickly grab a stream from FMList often helps to get a quick ID in marginal openings.

Hello Thanos,
thank you (and Panos, aka as George), for your work! It is great to have FM stations in Greece updated - many DXers here receive them via Sporadic E.

As this is my first post in 2016, let me also wish all SkywavesDX group members a Happy New Year with plenty of DX!

73,
Günter

From: Grant Williams
Topic: 38559 Message: 38578

Hi Edward

I checked the website you mentioned and it has a couple of stories about a new station on 89.1:

"We wrote about Monster Radio a few months ago, and they have completed the work at their fabulous new studios in Playa Honda, and after thoroughly testing that everything works, they will be making their first live broadcast this Saturday 31st October. Presenter Angela Brand will be on air from 8AM on 89.1 and 106.3 FM and also online here: Monster Radio Online."
http://www.lanzaroteinformation.com/content/monster-radio-lanzarote-first-live-broadcast-weekend

"We caught up with well known entertainer Dick Knowles last week to talk about his new project, Monster Radio. ... He’s already been assigned two FM frequencies, one for the north of the island and one for the south, and of course you’ll be able to listen online from all over the world."
http://www.lanzaroteinformation.com/content/monster-radio-launching-soon-lanzarote

So 89.1 looks as if it is a second FM channel of Monster Radio, but maybe it is not simulcasting.

Yours,
Grant

38582. Dynamic Range and Decimation on an RTL-dongle - questions.

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-01-10 18:49:42 UTC
From: davebunyan@...
Topic: 38582 Message: 38582

Just because I have an SDR that is better than an RTL-dongle doesn't mean I'm going to throw the RTL-dongle out. I can use the 'proper' SDR and the RTL dongle at the same time - which proved really useful in last season's SpE openings. I could concentrate on one direction whilst the RTL dongle was being used with RDSDatalogger to grab strong signals from a totally different aerial. Or - and this was really great - use it for Band I TV DX - with the result I got Jordan TV - video and sound on Channel E3.

So I've been reading snippets here and there from the SDR# team and elsewhere that says you can improve the dynamic range by software decimation. From what I understand - very roughly you get 6dB improvement for each halving of the bandwidth. But was is the trade-off - apart from reducing the amount of spectrum you can see at once?

I've just done a few experiments with using the ModRTLSDR dll fom Vasily and come up with some interesting numbers. Using a 2.048 MHz sampling rate the noise floor went from - 58 dB to - 66dB - improving roughly 3dB every time I increased the decimation up to 8. At the same time the S/N ratio improved by about the same 3dB per increase in decimation. No change in the peak signal level was noted. (all figures are an eyeball average of the figures displayed on SDR# build 1430.

On a station that was giving RDS with a high bit rate error (on RDS) I couldn't see any change on the error rate. On a weak DX signal I couldn't say the improved signal to noise ratio number displayed translated to improved and nor could I see it translate to be able to increase the gain of the dongle before overloading - at best it might translate to one more division to the right on the VGA.

A learned, scholarly reply would be nice to have.

Thanks

David

38596. Unidentified Austrian Stations

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-01-11 19:11:01 UTC
From: John Faulkner, Skegness
Topic: 38596 Message: 38596

I have finally gone through all my band 2 SDR recordings from the 8th July, 2015 and I have almost finished putting the log together. I have a few unidentified Austrian stations. Perhaps somebody recognises something.

106.2 unid German adverts 1841 08-07-15 (Presume Austria)
https://app.box.com/s/ytjc7dmpnciolqq10sa7r87j8tj2fmsz

90.4 unid likely Austria 1818 08-07-15
https://app.box.com/s/hkki8npc3m0vylfxaos7p9o7mvnitg5u

88.3 unid PI A027 in unid language 1823 08-07-15 (Not the religious station)
https://app.box.com/s/m5pwzftr4qf4xqgj7de8btbp6tq4t6bq

94.2 unid - query Radio Klassik Stephansdom, Austria 1751 08-07-15
https://app.box.com/s/brtgzg3do06wrwowga08ixs7mdppxfqy

At 1817 on this day I also logged Lounge FM from Austria with a PI code of A670, but two sites are listed: Gmunden and Freistadt. I doubt it would be possible to differentiate between the two, but I thought I'd mention this just in case.

Thanks.

John

Hi,

I need information about the IC SC1923S. Which pin is data, clock and GND?

I haven't found any information about this IC.

The main board is CD 7636 NXP.

Is perhaps a SAA6579T clone?

Thank you.

Miquel

Hi Andy,

yes, it’s a pity that the DAB drivers are incompatible with the RTL drivers. If your “DAB” PC runs Windows 7 or higher, you could use “Andis DAB Player” (free software written by a Bavarian “Andi”): http://www.fmlist.org/How-to-export-DAB-FIC-Multiplex-Configuration.pdf

From: Günter Lorenz (FMLIST)
Topic: 38604 Message: 38604

DABLIST is looking for help: We need more regular monitors in areas where DAB is on the air.
Therefore, I am giving away for free a couple of NOXON DAB sticks Rev.2 on request. If you have a Win7 (or higher) PC, live in a place covered by DAB, and want to help, get in touch with me at glorenz@fmlist.org.
In the UK, all cities with DAB trials and local multiplexes are of great interest.
Outside UK, we are looking for Norway, Sweden, Denmark, Poland, Malta, Madrid & Barcelona, Gibraltar, France, Brussels. Travelers to Beijing and South Korea, Hong Kong and Australia are also welcome.

Note that the NOXON DAB stick can be used also for FM (including RDS), with appropriate drivers and software, all provided.

Another excellent day of Es and another log which took more than a month to compile. Frankly, this is just too much and, as I have said before, I plan to be more controlled about how I go about recording SDR files during big openings. There are a few more days where I have a lot of files to check, so I am now seriously wondering if I will get through last year's files before this year's E season kicks off. It's great to have the files to check while the present conditions are lacking though.

No recordings this time because there just hasn't been enough time to make them. Instead, I have uploaded several (19!) of the best files from the 8th July so you can have a listen or DX from them at your leisure, if you wish. Skegness is gradually catching up with the rest of the world, technologically, and we now have a 'superfast fibre' internet service in the town. We weren't planning on upgrading to this, but in view of the lousy ADSL2 connection we have had to endure since last April (no internet service overnight, endless complaints), we have been given a permanent free upgrade, so the uploading of large files is now pretty quick! Please see the SDR files download section on the Skywaves forum at http://skywavesdx.org/posting.php?mode=post&f=65

Good DX!

Just a few corrections.

Three of the Italian loggings had their ".05" truncated. I was trying a new formatting method to speed up the processing of the log.

Hi John,

Nice to see such logbooks in the silent DX times. Although there is an unusual amount winter Es.
I was able to solve most of your UNID's for a change.

73, Janpeter

90.9 1651 I UNID, ? 5569

Radio Dolcissima, Rocca di Papa/Monte Cavo (RM)

105.2 1753 ? UNID, ? F123 RADIO_Q_

Ritam Radio, Zenica/Hotel Dubrovnik or Visoko/Kruščica (BIH). This is ex Radio Q, apparently they forgot to change the RDS.

104.7 1801 ? UNID, ? F696

Radio Novosti, Beograd/Trg Nikole Pašića (SRB)

104.8 1801 ? Radio B92, ? D05C __B_92__

Play Radio, Deli Jovan (SRB). This is ex Radio B92 with unchanged RDS.

105.0 1801 ? UNID, ? F494

Radio Brčko Distrikt, Brčko 2/Skakava G. (BIH)

97.0 1813 ? UNID, ? C478

Very likely Gradski Radio Virovitica, Virovitica/Trg Franje Tuđmana 6 (HRV)

105.4 1814 ? UNID, ? D0A1 _ACTIVE_ OHH!???? ??????on ??????st

Naxi Radio, Bečej/Silos (SRB). This is ex Radio Active, still with unchanged RDS.

106.6 1814 ? UNID, ? 0000 Trans___ Senta___ Tel-024

Naxi Radio, Čoka (SRB)

98.0 1752 MKD UNID, 4223

Radio Slobodna Makedonija, unknown site in MKD

92.7 1818 HRV UNID, ? C414

Radio Plus, Osijek/Hotel Osijek (HRV)

95.0 1838 HNG UNID, ? B01F Hungarian rap!

Very likely Debrecen Rádió FM95 from Debrecen / High-rise, Petőfi (HNG) with a new PI code.

Janpeter - thank you very much for the quick response!

All loggings have now been updated.

Yes, January has seen a very good level of midwinter Es. Unfortunately, I wasn't by the receiver for most of them.

Still plenty more Es files to get through here, but they shouldn't be of the sizes of the 7th and 8th of July, I am relieved to say. The end is in sight, way in the distance!

Good D!

John

Just a brief update on my mystery station on 89.1 here in Lanzarote. It appears to have been Monster FM. They operate on 106.3 with DJs, but when none are available for 89.1 they transmit a separate music programme using an "automated juke box" with no announcers.

... and would you believe it, a tentative PI code has just appeared - 567D. Not sure if that is a correct PI though as I have been playing this file through for a while and no RDS appeared. This may or may not be helpful. Nothing with that PI showing up anywhere in FM List, apart from a Turkish station.

John

Thank you Franco and 'alegropp' (sorry - I do not know your name).

Looking at the area I received, Switzerland is a possibility. I don't think I have received Switzerland by sporadic E before, and certain never in Skegness. BUT, I think Franco might have solved this one. You suggested Radio Rumantsch, Grödental=Val Gardena. This very transmitter was received at exactly the same time on 92.9. Fade-ins were identical too.

Although there was no RDS on 90.3, I am am uploading the best files from this exceptional opening for future listening. Maybe the next generation of RDS decoding technology will allow the RDS to form. The relevant file has already been uploaded - http://www.mediafire.com/download/fqx2m3og7fr0u96/2016-01-13_1553_%28Es_Germany%2C_Austria_%26_Italy_96.7_-_102.5%29.ape
but it seems quite likely that this was Val Gardena.

Just three files to check through and I should be able to post the full log from the 13th later today.

Thank you and good DX!

John

I am uploading the best of the FDM-S2 files from this opening

Ogg: Re: R: Re:: Re: [SkywavesDX] UNID Llanguage 90.3 - Ladin?

Thank you Franco and 'alegropp' (sorry - I do not know your name).

Looking at the area I received, Switzerland is a possibility. I don't think I have received Switzerland by sporadic E before, and certain never in Skegness. BUT, I think Franco might have solved this one. You suggested Radio Rumantsch, Grödental=Val Gardena. This very transmitter was received at exactly the same time on 92.9. Fade-ins were identical too.

Although there was no RDS on 90.3, I am am uploading the best files from this exceptional opening for future listening. Maybe the next generation of RDS decoding technology will allow the RDS to form. The relevant file has already been uploaded - http://www.mediafire.com/download/fqx2m3og7fr0u96/2016-01-13_1553_%28Es_Germany%2C_Austria_%26_Italy_96.7_-_102.5%29.ape but it seems quite likely that this was Val Gardena.

Just three files to check through and I should be able to post the full log from the 13th later today.

Thank you and good DX!

John

I am uploading the best of the FDM-S2 files from this opening

Hi John,

I'm not sure that it's ladin; it sounds to me more similar to rumantsch language and, in fact, there is one facility listed in Italy with broadcasts in this language.

90.30RAS - Radio Rumantsch Grödental=Val Gardena (RAS) (BZ)_RAS_RR_ Radio_Ru _mantsch 43A1

Wow! What is happening? Another superb opening which would have been
more in keeping with mid-simmer.

I have the gift! Yes, I have discovered that Sod's Law can work in
reverse. On THREE occasions this year, I have sat down at the computer,
with the intention of going through some more sporadic E files from the
summer. On ALL three occasions, I switched on the radio to find the FM
band full of Es, thus preventing me from catching up. I would have
ignored these openings were they only scraping the bottom of the band,
but they have all been substantial Es events. The first was on January
1st when auroral Es took over the band. Then came January 3rd with a
solid opening to the French Riviera. Then came this one. Good, solid
signals and, at times, very congested 'soupy' mess from north-east
Italy, Austria and south-east Germany. Throw in a bit of Balkan activity
and you have an impressive mid-winter Es opening. Luckily, I was well
placed for this one.

Signals were good and many strong locals got toppled. Belmont 93.1 was a
surprise as that is usually unshiftable. BBC Lincolnshire and Lincs FM
were wiped out at times too.

Many personal firsts were recorded as this opening favoured the extreme north-east of Italy - an area which has generally eluded me over the years. I have never heard Venice before, until today! Come to think of it, I don't recall seeing Venice in any other logs, though I'm sure it must have been reported before. It's certainly a rare one here.

Then to top it all off I had sporadic E to Germany! It's the sort of reception you might hear once in the summer here, but never in winter. German stations were on almost every other frequency, but most were too weak for RDS.

I heard what I presumed was the Ladin language on several frequencies, 97.4, 97.8, 104.7 come to mind, but I may have been confusing this with other languages, Romantch for instance, or maybe Austrian German.

This opening was so good and so out of character for the time of year that I have uploaded the best of the files to my Mediafire account. See here:

Good DX!

Hi John,

As usual this time of year I am digging myself a way through the FMLIST visual logbook, searching for new PI codes. While doing this, I came across a UNID reception that you logged on the 9th of July 2015 at 1141 UTC. This is the logging:

Es 1141 88.40 ? UNID, ? () 42ES MORESH@E, 0 by John Faulkner, Skegness (G)

The PI code contains a typo, it should have been 42E6. But the PS unmistakenly gives away the clue. This is IBA 1 Reshet Aleph/Moreshet from Israel. Unfortunately there is no station with this program listed on 88.4 MHz. Another UNID site with the same program and the same PS code has been received several times on 92.5 MHz.

Maybe you have a recording, which you could send to the IBA broadcasting organization.

Would this be a first from this country?

73, Janpeter

Hello Janpeter.

Well this is a nice surprise :-) . Wow! Thank you for your alert to this.

I think we can be certain that the letter "S" is not a correct letter for a PI code :-[. The word "MORESH@E" is interesting too - was this reported by other DXers with exactly the same characters? I thought the "@" character was a corruption. I probably assumed I had received something from Macedonia.

With deep regret, I do not have the original recording. That particular time, 1141, I must have been DXing live. I only have a few recordings for the 9th, so it should be fairly quick to get through that log, which I hope to begin tomorrow or maybe later tonight.

I was developing a system at the time, where I would log a few stations 'live' so the FM List Map would be populated with a few paths and so would alert other DXers of the conditions. Then I would make the recordings. I can only assume that is what I did on the 9th July.

Also, if it's anything to go by, the reception around this time was focused on the western Balkans, i.e. Slovenia, eastern Croatia, Bosnia & Herzegovina and central Serbia. This path would continue, approximately, straight to Israel. I can be more precise when I have checked through the recordings.

Oh well, this is very good news. I presume you are saying this is a 100% definite, apart from knowing the actual transmitter site.

Hopefully we will find out more along the way.

Thank you again and best DX.

John

Hello John,

The MORESH@E PS has been received on 92.5 MHz at least five times by other DX-ers in Central and Eastern Europa. For whom this is a single hop catch. Some of those loggings include the ID. And those catches were with the exact same characters in the PS. So from that perspective, this is 100% sure.

What I can add is that the IBA for some of its other networks references to the location by means of one letter at the end of the PS. This means that the letter 'E' at the end could stand for either Eitanim (Jerusalem), or Eilat.

73, Janpeter

And John was logging stations at half the distance, on the same general bearing around the same time. Plus Jordan TV was received on the South coast at 0641 UTC. Wow!

Just to sow confusion 42E5 is the regional pi code for 88FM from Beer Sheeva on 88.5 - which has an entirely different PS. I sure hope John still has a recording...

This really is great news. Thank you again Janpeter and Dave for help with this one, which I would otherwise have overlooked. So 2015 was one of the worst seasons on record, but with some of the most surprising catches!

I don't have a recording of that exact time slot Dave as I was DXing live. But I am now very keen to go through the few recordings I do have of this day. I am making a start on this now, so if you want to follow the progress of this, check http://www.fmlist.org/fm_logmap.php?datum=2015-07-09&omid=2149

Thanks again.

From: John Faulkner, Skegness
Topic: 38630 Message: 38630

More audio from 9th July 2015. The band was open to southern Poland, Slovakia and the Czech Republic. Then an Arabic station appeared on 91.8:

91.8 unid Arabic 1230 09-07-15
https://app.box.com/s/yl85yg4i2r76uhlgbkq088dlgpm9z4jh

An extension of the path would run into central Turkey and Iran, possibly touching Syria. Or maybe it's only Algeria ;-) It seems unlikely, but that has happened several times.

Thanks

John

Hi Nick.

Will do.

The thing is, not long after this time, there were snippets of Spanish stations in various places, also Italy. I think it's likely that this could be Algeria or Tunisia. Will post there anyway.

Good DX!

John

names 1717km

Unidentified/unknown site:

88.4 1141 ISR IBA 1 Reshet Aleph/Moreshet, Unlisted transmitter

** Personal 'First'

What seemed to be an average mid-summer sporadic E opening contained something quite unexpected. Had it not been for Janpeter's kind help I

would not have realised that I'd received Israel! This is a personal first and there was nothing else to indicate that conditions were anything special. As Janpeter commented in the Yahoo group, the PI code and PS name are correct. The unusual PS name looked incorrect to me: "MORESH@E", as if corrupted, but this is the same code which is often seen by DXers in eastern Europe who are able to receive Israel regularly by a single-hop! The station I received is Reshet Aleph. The "@E" is a reference to the transmitter site which, in this case, means that the letter 'E' at the end could refer to Eitanim (Jerusalem) or Eilat. It's just how they present their PS names.

It is with regret that I cannot back up this logging with a recording because it seems I was DXing live at this precise time. My usual logging method in the summer is to make a few initial loggings 'live', reporting them to the FM List so other DXers would see the available paths on the map and thus be alerted. Then I make a few recordings. Anyway, that's a new country to the log and a BIG thank you to Janpeter for the information.

Good DX!

Thanks Andy.

It shows what a great community we have when we can help each other like this. That logging is over six months old and I simply had no idea at the time. There was nothing else to indicate that there was anything unusual on the band. I just assumed I had received Macedonia with a corruption of some scrolling PS names, then I forgot about it. Anyway, I am repeating what I said earlier, but I am extremely grateful to Janpeter for spotting this.

Not only credit to Janpeter, but also to SDR technology. Perseus revolutionised medium wave DXing and now band 2 SDR technology is doing the same thing. You miss far less. If you think about it, the differences in the quantity of DX you could miss (or gain) when comparing SDR technology with older single channel DXing could be astonishing, I would have missed that amazing Turkish opening were it not for being able to record almost a third of the band while I was out that afternoon. So I have had a huge amount of help in all this, and I am deeply indebted.

Cheers

John

38638. BLR or UKR, help appreciated

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-01-19 20:35:56 UTC
From: ilkka suni
Topic: 38638 Message: 38638

Hi folks,

Greetings from the coldest town in Europe... Well, at least yesterday
morning, -36.8 C according to the national weather service. With last
year's last tropo lift around, 3 weeks ago, it was almost + 15 C out there...

Which language: BLR or UKR?

https://app.box.com/s/ncwps5esarjr2bastt48vewpjdqk2cxt

Thanks in advance for your help.

73, ilkka

** Personal 'First'

Today saw a brief but strong band-wide opening which centered on the Czech Republic and Slovakia. Several stations would appear on some individual frequencies, swapping and changing with each other, resulting in a lot of loggings in a very short space of time.

I saved two of the S2 files as the Czech Republic and Slovakia are not often heard here via sporadic E. Recordings here: http://skywavesdx.org/viewtopic.php?f=65&t=2128

Good DX!

From: ilkka suni
Topic: 38645 Message: 38645

Hi folks,

I finally tend to give up and try take the SDRplay in use.

Which console would, those of you familiar with the SDRplay, recommend:
the HDSDR, SDR-Cosole or SDR#

Thanks for the help.

73, ilkka

The newer builds of SDR# will not work with SDRPlay. The RSP is no longer supported so you need to find an older version of SDR#. I use 1.0.0.1347. SDR# is now only good for Airspy, if you have that. I don't.

You can get 8mhz out of HDSDR if you download the newest API and EXT/IO. Personally I like it but there's no stereo sound or RDS. If only HDSDR had RDS.

I don't use SDR-Console but I might just give it a try again. I found it complicated. It has been much improved since I used it last.

So mostly I use the older version of SDR# for FM Dxing with SDRPlay.

Agreed re the complicated operation of SDR Console, but it's an
excellent programme and Simon, its creator, does listen to user feedback.

I like HDSDR and have used it a few times, but I don't know if more
recent models allow you to loop playback. SDR Console didn't allow
looping last time I used it, but things may have changed since then.
Looping is very useful for meteor scatter in particular.

Regards.

John

Get a Virtual Audio Cable software and RDS Spy (free).
I use VAC (spent some $ once) and do almost all my FM-DXing with this great combination.

Agreed about Simon.

The newest version of HDSDR is 2.70 which dates back to 2013, so nothing has been added since then. At least now you can get 8mhz on FM plus there's a slider for selectivity from zero to 192khz thanks to the new EXT/IO.

Ilkka moi, in your QTH so near the Joutseno mast, 1MHz can be suitable bw with Win PC below i5 processor. I tested this last summer (SDR Play with old Lenovo T500 8GB Ram Win7, Joutseno 30kW mast visible 13km southwest visible covered by mighty Lake Saimaa "amplifier"). No way. CPU loads were 95-100%= total disaster with bw above 1 MHz. Haven't tested that after that (should buy a decent i7 pc someday..). I prefer Sony XDR, nothing beats those receivers with GTK sw in severe qrm circumstances (russians, and our locals there). Have a try still, interested what you think (if you have a i5 minimum)

my two cents,
Hannu

Thanks for the quick response, to everyone.

Since my aim is to use the SDRplay for Band2 FM-DXing, I guess I must forget about the HDSDR, as RDS data would be crucial for me. It also appears I have got no version of the SDR♯.

Supposedly, I am left with the SDR-Console [if it is provided by the SDRplay producer], and I just hate complicated interfaces. That is, that might be my case unless I can dig up an older version of the SDR♯ somewhere.

Did you read my earlier post?
You can connect RDS Spy, the best RDS decoder, and HDSDR, via Virtual Audio Cable.

73,
Günter

SDR Console fully supports the SDR-Play.

The software is a somewhat steep learning curve but it is worth it.

There is a very active Yahoo user group where help is available.

Getting the display as one would want it for FM DXing is a bit tricky, but the display setups can be exported/imported in XML form. I would be more than happy to send out the layout I use for FM dx-ing.

That's interesting because I use RDS Spy with the Elad FDM-S2 so VAC is already installed.

I went into the soundcard settings in HDSDR and got RDS Spy working fine. The problem now is that now I have no audio. There must be a few steps I'm missing. What else do I need to do to HDSDR?

Thanks Gunter. If I get this working then HDSDR/RDS Spy is what I will be using.

I have two 2 Core duo computers (2.6 and 2.8ghz) desktops that run fine with SDRPlay. The processor runs about 20% at the max. I also have an HP i-5 (2.6ghz) laptop that runs fine with it. You need a dual core computer for a minimum, IMO.

Ah, I always forget this. To get audio, you need to run audiorepeater.exe
which is part of the VAC package.

Yes, Günter, I read it, thank you.

It's just that I am trying to keep things as simple as possible, in the beginning, as I am not familiar at all with computer-related receiver interfaces. Some time ago, a fellow finnish DXer mentioned to me, he got his brains totally twisted with the VAC settings, and I reckon I am less skilled with PC's than he is.

So does, for example, Microsoft with XP, which many of us here still use.
HDSDR is not dead, it is just mature.

If that's the case, I wonder if the SDRPlay people could make some deal
with him to take the program and improve it themselves.

Meanwhile, I still had no audio out of HDSDR even though RDS Spy was
working. I managed to download some instructions written by Andy
Pritchard on what to select on Audio Repeater MME and his settings work.
I am happy. This really was not hard to do.

HDSDR + Virtual Audio Cable + RDSSpy can be a powerful combination for FM DXing - it gives a very sensitive RDS decoding set up.

HDSDR might not be supported anymore - but it works well - any files recorded can be played back through File Player on the latest version of SDR#.

you have to sort out quite a few things to get everything working but it is worthit.

HDSDR may have a problem with recording 10 MHz wide spectrum (AirSpy) but has no problem recording the 8 MHz wide spectrum from SDRPlay.

The problem it did have was that the I/Q recordings are done before the correction in HDSDR so when played back in SDR# you will get zero IF images. Now that API 1.8.1 has been released with ExtIO that problem is very much reduced.

David

38667. Airspy - how well does it perform on FM?

Yahoo group: SkywavesDX (2016 — 2017)

From: davebunyan@...
Topic: 38667 Message: 38667

Hopefully Jurgens will be prepared to give a good answer to the above question - as I really can't make up my mind whether to buy one - or go for a FuncubeDongleProPlus.

My main concern is whether IF images from strong stations show up anywhere. If the sample rate is 10 Mbps they would expect them to show up 10 MHZ lower. I know it is not a good comparison but using SDRPlay in low IF mode with a 2 Mbps sample rate (2.048 in reality) then images appear just about 4.1 MHz lower and are strong enough to blot out weak tropo. I can also get IF images on an RTL dongle which tune in reverse even when it is not overloaded. Neither are like-for-like comparisons as they are much closer in.

While I know there is a big difference (!) between the 10 MHZ spectrum of the Airspy and the 192 kHz single channel capability of the Funcube as I have an SDRPlay I can live with the 2nd SDR being narrowband but a 16-bit ADC if it means no images.

Here is a link to the product pdf

http://www.televes.co.uk/sites/default/files/catalogos/1._terrestrial_antennas_en_0.pdf
http://www.televes.co.uk/sites/default/files/catalogos/1._terrestrial_antennas_en_0.pdf

The only thing to bear in mind is that for DAB it needs to be vertically mounted - ideally with a non-conducting mast to avoid distortion of the radiation pattern. It might be worth checking with Televes' UK office whether there is a UK stockist as the p&p is more than the aerial!

Hi David,

Thanks for the advice, and for the links you provided earlier, too.
Last weekend, after having visited some blanc webpages, as well as
having done a couple of non-functional installations I quit, trying
play with the SDRplay.

Instead, just today I bought a Yamaha TX-950 for 30 euros [roughly
GBP 23]. Now alright, the TX-950 probably is not the best DX tuner
Yamaha ever built, still close enough to the very best Yamaha models.
Just currently, trying to gather whether the TX-950 front-end copes
with the 30 kW horizontal, 1.5 miles away.

Seemingly, there is a lot of dabbling ahead, and I also need to get a
new set of reading glasses to properly do soldering.

38676. 10.7 MHz IF filters, where?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-01-31 21:17:14 UTC
From: ilkka suni
Topic: 38676 Message: 38676

Hi folks,

It's 20 years since I modified any FM tuner. Since then, things they have a-changed. One no more finds 10.7 MHz IF filters narrower than 110 kHz, in Finland.

Can anyone give me a reliable provider, to acquire 50...80 kHz IF filters from? I figure, there still are sellers for IF filters in the U.K, possibly in Germany, too?

Thank you.

Thanks for reply, yes I know has to be vertical pol, same for these trial local mux's also I guess ? I use a 15 foot telescopic pole on a parasol base, not perfect perhaps but for FM anyway I have done amazingly well with this setup...

It does'nt seen this is available in the UK though

Has dropped off now but was getting Antena 2 on 94.6 from Muro at 1170 km. Clear mono at 0600 with classical music, and managed to record some weak and noisy Portuguese speech a little earlier.

Also RNE Clásica on 91.2 from Parada de Sil/M. Meda in Galicia. Good DX.

Topic: 38667 Message: 38682

Thanks for the reply Jurgens,

It is indeed worrying that you and Paul Logan find Airspy gives problems on the FM Band as from the specifications I would not have expected that to be the case and the SDR♯ team are very 'vocal' when it comes to saying their device is superior to SDRPlay.

Both devices have 12-bit ADC's so should have similar dynamic range. The Airspy has tracking filters at the front end so should be better.

After a year of using the SDRPlay it's limitations are becoming evident - but are far outweighed by it's benefits - especially being able to record 8 MHz (7.2 MHz usable)

I have found the following limitations:

In SDR♯ - my preferred software - the zero IF image suppression is not quite good enough. Using the inbuilt I/Q balance correction in the latest API is around 5dB worse than the SDR♯ automatic correction (build 1361) and low level spurious signals are present. But in most circumstances it is just one station that is a problem and careful placement of the centre frequency so the image falls on another local channel takes care of the problem.

There is a tendency to overload the mixer if you have an external pre-amp and leave the LNA on - which is easy enough to sort out as you don't need the internal LNA to improve sensitivity when you have an external preamp.

As for the OIRT band - I've got an RTL-dongle that seems to work well enough on that band.

The low IF images are too strong to make SDRPlay usable in this mode.

David

Ilkka terve!

BKLs company (Mediaplaza) sells Murata IF filters, 53 and 110kHz exists, 80kHz seems to be out of stock (and those can be found from eBay for example yesterday when I searched and found, thus the selling price is quite high = almost 10eur/1 unit..).

Thanks for the info, Hannu.

Now the MediaPlazaShop is out of 53 kHz IF filters, too, as I just bought the last 6 pcs in stock. Once I install them 53 kHz filters in the Yamaha TX-950, she should be quite a digger for MS and tropo.

Presumably, I am one of the very last and few listeners, still dabbling with these old analogue PLL tuners. In case there is anybody else, especially in need of 110 kHz Muratas, those are still on sale at the MediaPlazaShop.com, for eur 0.85 a piece.

Thanks Jim & Andy.

So yet another fine tropospheric opening. I got up at 6 am (about half an hour earlier than usual) as I suspected conditions would be good, and was greeted by a strong signal from France Inter on 87.9 from Pic du Midi. Going up the band I also had classical music on 91.2 (which turned out to be RNE Radio Clásica from Parada de Sil) and different classical music on 94.6 peaking SW. I looked in the 2014 WRTH and, sure enough, Antena 2 is listed on this channel from Muro in Portugal. I started recording then and it took a while to confirm as I needed to hear speech. It became very weak and disappeared for a while but started coming back up in strength towards 0700. By the time I was getting ready to leave at 7.40 it was back up to fully quieting, briefly reaching a bar. This is my first ever reception of Portugal here via tropo.

There were a few Spanish signals on the band too:
90.1 unid - can anyone get anything from this recording? (fighting with BBC R2):
https://app.box.com/s/uffzd2wuv5m3w809szp5vcfos30mjybu91.2 RNE Radio Clásica Parada de Sil 1096 km92.2 RNE Radio Clásica Quirós 958 km94.4 RNE Radio 3 Quirós 958 km104.8 probably Radio Galega Parada de Sil - can anyone confirm?:
https://app.box.com/s/sgbhk8orf7zttjpfnlafie4mkbb2eaeh
The duct was quite wide as SW and central France were also coming in.
To finish, here's 3 recordings of Antena 2 on 94.6 from Muro, at 1170 km:
https://app.box.com/s/tn7xakajgcakkssm81m1owsa0toiicl1

Again a superb logbook Nick! Congratulations on getting Portugal for the first time. This is one of the things on my to-do DX list, of which I do not really believe it is going to happen.
I very much enjoyed listening to the fantastic quality recordings.

My bet for the station on 90.1 MHz is Onda Cero Cantabria from Reinosa. But there is no ID.

Let's hope this is a pre-warning for things to come this year!

73, Janpeter

Has dropped off now but was getting Antena 2 on 94.6 from Muro at 1170 km. Clear mono at 0600 with classical music, and managed to record some weak and noisy Portuguese speech a little earlier.

Also RNE Clásica on 91.2 from Parada de Sil/M. Meda in Galicia.
Good DX.

Nick, Whitchurch, Hampshire.

38693. Re: [SkywavesDX] Tropo Portugal

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-02-03 06:31:31 UTC
From: nick gilly
Topic: 38680 Message: 38693

Thanks very much Janpeter. Yes this opening was well forecasted in advance by William Hepburn but I was still surprised to get Portugal, especially as SW is starting to look into a railway embankment running alongside the west side of our road.
I wondered if the station on 90.1 may have been from Galicia, e.g. RNE Nacional from Moaña. Could that also fit?
Never say never about receiving Portugal Janpeter. After all during that mega-tropo at the beginning of October BBC nationals were received over 1500 km away in Lithuania and Poland. Who knows what might happen in the future?

As you say, let's hope that 2016 brings us more superb tropo and Es openings. Good DX.

On Tuesday, 2 February 2016, 20:51, "Janpeter van Dijk janpeter_van_dijk@... [SkywavesDX]" <SkywavesDX@...> wrote:

  Again a superb logbook Nick! Congratulations on getting Portugal for the first time. This is one of the things on my to-do DX list, of which I do not really believe it is going to happen.I very much enjoyed listening to the fantastic quality recordings.

My bet for the station on 90.1 MHz is Onda Cero Cantabria from Reinosa. But there is no ID.

Let's hope this is a pre-warning for things to come this year!

73, Janpeter

Onderwerp: Re: [SkywavesDX] Tropo Portugal

 Thanks Jim & Andy.

So yet another fine tropospheric opening. I got up at 6 am (about half an hour earlier than usual) as I suspected conditions would be good, and was greeted by a strong signal from France Inter on 87.9 from Pic du Midi. Going up the band I also had classical music on 91.2 (which turned out to be RNE Radio Clásica from Parada de Sil) and different classical music on 94.6 peaking SW. I looked in the 2014 WRTH and, sure enough, Antena 2 is listed on this channel from Muro in Portugal. I started recording then and it took a while to confirm as I needed to hear speech. It became very weak and disappeared for a while but started coming back up in strength towards 0700. By the time I was getting ready to leave at 7.40 it was back up to fully quieting, briefly reaching a bar. This is my first ever reception of Portugal here via tropo.

There were a few Spanish signals on the band too:
90.1 unid - can anyone get anything from this recording? (fighting with BBC R2):
https://app.box.com/s/uffzd2wuv5m3w809szp5vcfos30mjybu
91.2 RNE Radio Clásica Parada de Sil 1096 km92.2 RNE Radio Clásica Quirós 958 km94.4 RNE Radio 3 Quirós 958 km104.8 probably Radio Galega Parada de Sil - can anyone confirm?:
https://app.box.com/s/sgbhk8orf7zttjpfnlafie4mkbb2eaeh

The duct was quite wide as SW and central France were also coming in.
To finish, here's 3 recordings of Antena 2 on 94.6 from Muro, at 1170 km:

Hi
An update on the fm band here on the island.
Nearly all stations listed in FM scan are valid for the Arrecife area but with the following changes needed

99.9 UK AWAY is now off the air on 99.9 Yaiza and 99.4 Arrecife
O2 FM now off the air on 95.5 Arrecife, 96.1 Yaiza
Power FM listed as 92.1 and 92.3 now operates on 92.2 Yaiza only

Just a warning to any island visitors. Make sure that you buy Correos stamps from a post office. Many hotels and supermarkets are selling Easy Post and Swiss post stamps. There are problems with these stamps. If you do end up with them my advice is to stick them on your postcard then post them in the nearest litter bin.
Tourists are still being led to believe that Easy Post stamps, sold in Canary Islands, are lawful. Easy Post stamps have been proclaimed unlawful by the Spanish Government and have been taken to court and fined one hundred thousand Euros. I wonder why they (Easy Post) are still selling their illegal stamps? The Spanish Government and the police are fully aware of the stamps being sold as well as the disappointment that is being caused to tourists, yet they do nothing about it!!

Hi

Forgot to mention yesterday re FM List that Radio Taxi on 102.00 (Yaiza) is not there, only can hear Happy FM from Corralejo on nearby Fuerteventura. In fact looking on internet cannot find any references to this station apart from a mention of a taxi service "Radio Taxi Arrecife". Wonder if possibly in the past this taxi company were using 102.00 for their taxi services

Hello Simon,

It is hungarian, on your record is speaking 'DJ Cooky', he is an
anchorman of Music FM from Budapest. He is speaking hungarian with
storng french accent, so it is difficult to identification the language.

http://cooky.hu/

regards,
Jozsi from Hungary

38706. Yamaha TX-930 TX-950 differences?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-02-06 08:40:09 UTC
From: ilkka suni
Topic: 38706 Message: 38706

Hi folks,

A fellow DXer just asked me about the Yamaha tuner model TX-930 RS
with RDS. And I got confused, as I had thought I knew enough there is
to know about Yamaha tuner models.

Now alright, I always figured the late 80's and early 90's models
without RDS, the TX-930 and TX-950, were pretty much the same;
-no RDS
-two bandwidth positions [WIDE, NARROW]
-5 IF filters
-CSL, fine tuning.

I always understood, the later model TX-950 was just a slight upgrade
from the TX-930, with just memory presets added.
.

WHAT CONFUSES ME is, and I really do not know how I should explain this.

Now alright, I just recently bought this Yamaha model TX-950 RS,
having no RDS as I expected. But as there are also Yamaha models WITH RDS,
the TX-930 RS with RDS and the TX-950 RS with RDS... Can somebody
tell me the major differences between these models [except for the
RDS function]? Starting from the early TX-930, ending up with the
latest TX-950 RS with RDS?

If the the only difference between the early TX-930 and TX-950 was
just the number of preset channels, and the later TX-950 RS with RDS
would be an upgrade from the TX-950, which model does the TX-930 RS
with RDS descend from? Is it a follow-up to the TX-730, with the RDS added?

Thanks a lot, for the help.

Hi Ilkka. I always thought that the TX-930 and 950 didn't have RDS, and that seems to agree with the pics I've found of them. The only differences between them that I know of is that the 950 has 40 presets and the 930 has 24.
The earliest decent Yamaha tuners that I know of with RDS are the TX-670 and 680.

I hope this helps. Good DX.

Nick, Whitchurch, Hampshire.

Kenwood L-1000T, Yamaha T-2, Sony ST-SA5ES, Denon TU-800L, Kenwood KT-1100SD (modified), Yamaha T-85, Sony XDR-F1HD tuners, horizontal Körner 9.2 beam (Antennenland version), Yaesu G-450C rotator

Hi,
I have the TX-950 RS. It has no RDS, 40 presets, 2 bandwidths, fine tuning in, 10 kHz steps, 2 antenna inputs, and 4 filters (2 for wide, 2 for narrow).
The only difference I know between the 930 and 950 is the number of presets.

38709. Re: [SkywavesDX] Yamaha TX-930 TX-950 differences?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-02-06 09:35:21 UTC
From: ilkka suni
Topic: 38706 Message: 38709

Thanks for the fast reply, to Joerg, too.

These, among others, are quite confusing...

http://www.fein-hifi.de/Tuner/Yamaha/Yamaha-TX-930-RS-Stereo-Tuner::217.html
http://www.fein-hifi.de/images/product_images/original_images/tx930grod.jpg

http://www.fein-hifi.de/Tuner/Yamaha/Yamaha-TX-950-RS-Highend-Tuner-Titan::370.html
http://www.fein-hifi.de/images/product_images/original_images/tx950titgroa.jpg

I never figured there were RDS models to TX-930
and TX-950, until a fellow DXer yesterday
e-mailed and asked me about the RDS model TX-930 RS.

The abbreviation RS, as I understand, only stands
there for the remote control sensor.

Stupid me, stupid me, stupid me. Withdrawing my enquiry, apologizing for bothering you guys.

I just realised, those station names on the display must be self-labelled. Darn...

No wonder the enquiry I got yesterday, concerning the RDS model of the TX-930, confused me.

Hi Nick,

Just have to comment as I still feel ashamed,
gotten mislead by this I gathered experienced
DXer stating to me, there is the TX-930 with RDS.

Darn, darn, darn, do I feel stupid.

This is what he e-mailed me, and being a
professional journaIist since 1981, I know this
quotation is a matter of discression:

*****My brother can buy a Yamaha TX 930 RS with
RDS and in steps of 10 Khz !!!!
But he can't find no review from a FM-DX'er on Internet.
Do you know this type and is it suitable for
FM-DX, to get smaller filters is no problem
or do you know a Finnish FM-DX'er who has the 930 RS.*****

In the end, I suppose he possibly just trolled me.

Of the Yamaha RDS tuners, I have personally
experience of no other than the TX-492. I quickly
sold it, as she did not meet the standards even the TX-530 had set.

That's a program name, John! Namely from Radio 3 Spain: Toma uno, radio con botas (roughly: Take one, radio with its boots on), they play "americana music".

Thank you Andrea.

The conditions point to the Zafra transmitter, which is a personal first here. Better post the log now.

Best DX!

John

Hi John,

Nice of you to remind us of summer cx. Which are not even very far away :-)

> Unidentified:
> 93.3 1101 E UNID, ? FFFF _ONDA___ __NDU___ _AMIA___ __MIA___ ________ ____TU__

This is SER/Radio Sierra Aracena from Aracena (AND-H). The full PS I have is this:
Sierra__Aracena__________TU_____ONDA____AMIGA__SER_93.3_

The other two UNIDs I don't know.

73, Janpeter

Hello Janpeter.

Thank you for this. The Es season always seems to creep up very quickly. Too quickly in my case as I still have 400+ files to check from last summer and I now realise that I probably won't get through them all before the next Es season starts.

Sorry that it has taken me two days to reply to you. I will update my log shortly. Your help is hugely appreciated.

Best DX!

John

Just to add that these 400+ SDR files I have yet to check were not automated files, i.e. recorded while i was out. They were targeted files made during openings, each being around 15 to 30 seconds in length.

I now understand that I need to do the following during the 2016 season: 1. Try to do live DXing where possible. There won't always be a need to record lots of files; 2. Record FEWER files. I don't like being behind with loggings. A day or two is forgiveable. SEVEN MONTHS is /almost/ INEXCUSABLE! It helps nobody. But it's nice to fall back on DX when there isn't any. That's not why I recorded so many files, however.

I will carefully select my remaining files, rather than check through every one. There's no point in doing that if reception is the same on successive files.

John

Hi all
Yesterday I uploaded a video about one of my best sporadic-e last summer. I think that being located on an island helps me a lot to enjoy as FM DXers. I ask for help to confirm all the details of my video....
Thank you very much in advance

https://youtu.be/Ij7IP6YxPZY https://youtu.be/Ij7IP6YxPZY

Best regards

Tomás González

Hi John, I see the struggle you are having with this. And somehow I am glad to see it. Long have I been in doubt on what to do with regard to buying one of those SDR radios myself. The upside of it being able to record large chunks of the band during Es openings. The downside being the enormous time it takes to go through recordings. Time that I simply don't have, having a full time job. And there is a family life also. During the summer season I am already over the limit of what is reasonable for investing in a hobby. So it is ridiculous contemplating a situation that would require at least10 times more to be spend on DX-ing. If it was only for myself and I would be retired, then things would be different. But hey, they aren't. So I have decided that enough is enough and for the foreseeable future I will stick with the single frequency tuning that I have now. Which, with the modified Sony XDR, is a joy in itself. 73, Janpeter ----- Oorspronkelijk bericht ----- Van: "'John Faulkner, Skegness' notmyregularemailaddress@....uk [SkywavesDX]" Aan: SkywavesDX@yahoogroups.co.uk Verzonden: Dinsdag 9 februari 2016 14:10:35 Onderwerp: Re: [SkywavesDX] Skegness Log: 18-07-15 Just to add that these 400+ SDR files I have yet to check were not automated files, i.e. recorded while i was out. Understood 110% Janpeter.

I often complain about my own lack of time, but I know the problem is more to do with poor time management on my part. Things really have become busier lately. My daily hours are often upside-down too with late nights (0400) and midday starts. I am rarely up at sunrise to take advantage of scatter conditions these days. It's one of the joys of being self-employed again. But of course there are the obvious benefits too. I am able to DX more often than I would be able to with a regular job.

Recapping: Last summer, I received Lebanon, Israel, Libya, Cyprus and dozens of Turkish stations. I would have missed virtually ALL of those stations with only single frequency DXing. That is not to knock single frequency DXing. It's been a fascinating 'experiment' and I am still determined to see the whole thing through, but time is against me.

Out of curiosity, I just checked the number of loggings in my Es logbook for 2015 - 6283! That's roughly three times my average seasonal Es logbook size and I am about two thirds of the way through the files. It's possible that log could exceed 9,000 or maybe more. Is it really necessary? No! But what a fascinating n eye-opener it has been.

You said yourself, that SDR logbooks are no longer 'traditional logbooks' but are more like 'bandscans'.

The opening I had to Barcelona one day was truly chaotic! I was able to identify so many new and exotic stations from that area and bag many recordings. It was fascinating! Hearing dozens of rare and low powered stations from the French Riviera was another highlight from my 2015 season. But it all comes with a cost.

My feelings about SDR DXing remain the same, that I would rather DX this way than go back to single frequency DXing, but the management of this form if DXing has got to be kept in check. "It's too much".

Good DX!

John

Thanks John!!
Certainly, thoroughly reviewing the information of FMLIST all transmitters working on 88.2 MHz have Little power (100 watt max.). My Sangean WR-2, with a lot of spurious and interference, sometimes, erroneously shows the true frequency.
On 88.10 MHZ power is much greater (160 Kw t!!!).
I want to upload more videos my best FMDXs this past summer...
Best regards

Tomas Gonzalez

Amazon looks your best bet:

http://www.amazon.co.uk/gp/search?ie=UTF8 <http://www.amazon.co.uk/gp/search?ie=UTF8&oe=UTF8&tag=binaoptitrads-21&index=blended&field-keywords=sma+f+connector>
&oe=UTF8&tag=binaoptitrads-21&index=blended&field-keywords=sma+f+connector

That is a UK listing but you should be able to find something on Amazon.

you must have days when you want to dx and have the time to do so but
there just is no dx?

well now you have a hard drive of dx on tap!

Topic: 38723 Message: 38728

Hola! Miquel

If you are in Spain (I am only guessing!), you can buy SMA connectors from online electronics mail order businesses in Spain such as:

http://www.todoelectronica.com/advanced_search_result.php?keywords=sma

http://www.cetronic.es/sqlcommerce/disenos/plantilla1/seccion/producto/ResultadoBusquedaProductos.jsp?idIdioma=&idTienda=93&palabrasClave=sma

http://www.brielco.net/b2c/index.php?page=pp_productos.php&tbusq=4&md=1

or from the ubiquitous ebay:

http://www.ebay.es/sch/i.html?_from=R40&_trksid=m570.l1313&_nkw=sma&_sacat=0

Of course, if you are not in Spain, this is of no help to you!

Saludos,
Grant

I've received a SDRPlay.

But I've a problem.

I can't buy a adapter sma to F connector in muy city.

What is the best adapter sma forma use with muy FM antenna?

My FM antenna is a APS-9

Thank you

No worries Tim.

I need to do check about 9 or 10 files per day if I am to get through
them by April 1st, for instance.

I *might* sit down and do a few files later, but I intended to do just
that late yesterday evening. When I sat down to do this around 11pm, I
just couldn't be bothered. I deleted all my overnight MW files too as my
enthusiasm for that waved goodbye too.

Cheers

John

From: John Faulkner, Skegness
Topic: 38730 Message: 38730

Heard on 106.2 at 1100 on 19-07-15.

106.2 Surely not? 1100 19-07-16
[url]https://app.box.com/s/ubelssvavpvu5o4d5p1agrm1wb9ncpxp[/url]

Surely not? I don't believe this can possibly be what the presenter says it is. Or is it?

I'm not crossing my fingers. I'm not hopeful. It can't be. Must be something else - a relay, for instance.

John

I've got another outlet of Adventist World Radio on 107.4 a minute
later. (1101 2015-07-19)

Still nothing listed.

Correction, 107.4 was not a minute later, it's at the same time, i.e. 1100. I was fooled as the programming is not in sync with 106.2, but it sounds like the same programme.

Nice catch John! There are an awful lot of carriers for adventist world radio (AWR), especially in Africa, so it's possible the two receptions were from different stations but almost certainly in the same geographical region, given the timing. I personally believe Ghana is a possibility but it seems difficult to verify? It would be great if confirmed, for sure :)

Perhaps drop a line to the AWR's Coordinator for International Relations; Dr A.M.Peterson at adrian.m.peterson@.... I believe he's also a radio DX-er and editor of AWR's DX magazine - hopefully that information is still correct.

Regards, Mark////////

Hi Mark.

Seems quite incredible to me that this could be Ghana, in spite of the ID - and I mean 'incredible' in the "I don't believe it" sense :-) . More likely to be a relay, but from where? I can't see Spain having AWR relays, or do they? Unusual to to receive two at the same time like this too.

I have already written to AwR, but to their main African email address. I will write to the address you gave me too and I'll do that now.

I am uploading the SDR file as I type.

Thanks

John

ok I stand corrected - happily
fm spectrum recording has finally produced some transient
multi-multi-hop reception
how long did the signal last?

Hi Tim.

About 30 seconds, if that. I am uploading the SDR file. It's about half way at the moment and is almost 1GB in size. I'll post the link shortly.

Still half expecting the possibility that this is coming from a European country.

Yes, I agree about the spectrum recording/transient reception. We don't know what we have been missing with single frequency DXing. Of course, we can look at ham radio reception and that will give us reliable clues. But there were no 6m openings down into west Africa at this time - something else which might prove that this has to be a European country. Or would it?

John

i bet theres not many 6m hams in some remote parts of Africa, the 6m
is a nice guide but i wouldn't consider it gospel when it comes to
really remote places
nice work!

Would echo this re: 6m activity – there is the odd one in West Africa, but generally only activated by DX-peditioners. Used to be one or two ex-pats in Nigeria/Ghana, etc. for example.

i bet theres not many 6m hams in some remote parts of Africa, the 6m
is a nice guide but i wouldn't consider it gospel when it comes to
really remote places
nice work!

Thanks Jim.

I really thought there would have been more from this area.

It makes you wonder how many more of these multi-hop openings are missed
when nobody knows the path is open.

I just opened Google Earth and ran a path from Skegness to Accra and, if
this is Ghana, the signal passes over north-east Spain, which was not
coming in at the time. However, the first hop could have been over the
Mediterranean or Algeria. A few Arabic stations were coming through at
the time, but I have only been able to identify Morocco so far.

Here's the SDR file if anybody wants to have a tune.

VERY interesting indeed John! AWR list 143 FM realys in Europe though so I'm inclined to think it might be one of them. A pity there isn't a comprehensive list of FM frequencies on there.
Fingers crossed they get back to you and double (or maybe triple) fingers crossed those two frequencies really are from Ghana.
 Good DX.

Hi John,

The AWR Ghana can be found on this page:

http://af.awr.org/gh/eng - And they have this podcast every day, and it is the same start you can hear in these podcasts, like the beginning of AWR Ghana on your Recording. And no information about FM Frequencies...

And there is no stations on 106.2 and 107.4 MHz broadcasting in Ghana. Several on 106.3 and 107.5 MHz. According to official data from late 2015.

http://www.nca.org.gh/downloads/FM_LIST_FOURTH_QUARTER_2015.pdf

So it's seems unlikely it's from Ghana.

Zambia and South Africa use 106.2 MHz for Religious Broadcasts..... just for the Record.

Thank you Niels and Nick.

The mystery deepens.

In the meantime, I had a reply from Adrian M Peterson at AWR, but there is still no certainly regarding the transmitter site/s I received. To quote part of Adrian's reply:

I am told that there are 1,700 AM FM & SW radio stations around the world that are affiliated with Adventist World Radio. My radio service for nearly half a century has been almost entirely in the shortwave area, with Adventist World Radio. There are two Adventist owned FM radio stations in Ghana, but I do not have any further information about them. FM channels ending in an even decimal number are European and African, but not North American. It is possible that you heard two FM stations briefly in Africa, but it is also possible that you heard Adventist programming on commercial FM stations at some other location, maybe perhaps even London.

I am forwarding your email message to the AWR HQ address in suburban DC for their attention, and perhaps they can provide a response to you in this matter.

So there is still a possibility that my reception could have been from Africa, but there is also a real possibility that this could be from the European mainland. But, as I said before, who would relay AWR Ghana in Europe? Is there a Ghanaian population in southern Spain?

There is also the possibility that this one could 'get away' completely.

John

Hi John,

There an Radio Adventista in Spanish Ceuta on 107.4 MHz and according to
awr.org they transmit in several languages. Even English, perhaps
Transmissions towards Gibraltar.
But no clue to 106.2 MHz.

And remember Ceuta is an Independent Radio Country.

From: John Faulkner, Skegness
Topic: 38730 Message: 38744

Thank you Niels.

I just heard on the Skywaves BB that Ceuta has many west African migrants. This is making sense. Gibraltar was received on 99.5 a few minutes earlier. Algeciras, Tajo de las Escobas and Sotogrande were also received around this time, together with Tetouan - all in the vicinity / on-path with Ceuta.

So 107.4 seems likely to be Ceuta.

IF 106.2 turns out to be west Africa, which is now looking rather unlikely, the extended path continues into Mali, Sierra Leone, Guinea and Liberia. Ghana isn't even close to being in the picture.

If only we had a reliable and up-to-date list of frequencies. I do not understand why such a large religious broadcaster doesn't provide such a list.

Well, my post title echoes my initial feelings on this actually being Ghana - "Surely not". I didn't really believe it. Conditions were not /that/ spectacular and did not seem, in any way, out of the ordinary. The only notable point of the reception on this day was Malaga locals coming in right to the top of the band.

Hi John,Is this the only moment you heard this great signal?If so I think it was a scatter by something what could cause a scatter because the audio is very clean for a multihop.When the signal returns again by fading in and out it could have been spor.E but I really doubt it was.Still it is an amazing reception + recording and as you said this never will be heard and confirmed by just tuning around the FM during an opening.I hope we will know soon which transmitter it is.Ruud

Thank you Niels and Nick.

The mystery deepens.

In the meantime, I had a reply from Adrian M Peterson at AWR, but there is still no certainly regarding the transmitter site/s I received. To quote part of Adrian's reply:

I am told that there are 1,700 AM FM & SW radio stations around the world that are affiliated with Adventist World Radio. My radio service for nearly half a century has been almost entirely in the shortwave area, with Adventist World Radio. There are two Adventist owned FM radio stations in Ghana, but I do not have any further information about them. Hi Ruud.

So far, these are the only instances of these signals I have found. I still have recordings to go through for this day but I am rapidly losing the time to do this. I feel like I have the weight of the world on my shoulders at the moment and I am being harassed by everybody under the sun. A lot of things are really trying my patience at the moment and I need some time to chill. I am going to 'down tools' and try to catch up on my remaining recordings. I need a separate life to deal with all shit thrown at me every day from big corporations.

I also have screaming grandkids staying here at the moment and, to be honest, they are doing my fecking head in! I'll be glad when they disappear.
>

I'm quite sure this is sporadic E. Multi-hop can produce good signal strengths if we are lucky. I do not believe anything is that 'black and white'.

So what is it? Seagull scatter?

Ruud, it is possible that the transmitters may never be identified, but my gut feeling is that these two are probably from somewhere around the Ceuta / southern Spain / North African area.

Thanks.

From: pe1etr@...
Topic: 38686 Message: 38747

The recording contains six extracts.
Same receiver, same aerial, same recorder, same transmitter. The extracts are shuffled and please don't infer which station is which based on the genre of music :-)

From: Janpeter van Dijk
Topic: 38730 Message: 38749

Hi John, I vaguely remember that there is a new and unlisted Radio Adventista relay in Melilla on 106.2 MHz. I am currently on a (rather long) business trip and do not have access to my computer at home or my personal files. As soon as I have returned, I will let you know for sure. 73, Janpeter ----- Oorspronkelijk bericht ----- Van: "'John Faulkner, Skegness' notmyregularemailaddress@... [SkywavesDX]" Aan: SkywavesDX@... Verzonden: Dinsdag 16 februari 2016 12:47:35 Onderwerp: Re: [SkywavesDX] 106.2 Surely not? Thank you Niels. I just heard on the Skywaves BB that Ceuta has many west African migrants. This is making sense. Gibraltar was received on 99.5 a few minutes earlier. Algeciras, Tajo de las Escobas and Sotogrande were also received around this time, together with Tetouan - all in the vicinity / on-path with Ceuta. So 107.4 seems likely to be Ceuta. *IF* 106.2 turns out to be west Africa, which is now looking rather unlikely, the extended path continues into Mali, Sierra Leone, Guinea and Liberia. Ghana isn't even close to being in the picture. If only we had a reliable and up-to-date list of frequencies. I do not understand why such a large religious broadcaster doesn't provide such a list. Well, my post title echoes my initial feelings on this actually being Ghana - "Surely not". I didn't really believe it. Conditions were not that spectacular and did not seem, in any way, out of the ordinary. The only notable point of the reception on this day was Malaga locals coming in right to the top of the band. John On 16/02/2016 11:29, nah@post4.tele.dk [SkywavesDX] wrote: Hi John, There an Radio Adventista in Spanish Ceuta on 107.4 MHz and according to awr.org they transmit in several languages. Even English, perhaps Transmissions towards Gibraltar. But no clue to 106.2 MHz. And remember Ceuta is an Independent Radio Country. 73's Niels Holst ----- Original meddelelse -----
Fra: "'John Faulkner, Skegness' notmyregularemailaddress@... [SkywavesDX]" Til: SkywavesDX@... Dato: Man, 15. feb 2016 21:35 Emne: Re: : Re: [SkywavesDX] 106.2 Surely not? Thank you Niels and Nick. The mystery deepens. In the meantime, I had a reply from Adrian M Peterson at AWR, but there is still no certainly regarding the transmitter site/s I received. To quote part of Adrian's reply:

I am told that there are 1,700 AM FM & SW radio stations around the world that are affiliated with Adventist World Radio. My radio service for nearly half a century has been almost entirely in the shortwave area, with Adventist World Radio. There are two Adventist owned FM radio stations in Ghana, but I do not have any further information about them. FM channels ending in an even decimal number are European and African, but not North American. It is possible that you heard two FM stations briefly in Africa, but it is also possible that you heard Adventist programming on commercial FM stations at some other location, maybe perhaps even London. I am forwarding your email message to the AWR HQ address in suburban DC for their attention, and perhaps they can provide a response to you in this matter.

So there is still a possibility that my reception could have been from Africa, but there is also a real possibility that this could be from the European mainland. But, as I said before, who would relay AWR Ghana in Europe? Is there a Ghanaian population in southern Spain? There is also the possibility that this one could 'get away' completely. John On 15/02/2016 19:03, nah@post4.tele.dk [SkywavesDX] wrote:

Hi John Just been reading latest emails re AWR. You are right in them having many unlisted stations. Here in Lanzarote they are on 103.4 and 100.9 but you will not find these listed on the AWR site. An AWR station in Cueta operates on 107.7 spanish, eng, berber, arabic progs but cannot find any info re nearby Melilla .Not sure if this helps anyone but just thought I pass it along.

Very helpful Edward. Thanks for this.

Lists will never be fully up-to-date as stations are always changing, popping up or disappearing. The FM List is, without a doubt, the most complete resource of its kind, and any information like your helps keep us all up to date.

Regards

John

Extracts from my SDR files from July 24th 2015. Some clear IDs in here.

88.2 unid Algerian 1400 24-07-15
https://app.box.com/s/flpdi11umxj0j70o1c5gobsejz79qtuu

The IDs are at: 00'7", 01'13", 01'22" and 01'32" 01'41". But nothing is listed for 88.2 MHz.

Thanks

John

Maybe:

ALG Saida 88.20 Chaîne 2
as listed by Mike Fallon in http://www.ukdx.org.uk/fm/FreqOrder.htm

This tx regularly heard here in SE Spain.

Yours,
Grant

38763. A couple of enquiries

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-02-19 07:09:34 UTC
From: ilkka suni
Topic: 38763 Message: 38763

Hi folks,

Sorry to bother you with my enquiries, once again. Still, I do.

1] Could the Nordic listeners, please, tell me when these countries
were fully covered by FM transmitter network:
-Denmark
-Norway
-Sweden?

Jag kan nog laesa svenskspragiga websidor, and I do understand Danish
and Norwegian to some degree, too, but sometimes it is not so easy to
comprehend things.

With my question, I do not mean to refer to the date, each country
was 100 per cent covered but roughly the year, the FM transmitter
network was built up "from coast to coast".
.

2] Even though the issue is not an FM receiver. Did any of you folks
abroad, ever come across with this very radio model of finnish make?
If so, where and when?

There were various models to this portable transistor radio of late
50's and early 60's, the model branded
"Finnish Export" [in grey chassis colour]

http://www.radiohistoria.fi/yabbfiles/Attachments/finnish_export.jpg

carrying LW//MW coverage, and another [in ivory white chassis colour]
model branded
"HELKAMA RADIO",

https://museot.finna.fi/AJAX/JSON?method=getImagePopup&id=tm_ah.M011-1226259&index=2&size=
large
http://www.radiomuseum.org/r/helkama_matkamikko.html

having the MW dial only. Both models looked quite similar.

The photos of the model Finnish Export are copyright Kauko Viitanen
// the Finnish Radiohistoric Society.

Thank you for your help and patience.

Thank you very much, Niels!

From the websites of NRK and Sveriges Radio I learned, Norway
launched their first FM transmitter in the year 1954, and in Sweden
the very first FM transmission took place in 1942, but I could not
quite figure when these two countries had their first nationwide
programme networks completed.

Strange how easy Norwegian is to read, yet demanding to comprehend when spoken.

Hello,

Just for the info:
The first Norwegian FM-transmitter (tests from 1954) was near Voss, tx: Voss-Hangurstoppen.
This one was replaced by Voss-Lønahorgi in 1960.

Hi Arvid, Niels,

What a breathtakingly beautiful view in the photo, Arvid.

Thanks a lot for the info. Could it be, by 1960
the NRK already had the NRK P1 network covering
more or less the whole country? Their website
told, though, completing the transmitter coverage
lasted throughout the 60's and 70's.

What I am trying to do, is figure out how widely
each Nordic country was covered with FM
transmitters, by early 60's. I might find the
answer in the old editions of the WRTH but I have
not got that old volumes, dating back to early 60's.

Very helpful Edward. Thanks for this.

Lists will never be fully up-to-date as stations are always changing, popping up or disappearing. The FM List is, without a doubt, the most complete resource of its kind, and any information like your helps keep us all up to date.

Regards

John

Hi John

Just been reading latest emails re AWR. You are right in them having many unlisted stations. Here in Lanzarote they are on 103.4 and 100.9 but you will not find these listed on the AWR site. An AWR station in Cueta operates on 107.7 spanish, eng, berber, arabic progs but cannot find any info re nearby Melilla .Not sure if this helps anyone but just thought I pass it along.

Yes I like the review as it is comprehensive. I've posted a request for the IF image rejection figures to be measured - whether it is the zero image IF on SDRPlay or the low image IF which applies to the AirSpy (and the SDRPlay in low IF mode).

For me that is critical as the SDRPlay is just about adequate in zero IF mode - even using the inbuilt correction in SDR# 1361 and in low IF mode - just not good enough. The Airspy has the promise to be better in this respect but having an independent verification would be nice. It that happens it will be my next major purchase.

Regards

David

Thank you Marc.

This is an interesting development. I expect there will be more loggings
of AWR from Spain in the coming Es season.

Best wishes.

John

38778. UNID 87.7

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-02-20 17:36:06 UTC
From: John Faulkner, Skegness
Topic: 38778 Message: 38778

This may be nothing.

During an opening to NW Spain and Portugal on 24-07-15 I heard this language ...

"87.7 unid - query Arabic 1428 24-07-15"
https://app.box.com/s/y0cwezcebw740qv5qkcmjuj33rrtpdp3

It sounds like Arabic to me, but somehow slightly different. Maybe it's not Arabic.

In view of the area received at the time, I thought this might be worth posting, just in case it's something off the beaten DX path.

/It's probably just Algeria tormenting me as usual :)
/
Thanks

John

38779. New Version of FMSuite Frequency Scanner/Manager released

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-02-20 23:44:48 UTC
From: davebunyan@...
Topic: 38779 Message: 38779

Jeff Knapp has recently released v2.0.5888 of the FMSuite plug-in for SDR♯. I got accepted as a beta tester way back when it was ver 1.5 and Jeff has kindly adopted suggestions that has improved its effectiveness for FM-DXing - in particular adding a cut-off timer to take into account the constancy of broadcast signals and optimising the active signal detection.

For me the bad news was when SDR♯ dropped support for SDRPlay but I continued testing on an RTL dongle with an R80T2 chip and results with the dongle itself were better than I expected - so much so that I have now got three of them. These will provide 24/7 background scanning and pick up any openings that reach RDS level. It will work with FCDPro+ and of course AirSpy.

Quick tip for using RTL dongles - there is a modified driver on the rtl-sdr.ru web-site (modrtlsdr) that allows the LNA, mixer and VGA gains to be set separately as well as allowing for decimation - I've found it much more useful for optimising the gain than the standard driver.

Pre-requisites for effective use for FM Dxing in addition to using FM Suite if you don't already have them already is the plug-in MPXOutput feeding RDSSpy.com via VAC. You need a decent PC as being a full scanner FMSuite uses significant CPU power. If you are using Win 7 or Win 8.0/8.1 you need to download .NET 4.6 in order to run SDR♯ latest version. Win 7 needs less CPU power than Win 8.1. On an i5-3470S I see around 60-70% cpu load when running two full instances of FMSuite+SDR♯

Jeff asked me to contribute some notes on the settings I found worked well in FM Suite and you'll find those notes in the documentation for the Frequency Scanner / Manager pdf file that can be found on his web-site http://www.freqmgrsuite.com/

You can search in both skywaves forums if using VAC or RDSSpy is new to you. I have a spreadsheet that I am willing to share if anyone is really interested - basically you copy the two logfiles (FMSuite and RDSSpy) into the spreadsheet and all the frequencies get matched to the RDSSpyLog with over 95% accuracy. It takes a very short time to do the necessary copy/pasting. This spreadsheet is also suitable for marrying up the logfile from RDSDataLogger with the RDSSpy log file as I made extensive use of Andy's program in the 2015 Es season.

** Personal 'First'

The further I progress through last summer's Es files, the weirder the season gets! Today's opening emphasizes this: The Es propagation behaved in typical 2015 fashion, sweeping from west to east - the opposite of how the Es traditionally move. In fact, the propagation paths taken by today's Spanish Es suggested that the Es were swirling around in a circle!

Conditions started with Portugal and some Moroccans dominating. Spain appeared shortly after this. Then Algeria came in. Algeria faded and Galicia took over. Suddenly, Calalunya waded in with good signals from the Barcelona area. Algeria popped in again, just to remind me it was still there. Conditions then moved west through Castilla Y Leon, missing Aragon, then took a right and focused firmly on Cantabria for a while! It didn't stop there as conditions swept south again back into Castilla Y Leon. Not wishing to leave out Algeria, this too kept joining in, I think primarily to annoy me. ;)

But a few new and interesting local stations were added to the log during this process, mostly from the Cantabrian area.

All today's loggings were extracted from 100 files which were recorded automatically while I was out in town. I was able to whiz through them pretty quickly thanks to SDR Console's File Analyser, which created a waterfall display which showed where the DX was, at what times, etc.

Good DX!

Hi!
I need your help.
I bought the SDRPlay about twenty days ago
I had to wait two weeks to get an adapter for the SMA connector.
My favorite software is the SDR # and SDRPlay can not make recordings,
RDSspy not work, the IF spectrum does not work, does not work FM MPX
I SDRplay plugin for version SDR # 1411 can not be operated in the 1361
version.

Could someone send me puglin of SDRplay for the 1361 version of SDR #?
Thank you!

** Personal 'First'

Two very brief Es openings today with propagation only reaching the
bottom third of the band. It took me quite a while to determine the
location of the Italian opening due to its patchy nature.

Good DX!

** Personal 'First'

Two very brief Es openings today with propagation only reaching the bottom third of the band. It took me quite a while to determine the location of the Italian opening due to its patchy nature.

Good DX!

38789. Re: [SkywavesDX] Skegness Log: 27-07-15 (Late Posting - Too Late?)

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-02-24 14:58:19 UTC
From: John Faulkner, Skegness
Topic: 38786 Message: 38789

Hi Marc.

Yes, it is quite normal. I am catching up with my sporadic E files from last summer. Their value may not be as high as if they had been posted on time, but I have been too busy to keep up-to-date. I'm almost done now, once I get past the enormous number of files from the 28th July - one of the best days of the season.

I admit, I asked myself the questions: Do I still post these late loggings? Or shall I just accept the fact that they are now too old and just forget about them, but keep a record for my own use.

Curious now to know if other people feel these late logs are pointless. Please let me know in complete honesty. I was under the impression that there will be useful information in them.

Thanks :)

John

38790. Best 12 element DAB antenna ?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-02-25 00:16:01 UTC
From: Dave
Topic: 38790 Message: 38790

Moonraker, Blake or the Kathrein AV 12 (11 element) ?

I made the massive mistake of buying the useless Televes 1065 7 element from Italy, looks cheap and it's probably the worse performing yagi ever made so I would appreciate some sensible real user advice please :)

Dave
East Sussex

Hi Marc.

Yes, it is quite normal. I am catching up with my sporadic E files from
last summer. Their value may not be as high as if they had been posted
on time, but I have been too busy to keep up-to-date. I'm almost done
now, once I get past the enormous number of files from the 28th July -
one of the best days of the season.

I admit, I asked myself the questions: Do I still post these late
loggings? Or shall I just accept the fact that they are now too old and
just forget about them, but keep a record for my own use.

Curious now to know if other people feel these late logs are pointless.
Please let me know in complete honesty. I was under the impression that
there will be useful information in them.

Thanks :)

John

yes keep posting and we can pretend its not the hellish month of February :-)

me & Jurgen have video carriers from Asia via satcom in the 260-261mhz range
anyone hardcore enough to extract pictures?

bearing is 140 degrees from NW Europe, system is 50hz, 625lines

Onderwerp: Re: [SkywavesDX] Skegness Log: 27-07-15 (Late Posting - Too Late?)

Hi Marc.

Yes, it is quite normal. I am catching up with my sporadic E files from
last summer. Their value may not be as high as if they had been posted
on time, but I have been too busy to keep up-to-date. I'm almost done
now, once I get past the enormous number of files from the 28th July -
one of the best days of the season.

I admit, I asked myself the questions: Do I still post these late
loggings? Or shall I just accept the fact that they are now too old and
just forget about them, but keep a record for my own use.

Curious now to know if other people feel these late logs are pointless.
Please let me know in complete honesty. I was under the impression that
there will be useful information in them.

Thanks :)

John

Onderwerp: Re: [SkywavesDX] Skegness Log: 27-07-15 (Late Posting - Too Late?)

Hi Marc.

Yes, it is quite normal. I am catching up with my sporadic E files from
last summer. Their value may not be as high as if they had been posted

on time, but I have been too busy to keep up-to-date. I'm almost done now, once I get past the enormous number of files from the 28th July - one of the best days of the season.

I admit, I asked myself the questions: Do I still post these late loggings? Or shall I just accept the fact that they are now too old and just forget about them, but keep a record for my own use.

Curious now to know if other people feel these late logs are pointless. Please let me know in complete honesty. I was under the impression that there will be useful information in them.

Thanks :)

John

Hey John,

OK, I thought it was Yahoo acting strange again. But you did almost freak me out with those loggings, thinking initially that I had missed another great opening shortly ! J

Keep on DX'ing !

73, Marc

From: John Faulkner, Skegness
Topic: 38786 Message: 38799

Thanks for your comments.

In an ideal world I would have these loggings posted no later than the day after the event.

Speaking of Yahoo, it has been MUCH better lately - not entirely without hiccups but actually quite reliable.

I am tackling 160 files from the 28th July now. This is the last of the biggest days of the season, although the 9th August was a good day with 50 files. There's not a lot more after these so the end of the 2015 season is actually in sight, at last!

John

I wouldn't have the patience to trawl through so many files. A few days/nights of recording at the end of 2015 for meteor showers wiped me out.

Mind you I found 24 minutes worth of recording from the evenings of 25th Dec 2015 which 'd archived and escaped being erased - and I found some Auroral ES. Finland on 88.2, 90.1 and 93.1 - PI codes 6201, 6202 and 6203 - which indicates they were all from the Lappau TX site. I'd erased the other stuff as nothing was found and these must have been missed as not logged on FMList.

So I'll at least try to do some recordings wheon the hour when there are openings evident.

David

Okay John, I am finally back home.

My memory has served me well. There is indeed a Radio Adventista from Melilla on 106.2 MHz. This has been received a.o. by Paul Farley with a PI of E250 and a PS of Radio___ Adven___ tista___ Melilla_

The Radio Adventista on 107.4 MHz is from Ceuta.

Congratulations with these two very nice catches! And also in one listening session.

73, Janpeter

Onderwerp: Re: [SkywavesDX] 106.2 Surely not?

I've got another outlet of Adventist World Radio on 107.4 a minute later. (1101 2015-07-19)

Still nothing listed.

John

106.2 Surely not? 1100 19-07-16
[url] https://app.box.com/s/ubelssvavpvu5o4d5p1agrm1wb9ncpxp [/url]

Surely not? I don't believe this can possibly be what the presenter says
it is. Or is it?

I'm not crossing my fingers. I'm not hopeful. It can't be. Must be
something else - a relay, for instance.

John

Thank you Janpeter.

With the conditions for this day, I think there's little doubt that these two loggings are now 100% definite. With Ghana being off-beam I had little faith in it becoming a reality. You can imagine how excited I was when I first heard the identification. We can't have them all. :)

I will update the log shortly.

Best regards.

John

amazing!

theres a techno pirate fighting with Islamic programming in Russian/Arabic and a Russian Dude breaking in to yell about Putin and patriarch Kirill!

this is all via the satellite at 72 Deg E over the Indian Ocean

38808. Unid from 2004

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-02-28 22:48:58 UTC
From: Miquel Nicolau Amer
Topic: 38808 Message: 38808

Hi,
I have a unid station from 24 June of 2004.
Perhaps you can help me

99.5
PI: D207
PS: 99,5_MHZ 99,6MHZ_
RT: RADIO PRIJEMNIKA JE NA PRAVOM ME BUM BUM RADIO
AF: 99,5 and 94,0

I have received it also on 90.6

I have received it in only horizontal polarization
The RT is bosnian language.

I have recived stations from Mostar and Zenica few minutes before.

I know it's a long time but I'd like identify this station.

Sorry for my bad English.

Thank you

Miquel

*
**Unidentified/Unlisted:*
94.3 1803 HNG UNID, ? B30B
104.0 1815 ? UNID, ? Balkan language. ID sounded like Radio Skopje or
Radio Stop?
103.8 1852 ? UNID, ? Only one station, but PI alternating between 3201
and D008.
Music sounded like German Schlager. Probably Balkan.

** Personal 'First'

I was relieved to discover that most of today's 160 SDR files didn't
have any E skip on them. It was another day where I had gone out and
left the S2 recording for the duration.

Good DX!

By the way, can anyone hear what appears to be a spanish speaking
broadcasting station on 245.200? It's fairly strong here in Stockholm
but with some distortion.

Back in 2009, I heard a Thai speaking BC station on the same frequency.
It was also reported from several other listeners around Scandinavia.

I have of course also checked the local FM BC band to make sure I haven't
stumbled across any weird mixing products.

Any ideas what station this is?

/Nick

Hi again!

Never mind, I managed to ID the mystery station myself. It's Radio Maria
from Nicaragua.
I heard them mention Nicaragua in the transmission, so I Googled
streaming radio stations
from that country and clicked my way through about fifteen of them
before I found the one
corresponding to 245.200.

Hi Miquel,

http://www.modli.rs/radio/radionews_2005.html

[[[[*****QUOTE]]]]]
by Vuk Mihajlovi
BUM-BUM radio emituje program na dve frekvencije:
99.5 za Beograd i □iru okolinu i 94.0 za Vojvodinu.
[[[[END QUOTE*****]]]]]

http://bumbumradio.rs/kontakt/podaci-o-nama

In Finland, Bum-Bum Radio of Beograd has been
received on 90.6 MHz, years ago via Es.

38817. Jaguar

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-02-29 12:02:01 UTC
From: John Faulkner
Topic: 38817 Message: 38817

Jaguar (and his best pal Turtle) are now available to download via MW List. But what are they?

My curiosity is aroused. Promises of clean audio and a plethora of other useful tools. So I downloaded the "latest package" and got a message that the version was "too old" and so could not run it.

The scrolling 'ticker' at the top right of the page informs me that Jaguar is "not mature enough"!

That's a pity. I like the sound of it, apart from the rather strange product description.

Does anybody know more about this?

John

38818. FM Bandscan: Vera (Almeria), Spain: February 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-02-29 13:47:22 UTC
From: Grant Williams

Hello/Hola!

Updated FM bandscan from Southeast Spain.

* This lists stations heard during the past month (excluding one-off DX)
* Station names sourced from listening or RDS
* Station locations sourced from listening or RDS or the AER database at
http://www.fmlist.org/aer_fm.php?smode=S or Mike Fallon's North African database at
http://www.ukdx.org.uk/fm/FreqOrder.htm
* Station RDS sourced from observations.

Yours/Saludos,
Grant

Hi,
What is the minimal distance between two FM antennas?

I think the distance between two horizontal FM antennas in the same mast is from 0.86 to 1.37 meters but I am not sure.

What is the minimal distance between one horizontal antenna and another vertical antenna?

What is the best way to mount two antennas? In the same mast?

Look at the pictures I send it.

I want only two aerials. One vertical FM antenna and another horizontal FM antenna.

I kow I am not Vicent van Gogh or Pablo Picasso but I try it.

Thank you

Just found this article from the Swiss Broadcasting Corporation.
Patrick TraversS. Yorkshire, GB.
Media release from the DigiMig working groupRadio listening in Switzerland: digital winning, FM losing groundNeuchâtel, 5 February 2016Half (49 percent) of radio listening in Switzerland is now digital. Analogue FM receptioncontinues to lose ground in all age groups and all parts of the country. These are the findingsof the second survey on digital radio listening, presented today at the Atelier radiophoniqueromand (ARARO) radio workshop. Commissioned by the Digital Migration working group,GfK Switzerland has been gathering data on digital radio listening in Switzerland since thespring of 2015.In autumn 2015, 49 of every 100 minutes of radio listened to in Switzerland was enjoyed by digital means.The first survey in spring 2015 put the figure at 45 minutes. Digital listening as a share of the total hasthus risen by 4 percentage points compared with the pilot study.Digital radio conquering French and Italian-speaking SwitzerlandA sharp rise in digital radio listening has been recorded in the French and Italian-speaking parts ofSwitzerland. There was a more measured increase in digital listening in German-speaking Switzerland.Strong momentum for in-car DAB+Digital radio (DAB+ or internet reception) has already overtaken analogue FM radio at home and atwork. Here, there is a more or less even balance between the two means of digital transmission. WhileDAB+ has a slight edge when it comes to listening at the workplace, at home people tend to listen morevia the internet. In-car DAB+ listening is also on the rise.Increasingly popular among all age groupsYoung and old alike are increasingly switching from analogue to digital. FM is losing most ground todigital radio in the 15 – 24 age group, although it is also experiencing a marked decline among listeners inthe mid age range and the over-55s.Monitoring digital migrationIn the spring of 2015, GfK Switzerland conducted an initial pilot study of 2,400 subjects on behalf of theDigital Migration working group. A second survey followed in the autumn of 2015. Designed for the longterm, the aim of the study is to evaluate progress with digital migration. That is why a series of snapshotsof digital radio listening will be taken at six-month intervals. The Digital Migration working group has seta digital radio listening share of 68 percent as a condition for the switch-off of FM transmitter.Just found this article from the Swiss Broadcasting Corporation.Media release from the DigiMig working groupThe Digital Migration (DigiMig) working groupIn the spring of 2013, the radio industry joined forces with OFCOM to form the Digital Migration(DigiMig) working group. In addition to OFCOM, it comprises representatives of the VSP association ofSwiss private radio stations, the RRR association which represents regional radio stations in FrenchspeakingSwitzerland, the Unikom union of non-commercial local radio stations, Swiss public broadcasterSRG SSR, the automotive industry, and other sectors.Analogue FM transmission in Switzerland will gradually be replaced by digital radio as of 2020. At the endof 2014, DigiMig presented a scenario for the analogue–digital switchover to the Swiss Federal Council.SRG and most privately owned radio stations already broadcast via DAB+ in parallel with their FMsignals. Some stations have even gone exclusively digital. Further

There's been a short discussion about Jaguar on the Skywaves forum and was directed to "Jaguar Lite" at http://jaguar-lite.blogspot.co.uk/.

I like this! I'll paste in what I wrote in the forum, but I see some great potential in this project.

It's working - and it can even play the same file at the same time as Perseus!/ .. (instant comparisons)/

The audio is processed. Sounds like some kind of noise filtering but the Perseus audio actually sounds better, which is saying something! I think HDSDR istheapplication for medium wave DX audio - always crisp and clean.

I couldn't see any was of running Spector, so I presume this is only possible with the 'full' version.

I like it though and I can see potential. It's very different to tuning with the Perseus. The write-up suggests it's the bee's knees,or the dog's whiskers, whichever you prefer, but I can't rate the audio as anything special. It does have a 'nice' sound though. Shame I can't alter the bandwidths and have a further play.

I think this shows there is further potential for greatly improving the interfaces we use for our medium wave DXing. One of the things which would hugely improve medium wave DXing for me is the incorporation of a splatter filter, such as Jurgen's "Splattaway" and a good level of 'clever' audio filtering and noise reduction. Thereareways to clean up audioifit's done correctly. All filtering I have used for medium wave DXing over the years inevitably results in degraded, scratchy or 'woolly' audio and without any real improvement to intelligibility.

There is a lack of useful low frequency response in Jaguar Lite. I guess this is because I am only using the limited "Lite" version. This might explain the lesser audio quality. I think that a simple graphic equalizer could be useful in something like this too, to boost the frequencies of speech, for instance.

It was pointed out that the 'bubble' gives a very precise offset measurement of the received signal. 909 5 Live comes in at 909.005.5, conforming my own findings, although I wouldn't have dared to try to look lower than 1Hz accuracy.

If only I could try the full version of this. It would be so useful for obtaining instant offsets and many other things. Does anybody know if a full version is / will be made available soon?

Thanks

John

I was always told that the minimum distance between two antennas of the same frequency range should be half of a wavelength. From experience I can say that this is not enough if both antennas are to move independently. I have had interactions on DXpeditions with antennas substantially more than ten wavelengths apart.

Mounting one antenna vertical and one horizontal results in much less interaction - even if mounted on the same boom. Several FM DXers now use a vertical and horizontal antenna on one boom.

That's my non-technical version based only on personal experience, Miquel. Maybe somebody will post something slightly more technical about this.

Regards.

John

Hi Miquel,

This PI has been received previously on 99.5 MHz and belongs to Bum Bum Radio. The location for this QRG is supposed to be Kikinda, but this is unconfirmed. It is from SRB, not from BIH.
I am not sure if this is the same px as the Bum Bum Radio from Beograd on 99.4 MHz. This has a different PI code anyway. I have not seen any reports of Bum Bum on 99.6 MHz.

73, Janpeter

Hi,
I have a unid station from 24 June of 2004.
Perhaps you can help me

99.5
PI: D207
PS: 99,5_MHZ 99,6MHZ_
RT: RADIO PRIJEMNIKA JE NA PRAVOM ME BUM BUM RADIO
AF: 99,5 and 94,0

I have received it also on 90.6

I have received it in only horizontal polarization
The RT is bosnian language.

I have recived stations from Mostar and Zenica few minutes before.

I know it's a long time but I'd like identify this station.

Sorry for my bad English.

Thank you

Miquel

From: g1mxp@...
Topic: 38829 Message: 38829

Regarding the possible AWR Ghana relay heard. There does appear to be an AWR in Ghana. The Annual report 2011 from AWR mentions that

Recent FM Projects:
Numerous FM station projects have been springing up in recent years, particularly in Africa. New stations are under development or have already been installed in:
• Kitui, Kenya
• University of Eastern Africa, Kenya
• Mbale and Jinga, Uganda
• Swedru, Ghana
• Libreville, Gabon
• Kisangani, Democratic Republic of the Congo

Wonder if that helps or perhaps by now its been sorted out

Hello Edward.

Thank you for the information.

I would LOVE to claim AWR Ghana on FM, but it looks virtually 100% certain that I received the AWR Ghana relays in Ceuta and Melilla. These two exclaves were spot on 'on-path'. and Ghana definitely wasn't, unfortunately.

There are also many AWR relays on FM in countries throughout Europe, so it becomes difficult to be absolutely certain which transmitter I had, but everything matches up with Ceuta and Melilla, including the frequencies. All the information is available to read in previous messages.

Thanks and best wishes.

John

Hi John

I have used Jaguar Lite for some time, now I have got the full version (with paying a "membership fee" of 50 € to the developing team).

As the software is a bit difficult to handle, the team is not interested to spread it to everyone, but I think that other experienced MW-DXers who already know Jaguar Lite and who don't fear to use a software with a lot of undocumented things could also get it in the future. Now, already about 60 DXers use the full version and the team says that the number of users probably will not increase over about 100. That's particularly because there is a really good _personal_ support. After beginning to use the full version, they took me "on the hand" and I got a lot of very useful emails with instructions.

If you are interested, I can show you some aspects of Jaguar e.g. via a Skype session. Please contact me off-list.

Hello Udo.

Thank you very much. I am very happy to take you up on your offer.

I am busy with a few bits and pieces at the moment so, hopefully
tomorrow. I will write to you off-list.

Regards.

John

38844. insane mess on 269.75

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-03-06 10:57:23 UTC
From: Tim Bucknall
Topic: 38844 Message: 38844

maybe Jurgen will have more success figuring this out
signals are strong today and 269.75 has become a graveyard channel

this morning I noted:
R Filarmonia, Peru on centre freq
a fiery South American preacher (carrier outside the passband of the xp)
unid tv sound 269.735 military parade, phone ringing
2nd Latin American w/ ezl mx 269.75
more tv sound kids px
more tv sound cop show

then every so often the UsMilitary uses the satellite for its intended purpose and sends data bursts over the top of this mess

I can't even tell whether some of these signals are coming off the indian ocean sat or the Americas sat, 225-135 degrees is just a mess

the techno pirate is still on 256.95 btw

Speaking of band 1 TV - how many stations are still on air in the USA and Canada? Did they ALL disappear? I thought some remained.

What about the rest of the Americas? I guess Central and South America are still on air.

I hope to build a wideband antenna to cover 50 - 80 MHz. What would be the best pointers to look for TA openings now, other than relying on DX clusters?

Thanks

John

excellent question, the answer is: not a lot!

there are some radars in the 40-60mhz range, but probably not where
you need them to be
theres a Canadian one just above 6m

** Personal 'First'

Another thoroughly enjoyable Italian session! I really enjoyed doing the detective work on this one. At first, it seemed impossible to marry the transmitter sites to the stations. Whatever area of Italy was coming through was not one of the more traditionally received parts. After spending too long on one file, playing it through several times, I realised that it was central parts of Italy was receiving. Further files and reception of some of the more local stations in these provinces confirmed this, but lots of stations 'got away' thanks to the usual multiple transmitters per frequency scenario. Nice to hear provinces such as L'Aquila, Avellino, Caserta and Isernia. These are rarely heard.

Good DX!

Hi John,

> Unidentified/Unlisted:

> 88.3 1647 I UNID, ? 53A0

This must have been Radio Italianissima from Tiriolo/Monte Tiriolo (CZ). Recently there has been a program change for this QRG/location. Now this is Radio Ciak due mari. I would be interested in the story behind this rather unusual px name.

Hi Janpeter,

"ciak" in italian is a word coming from the lingo of cinema.
Is the name of the small table used by the director's assistant to announce to the actors and the crew, the starting of each shoot.

You can see in the link, a sticker made in the shape of a ciak:

Adesivi follia : Adesivo Murale ciak
http://www.adesivi-follia.it/a-adesivo-murale-ciak-6316.htm

http://www.adesivi-follia.it/a-adesivo-murale-ciak-6316.htm

Hi Janpeter,

"ciak" in italian is a word coming from the lingo of cinema.
Is the name of the small table used by the director's assistant to announce to the actors and the crew, the starting of each shoot.

You can see in the link, a sticker made in the shape of a ciak:

Adesivi follia : Adesivo Murale ciak

Adesivi follia : Adesivo Murale ciak

38865. 96.0 "ABCF" - mystery Es station from August 9th 2015

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-03-06 21:22:38 UTC
From: John Faulkner
Topic: 38865 Message: 38865

As the title says.

Here's a recording of the little bit of music I heard: 96.0 unid ABCF 0941 09-08-15 https://app.box.com/s/eqh05x07hzfr1ntwbe2ymi42f038vujg

I have played this over and over again. This is a genuine PI code. There was only a partial PS received - ??????__ No help whatsoever! But at least we know the last two characters are blank spaces.

Two other possible characters in the PS name might be HA or NA, as indicated in the RDS Spy Group Analyser.

Damla FM, Istanbul on 87.5 was logged at 0957, so I wonder if this might be a double hop somewhere. The music sounds more Balkan to me though.

Any help appreciated.

Thanks

John

Isn't modern technology wonderful? (when it works).

I "Shazammed" the music and found it!

https://www.youtube.com/watch?v=ybQKd1hlZoQ

It's Izadji na pet minuta by Sinan Sakic and it appears he is Serbian.

The style of music sounded just a bit 'further than Serbia. So possibly
a Serbian station.

good stuff!, you're on the way to dx-city now Pat!

256.95 techno pirate (Russia?) seems 24/7 now

269.75 R Filarmonia is very good in the european morning

I'm thinking & hoping that the weak signal skills i've learned for
ID'ing buried, weak or distorted fm broadcasts via satcom will one
day help with serious Band 2 dx
just learning to recognise certain languages at low signal levels is useful

theres also lots of video in the 251, 260-262 range, and trying to id
that has taught me some neat tricks that could be useful someday

For Canadian lowband analog TV check http://www.wtfda.org/canlbtv.html.
Most of those are very low power.

There are no full power lowband analogs in the US but there may be some analog translators and LPTVs left somewhere. These will not have to convert to digital until after the TV bands are repacked. Repacking will mean UHF channels 31-50 sold to wireless operators and stations on those channels either shut down or moved to hi-VHF or low-VHF. The US may end up with more DTV stations on lowband VHF in spite of the fact that almost nobody wanted low-VHF for DTV broadcasting here. Ironic how that worked out.

The only analog lowband TV DX worth looking for is in Central and South America.

38889. Two ID's from SATCOM

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-03-09 19:24:07 UTC
From: Németh Józsi
Topic: 38889 Message: 38889

Hello,

I recorded these ID's from SATCOM:

245.20 MHz NCG Radio Maria Nicaragua -
http://enjoe.ucoz.hu/_ld/3/396_unid.mp3

269.65 MHz PHL Radio iFM 93.9 Manila -
http://enjoe.ucoz.hu/_ld/3/398_269_65unid.mp3
Same Jingle from YT - https://youtu.be/Y8vxlCSDdos

regards,
Jozsi

38890. Re:: Pin information IC SC1923S

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-03-09 20:01:57 UTC
From: MIQUELNICOLAUA@...
Topic: 38598 Message: 38890

Yes. I think SC1923S is a clone SAA6579T

RDS Spy works SC1923S.with the pin number 11 (ground), 2 Data and 16 Clock

It is very difficult soldering because the integrated circuit SC1923S is super small in comparence with SAA6579T.

38891. Re: [SkywavesDX] 97.4

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-03-09 20:20:50 UTC
From: John Faulkner
Topic: 38886 Message: 38891

Excellent. I did not recognise the words at the beginning as a spoken
ID. I hear it now.

Many thanks Franco and good DX!

John

38893. The T-85

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-03-10 21:54:48 UTC
From: ilkka suni
Topic: 38893 Message: 38893

I finally joined the Yamaha T-85 Club, after having considered the matter for almost 30 years. And boy, do I feel clam.

Not so long ago, a fellow DXer sold his two pieces of the T-85, modified and equipped with narrow IF filters. Not willing to possibly take advantage of him, I just recently bought an unmodified one. I bet the original IF filters are by Toko [read = quality], have not popped the cover yet.

Now, is the T-85 a tuner. From the audiophile point of view, take for instance the Sony SA5ES... In audio quality the T-85 just beats the cheesy peas out of most rivals, the SA5ES for one. In fact, almost any of the late 70's to early 90's Yamaha tuners from their mid-range up, in sound quality beat most the market.

As I recently bought the Yamaha TX-950 RS, too, it almost feels unjustified to modify and ruin this beautiful piece of hifi gear, the T-85 is. Still, those of you having the T-85 [modified]:
is there any cons if I simply just replace the original IF filters?
Is there a chance, the CSL circuit starts giving problems, for instance?

Thank you.

73, ilkka

https://app.box.com/s/o3jyd173dj0xor0hwyfk3iv4flpksseb

I thought this was Swedish to begin with, but it is somehow different.
Maybe Danish, but even there it doesn't sound 100% Danish to my ears.
The mention of Dansk may give it away, but what is the station?

I hope the jingle gives an additional clue.

Thank you.

John

Hello,
It's a religious broadcast.
From 0:00 to 2:00 aprox, i can hear an preacher asking to many people about some "miraculous recovery". The preacher sends some thanks to Jesus Christ.
I'm trying identify the rest.
Saludos!

Hi Niels.

I heard this, but I did not think this was Danish. Maybe a strong regional accent? I thought it was Swedish at first, then I realised it was something else, but I went east from there, wondering about Estonian, though that sounds like a cross between Finnish and Russian to my ears. I guessed "Scandinavian", but did not think it was Denmark, in spite of the mentions of "Dansk".

Thank you.

Hi Hannu.

I am not disputing that this is Danish. Sometimes our ears and our brains can be confused by different things. I could guess the language.

I am almost done with my Es files from last year. I hear many languages. Over time I begin to feel that I can recognise some languages, perhaps most of the time. After listening to many files for the last few months, I now know that I can recognise very few languages. The number of languages I fee confident of being able to recognise if falling. I *think* I recognise Hungarian most of the time. I used to be fairly sure I could spot Polish too. Not any more. I get Polish, Romanian, Slovakian and some Balkan languages all mixed up.

I *think* I can differentiate between Austrian German and Germany German, but I would not like to bet my life on it. I used to be able to correctly differentiate between Swedish and Norwegian too, but my ears and my brain are changing - becoming more confused with each opening. So I would not dare to make statements about languages with any certainty anymore. I have confused Romanian with Portuguese. I have confused Spanish with Romanian too. Embarrassing?

I have a language recognition tape somewhere. The commentator tries to explain how to differentiate between Czech and Slovak, by looking for certain key words, etc. I will make a recording and upload it if I ever find it.

Thanks

John

Hi Jozsi,
I think your station is peruvian. There are several mentions of Perú, peruano, etc. and of Yunguyo.
At 02'12, the ID is "Desde la capital aymara del (mundo andino?) en transmisión... Qhaphiya Radio...".

if it helps anyone the one at 269.6465 is not Star FM , I-FM or Energy FM

I was briefly fooled by the fact that star fm and the unid were both
playing Vanessa Williams - save the best til last

will stay with it as long as I can, but a 2nd station is starting to
compete with it

Hi Mauricio,

Thank you very much! - I think it is correct!

Unfortunately, at the momenet thesteam is offline, but the radio signal
is fair, sometimes it is stereo. I listened an short ID: "Qhaphiya" :)

Muchas gracias!

Jozsi from Hungary

38928. 95.2 UNID Jingle via MS - German?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-03-18 10:13:05 UTC
From: John Faulkner
Topic: 38928 Message: 38928

95.2 unid jingle ID 1812 10-08-15
https://app.box.com/s/m2m1rtc4vtvmtx36kijndpp7fjxlykna

While checking Es files from 10th August last year, I hear a meteor burst which brought in a few German stations, including a vocal ID from Antenne Bayern on 94.6 from the 300 watt Inntal Oberaudorf transmitter. It sound like RF Eins. Could this be SRF Eins from Switzerland? Maybe somebody know this jingle.

Thanks

John

congratulations Jozsi!
Hungary obviously receives the African satellite much better than
Northern England does
for instance you had stereo on 260.012 when i can't even see the
stereo sub carriers on the spectral display

I had KBC on 261.4 (busy channel!) between 0200 and dawn, you might
get it better

I spent (wasted?) the last 2 days on the 269.6465 PHL unid, the signal
fades in after 10:30, peaks midday then slowly becomes worse
throughout the afternoon as co-channel interference increases

the ID sounds like "Easy FM" but theres no stn of that name

I had a look at my list of unids from the African satellite
Jozsi may be able to get proper audio and ID from these:

269.95 distorted off freq, severe qrm from US Mil (the EQU stn is qrt)
268.25
248.75

Hello Tim,

I am using RTL-SDR, a DVB-T dongle with home brew's bi-quad antenna and a preamplifier.

I can receive signal more frequencies, with strong co-channel interference, so impossible to identify them. This time on 269.65 are iFM and a classical music station too, on 269.75 I listen Radio Filarmonia, but when fading out the peruvian station, I can listen a french languages TV sound probably from Africa.

regards,
Jozsi from Hungary

Wow! Thank you for this Hannu. A great catch! Listed with 1kW too and a personal first via meteor scatter - in fact via any mode! I haven't heard Welle 1 anywhere before.

Agreed - the music was rubbish!

John

38937. Tropo Germany, Netherlands

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-03-19 20:45:23 UTC
From: nick gilly
Topic: 38937 Message: 38937

Some surprise tropo has turned up in the last half hour or so, e.g.
87.6 RTBF Classic 21 Léglise (v weak) + hr3 Sackpfeife (weak/fair mono)98.4 SWR 3 Hornisgrinde up to fully-quieting mono101.2 had Dutch ads a little earlier, probably Sky Radio Hilversum
101.4 Radio SAW Brocken up to fair mono104.3 hr4 Sackpfeife up to fully quieting mono SE England is up too e.g. BBC Essex 103.5.

Good DX.

Nick, Whitchurch, Hampshire.

38938. DAB Player - Log SNR Info window

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-03-19 21:05:37 UTC
From: Andy Pritchard
Topic: 38938 Message: 38938

Hi All

Does anyone know if its possible to get DAB Player to log the ensemble(s) it detects if you leave it on an empty channel using the 'Antenna alignment' function?

If not I think this would be a really useful feature as currently you have to constantly watch the SNR Info window to see if it detects an ensemble as propagation conditions change.

38940. Flightradar24 ruined?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-03-19 22:18:53 UTC
From: ilkka suni
Topic: 38940 Message: 38940

Sorry folks,

Did not pay attention to aircraft scatter for a few weeks. Last night then, while visiting my yard, spotted these linking blights in my western sky. Them jets of the night sky up in some 30...40.000 ft, quite seldom are visible to the eye.

Out of quriosity, opened the flightradar24. The new layout appears more of a disaster.

The site seems to been turned into just so full of gags. What I wished to find out, was the altitude of the very aircraft. Was it the browser I use, I could not gather either the altitude nor the speed of the DLH flight.

Anyways, happy hunting!

73, ilkka

Hi Dave. The tropo to the east isn't as good as I type although there is another lift to the north here with stations in the Midlands audible.
 Good DX.

Nick, Whitchurch, Hampshire.

Kenwood L-1000T, Yamaha T-2, Sony ST-SA5ES, Denon TU-800L, Kenwood KT-1100SD (modified), Yamaha T-85, Sony XDR-F1HD tuners, horizontal Körner 9.2 beam (Antennenland version), Yaesu G-450C rotator

38945. Are we sure this is Western Sahara on 88.1?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-03-20 15:46:01 UTC
From: John Faulkner
Topic: 38945 Message: 38945

Received at 1904 on August 10th 2015:

https://www.youtube.com/watch?v=rLOyjNdY_QE

As in the title ... could this be an unlisted transmitter in Morocco?

Interesting that it appears to be radiating a blank carrier, plus it has a high level of RDS data for the signal. Th carrier has quite a distinctive signature with visible subcarriers.

I also logged this in 2014 too.

Just want to be as certain as we can be that this is definitely Western Sahara. The transmitter is 3615 km from here and is very close to the Mauritanian border.

Thanks.

John

Hello!Not identification, I understand " a toda radio... lo que más suena... lo que más va a sonar.... a toda radio".
But, on 107.5 is Almansa FM with the next program:18:00 a 20:00 — A toda Radio con Jose Ibañez
Spain hour, I am not sure that is your station.
Almansa is a town in province of Albacete and not far from Murcia or Alicante.

Logged that one too on the 10th August 2015 but at 1717 UTC with full RDS. It was a pretty strong signal and I actually doubt it really originated from the Western Sahara. Morocco would be more likely in my honest opinion. I found an e-mail address from the technical department of SNRT last year and sent them a mail to clear things up, but no answer up until now ...

Thank you Marc and Edward.

On the Skywaves BB forum, Nick Gilly pointed out, and I hope you don't mind me quoting you here, Nick:

Again, checking the North African FM database, it would appear that your reception is from an unlisted Moroccan site John, as the MRC entry lists the PI code of 1001 as in your video. The AOE tx, Aw-Sard, is listed with a PI code of 1201.

So somebody is wrong:

FM List has Western Sahara 88.1 as SNRT Al Idaâ Al-Watania from Awsard=Aoussard, with PI 1001 and PS SNRT-NAT (SNRT-Nat), exactly as I received it.

So Mike Fallon's North African database lists the PI as 1201 for AOE? But I didn't have this one Nick.

Just how accurate is Mike's listing anyway? I'm not criticising Mike, nor questioning his list, particularly, but he has always refused to reveal the source of his information. How do we know this information is accurate? It clearly differs from FM List on this one, so who is correct?

John

For those registered in FMLIST, you can use the "History" button in the AOE 88.1 record.
This will show you that the data is there since many years, and looks like an ITU planned and coordinated record.
It has been impossible to get reliable info from official Morocco sources. It is certain that they have switched on many unlisted sites. On the other hand, this outlet has been received only via SpE: No tropo report from the Canaries, nothing from Southern Spain.
Perhaps co-channel signals do not allow to log it?
FWIW, 88.1 is listed as per FMLIST also here: http://www.snrt.ma/radio_frequences.php
What about a touristic trip to Morocco? It is a beautiful country!

73,
Günter

Thank you for the information Günter.

I'm more than happy with the accuracy of the information provided in FM List. It's just those new unlisted transmitters in Morocco which spring up, but I think we would have heard something from other DXers if it was believed that 88.1 SNRT Al Watania was from Morocco.

As far as is known, I assume this to be 100% AOE, but am also keeping an open mind and would be quite happy (if slightly disappointed) to accept any future correction that this is, in fact, Morocco.

As for a sightseeing trip to Morocco? Well, it would be way too hot for me ;-) but a nice idea. We're hoping for Cornwall later in the year. Perhaps a continental trip in 2017 with a little luck.

The truth is out there!

John

Got it!

The quirks of using RDS Spy! Why is it that the PI and partial PS
manage to appear one day, but not another?

This station is Onda Llana (Megaéxitos) from Llanos del Caudillo
(Murcia). The PI appeared as FFFF and a partial PS of ONDLLA?? (should
be ONDLLANA)

I was tempted to log as Almansa FM as it made sense, kind of, but I am
glad I didn't. A very good suggestion though!

Thanks again.

Hello folks,

Last November brought some decent tropo from the the continent, and in SW Norway also from Great Britain.
My dx-colleague Arvid Frøsland from Borhaug had one decent opening to Scotland - moving down to England on Nov. 1.

A very interesting -yet very UNID - station came up on 96.5 MHz. We need some good Englishspeaking ears on this one, which perhaps is narrowed down to the Blackpool station ? Please have a listen, and comment.

Two interesting loggings are those of Capital FM on 103.1 MJz (IDed), and the // received on 104.6 MHz (!).
Any ideas about these unlisted Capital FM relays ? 104.6 ought to be BBC only ?

Arvid (1 & 2) would both appreciate Your comments :)

I love a good mystery!
possibilities for 104.6

cable leakage
accidentally relaying wrong feed due to tropo
ie: if BBC Suffolk was fed off 95.9 it could receive Capital from
Thanet by accident

spurious- like that short lived Essex spur Dave found

sdr image, what rx does Arvid Frøsland use?

No question, it's splatter from TFM from Bilsdale on 96.6 with a promotion for "The Top 10 at 10 ... What's the year?", a quiz where you guess the year after listening to the old top 10 songs.

38966. BFBS Bielefeld still on 103.0?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-03-22 11:16:30 UTC
From: John Faulkner
Topic: 38966 Message: 38966

I heard recently that BFBS had closed on 103.0 and that N-Joy had replaced them. Listening to scatter here I still hear BFBS. Does anybody know more? Have they moved to a new transmitter? Or is everything unchanged?

Thanks.

John

38970. UNID German 104.5

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-03-23 01:05:06 UTC
From: John Faulkner
Topic: 38970 Message: 38970

Quite an interesting one, this, but a very, very weak signal and I had to go narrow to avoid splatter from local BBC Radio Norfolk on 104.4.

Based on the conditions, I can probably narrow this down to one of two stations. If this is what I think it might be, it would be a great catch. Conditions were the best I have heard to the Nordrhein-Westfalen region of Germany. I had forgotten about this tropo, the files of which were tucked away with the last day of my Es files. (Yes - I've finally completed my 2015 Es files! I will post loggings shortly.) So, the recording:

104.5 UNID German 0459 08-08-15
https://app.box.com/s/dqn4rleavwqc0h01uev3onz38femjypv

Headphones definitely needed. Unfortunately, it might just be too weak / not enough info available to nail this.

I have the full SDR file if anybody wishes to have it.

Thank you.

John

Hello John,

Probably Radio 21 from Leer Germany - at 17 seconds the male says:
Es geht nach Norderney mit der Fähre um 9 Uhr.
Norderey is one of the Northsea Island in Northern Germany.

Translated as The ferry is going to Norderney at nine o'clock.

I think we can rule out NDR 1 Welle Nord.

Thank you John.

/Already answered directly due to delays in the Yahoo system.

/For the record, my hope was that this was Campus FM from Duisberg, but
the information heard does indeed suggest that this is Radio 21 from Leer.

Good DX!

John

Thanks Tim.

Hoping to get through the rest of these old files today. I'm half expecting to uncover one or two more good catches. Conditions were quite stunning. It's my birthday today too (no - don't wish me happy birthday, please! Too old for that now ;O) so I am having a relaxing day playing radio.

Cheers!

John

Hello John,

Probably Radio 21 from Leer, Northern Germany,
The presenter says at 16 secs.
"Es geht nach Norderney mit der Fähre um 9 Uhr"
The ferry is going to Norderney at nine o'clock.

Norderney is one of the Northsea Island and there is a ferry sailing
from Emden (near to Leer) to this Island.

I think we therefore can rule out NDR 1 Welle Nord.

Hello Jozsi,
I don't think you understood me.
The language is Thai, from Thailand.
I hear "Luukthung" and "LTS FM".
Station lists for Thailand are incomplete and I can't find this station listed.
Please record in mono, the stereo noise is distracting.

Regards

Peter

Hello Peter,

Thank you very much! - with your help I could identify the station. It
is MCOT Radio Network Luk Thung Maha Nakorn FM 95 (LTM FM 95) from Bangkok.

Radio jingle on YT: https://youtu.be/2rzjLTxAgjk

regards,
Jozsi

107.1 with arabic language.
I am not sure if is Radio Setif from ALG.
Radio Setif only has 100 W and I think is not possible.

You can download the SDR file in
https://www.wetransfer.com/downloads/844c117eceb7d88dcdef16d8b880ef8120160325151610/3c530f6ec48eb141952f5ae7e7c9e2cf20160325151610/114d7d
or http://we.tl/ry2pd8UKgR

38996. Moldavian HD-Radio

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-03-27 00:06:00 UTC
From: Leo Barmaleo
Topic: 38996 Message: 38996

Radio Moldova plans to deploy HD pilot broadcasting in Chisinau by the end of the year. The exact channel aint clear but the existing Chisinau relay of Radio Moldova Actualitati on 94,0 MHz seems the most likely candidate...

38997. 107,7 MHz - unlisted EiTB Musika stn

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-03-28 20:23:25 UTC
From: Arvid Frøsland
Topic: 38997 Message: 38997

Hi all

On the 21st of June last year quite a few loggings from the Basque provinces were made at my QTH in the southernmost part of Norway.

On 107,7 MHZ I had a station with PS=EiTB____ and PI=E304. There is no such entry in the FM-LIST, but the EiTB webpage

http://www.eitb.eus/eu/irratia/eitb-musika/frekuentziak/

states that there is a transmitter in Navarra (Malerreka/Lesaka) on this frequency.

Could I presume that what I logged is the Lesaka transmitter?

Thanks.

Arvid Frøsland

Hello Arvid,
Let me to investigate about this and found a response for you.
After that, i must to fix the entry in FMLIST.
Regards.

** Personal 'First'

Another thoroughly enjoyable Italian session! I really enjoyed doing the detective work on this one. At first, it seemed impossible to marry the transmitter sites to the stations. Whatever area of Italy was coming through was not one of the more traditionally received parts. After spending too long on one file, playing it through several times, I realised that it was central parts of Italy was receiving. Further files and reception of some of the more local stations in these provinces confirmed this, but lots of stations 'got away' thanks to the usual multiple transmitters per frequency scenario. Nice to hear provinces such as L'Aquila, Avellino, Caserta and Isernia. These are rarely heard.

Good DX!

Topic: 39003 Message: 39003

At last, I have completed and posted all logs from last year's sporadic E season.

My plan was to listen to a minimum of three Elad files per day and complete all files by April 1st. I managed to check more than three on some days and and so got slightly ahead, finishing everything on March 22nd. Finally, time to post the last logs today, but not without my poor brain cell getting totally confused over dates and duplicate logs, even managing to accidentally delete other logs in the process, which I thought I had duplicated (on my blog and the php forum). Did that make any sense at all? Probably not.

This has all been too much and I don't plan to make as many recordings this coming season. I have less time than I did one year ago and I expect there will be longer delays posting logs. Not ideal but this is how I will have to enjoy the hobby in future.

I do not recommend anybody try this excessive recording lark as it is highly stressful at times. Yet I have been able to enjoy one of the most eye-opening E seasons as a result. Lots of double hop. Lots of loggings (just short of 8000) and some great catches and recordings. It's all fine if you have lots of spare time on your hands.

I don't know what order Yahoo thinks it will post these logs, but some have already gone out of synch and the last five may have even been lost! They haven't appeared here yet.

I don't think I can be bothered to keep posting my logs in triplicate, as I have been. Simplification is needed.

John

Hello Tim,

> I had KBC on 261.4 (busy channel!) between 0200 and dawn, you might get it better

I listen to this frequency, but usually I can receive strong noise (may be data communication). Yesterday morning I received a weak FM signal, a pop music station. At O'clock the station give news firstly in a strange languages, next in english. Then I listen to an ID: 'Radio One - FM ninety'

http://enjoe.ucoz.hu/_ld/4/412_261_4_radio_one.mp3

I found this on web: http://radioonefm90.com/ - I listen to web stream, I heard same ID - this is One FM from Uganda.

regards,
Jozsi from Hungary

brilliant!
i'll listen at 01:00
If they ever mention "UBC" I could have misheard that as KBC

if not I may have heard a different station

(261.4 has already produced Thailand, Indonesia and an Unid latin American!)

249.925 unid via 13.2 east 0526ut 29/3
262.6 unid, low mod Spanish via 23.3 west 0540ut 29/3

265.35 //265.45 Latin American via 23.3 west 0550 29/3

243.92 unid via 70 east 1400 28/3 v poor
all the transponders in this range have 5khz b/w but it seems that
a cluster of them together can act like a single wider transponder

French radio, I assume from Lille, coming through intermittently at 103.7fm in Slough, and the usual suspect at 98fm.

As I type, 103.7fm firming up.

Regards

Tim Arnold

39019. Sky Radio 101.2 Hilversum on mixed pol?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-04-04 18:47:54 UTC
From: nick gilly
Topic: 39019 Message: 39019

Hi all. Can any of our Dutch members shed any light on this please? For the last few days I have been receiving Sky Radio Hilversum on 101.2 via scatter, occasionally peaking up to 1 bar. This is not normal, so I wonder, has the TX been changed to mixed polarisation? FMLIST has it listed as 199.5 kW vertical but in the Remarks section it says ITU: 200 kW Mixed. Why the two different bits of info, and does this mean it is now on the latter configuration?
Thanks and good DX.
Nick, Whitchurch, Hampshire.

Interesting, Nick.

I will sit on that freq for a bit and see if it comes up. Can only get Holland under very good conditions here due to horizontal antenna.

39024. FM Bandscan: Vera (Almeria), Spain: March 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-04-05 14:12:44 UTC
From: Grant Williams
Topic: 39024 Message: 39024

Hello/Hola!

Updated FM bandscan from Southeast Spain.

* This lists stations heard during the past month (excluding one-off DX)
* Station names sourced from listening or RDS
* Station locations sourced from listening or RDS or the AER database at http://www.fmlist.org/aer_fm.php?smode=S or Mike Fallon's North African database at http://www.ukdx.org.uk/fm/FreqOrder.htm
* Station RDS sourced from observations.

Good tropo conditions at the beginning and end of the month over the West Med brought excellent reception of Algerian stations, but overland routes were little impacted. Confrides in Valencia (212km away) only reached stereo signal level on 88.6 on a couple of days, whereas Chrea in Algeria (432km) was audible on 88.4 in RDS stereo several days in March.

Yours/Saludos,
Grant

39025. Update FMLIST vs. OFCOM

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-04-06 15:41:47 UTC
From: Günter Lorenz (FMLIST)
Topic: 39025 Message: 39025

98.80 Castle FM, Leith (North Edinburgh), has been dropped from the current OFCOM VHF file. According to their website, they are still on air. Can anyone confirm ?

"Radio Sunlight (Kent) is no longer broadcasting on FM but will continue as an internet station. http://icecast.commedia.org.uk:8000/sunlight.mp3" (reported on 24 Feb via their FB page, in fact dropped from OFCOM file).

Also, 5 BBC FM frequencies each for Dunkeld (SC-PEK) and Tomatin (SC-HIL) have been dropped from the OFCOM file.
They had appeared in an OFCOM file in April 2015 - what's happened there?

And here are the additions:
87.7 Barleylands Craft Village Moonbeamers Drive-in

89.1 Birmingham/Victor Tower EN-WMD Big City Radio (moved to new location)
89.3 Belfast/Europa Hotel NI-ANT Belfast FM
97.5 Newport EN-SHP Nova FM
100.2 Portadown ABC FM
101.8 Uttoxeter High Peak Radio/Ashbourne Radio

39026. SDR# on SDRplay RSP and RDS Spy

Yahoo group: SkywavesDX (2016 — 2017)

Hi guys,

I bought a SDRlay RSP last week and it's working nicely with SDR Console V2 and V3, Studio 1.
RDS decoding is a good (or bad?) as with a Perseus. Marc Vissers told me I should get SDR# and hook it up
to RDSspy. RDS decoding is said to be superior. SDR# runs nicely but no luck in connecting RDSspy.

I tried this: Tutorial: Using RDS Spy with the SDR# mpx output plug-in
https://www.youtube.com/watch?v=M7Luz7mhHI8&feature=youtu.be

Hello Herman,
I can't see your screenshots. I am pe1etr ☐
As far as I know sdrplay doesn't work with the later versions of sdr#. If you are using an older version of sdr#, you also need an older version of the mpx plugin by Vasili.

Hello Herman,
I read messages on the yahoo groups site and your screenshot isn't visible.

If you go to rtl-sdr.ru and scroll back a few pages, you'll find the appropiate version, or send an e. Mail direct to me and I'll send you the correct version if I have it.
(Tell me which version of sdr# you have)
Peter

Hi Günter. I have some news regarding the community station, Castle FM, in Edinburgh, courtesy of Dave Kenny at BDXC-UK/Communication.

The station has closed on FM and surrendered their licence, according to OFCOM's February radio licensing update. However, it carries on as an online station and has made no mention of its FM frequency being closed, either on its own website or Facebook page (I've just checked the Facebook page and they are still advertising 98.8). Its logo still shows 98.8. Dave adds that the station has had a troubled history - it was found to be in breach of its licensing conditions and has had an unauthorised FM transmitter closed by OFCOM in 2014.

Hello All,

I have some new record of receiving via SATCOM.

252.625 MHz - commercial station in italian languages (advert and italian pop)

http://enjoe.ucoz.hu/_ld/4/417_252_625u2nr.mp3 - (noisy with a bit distortion)
http://enjoe.ucoz.hu/_ld/4/414_252_625unr.mp3 - (noisy with a bit distortion)

254.5 MHz - speaking station (far east)

http://enjoe.ucoz.hu/_ld/4/413_254_5.mp3 - (hard distortion)

255.755 MHz - islamic prayer and speaking station

http://enjoe.ucoz.hu/_ld/4/416_255_755.mp3 - (hard distortion)

260.9 MHz - other islamic prayer and speaking station (islamic prayer at all night)

http://enjoe.ucoz.hu/_ld/4/415_260_9nr.mp3 - (noisy)

regards,
Jozsi from Hungary

Hi Jozsi,

252.625
first recording is in Portuguese, better Brazilian Portoguese, with lot of advs and phone numbers, generally beginning with 988, so Maranhao area? I haven't heard any ID, even if there some "Clube" and "Alvorada" in the talk, but my knowledge of the language is poor.

The second one is Brazilian as well! Maybe at the end there is a jingle ID, but I'm not able to understand it.

I think you need some Brazilian ears to identify the station.

Hello Alessandro,

Many thanks! - this did not sure for me, that is italian languages, but
I heard many italian pop and disco music on it.

regards,
Jozsi

Most of what I receive on the Satcom frequencies is from Brazil, with the exception of a Russian station on 256.950. There was also that station from Paraguay (ABC 730AM, heard the ID during a recording) but either I cannot get the signal anymore or it has gone off the air. I had a message on Youtube informing me of a couple of Italian based frequencies, although I have not heard anything from there yet. Still keeping my ears open for that one.

sleeper77, Southampton.

i just had a thought
this band is allocated to Land Mobile in Brazil
so 252.625 (293.625) may be a harmonic!

could 255.755 be the stereo subcarrier from 255.775v Pakistan?

I've noticed that some transponders are absent somedays,
is satcome dying of old age or can they be switched off from the ground?

257.6 was off on 4th April but back the next day,
the transponder is basically useless for the military anyway as its
relaying a Latin American oldies station!

From: Miquel Nicolau Amer
Topic: 39044 Message: 39044

There are new stations in Algeria.

103.5
107.1

We have listened with a strong signal in Majorca (Spain) with not a
strong tropo.

I send a file for SDR in
https://www.wetransfer.com/downloads/620147622c4c22e61757e1a9474fb3f520160411121810/975cdd
and
https://www.wetransfer.com/downloads/620147622c4c22e61757e1a9474fb3f520160411121810/f90a79
b7b2b5a740da5cb563bea24a2220160411121810/09097a

I thinked 107.1 was Radio Setif but not // in 90.4

I listened 89.9 Radio Jijel in Majorca and I think is not possible 30 W

Good DX

39045. More new RDS from ALG

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-04-12 19:37:51 UTC
From: Miquel Nicolau Amer
Topic: 39045 Message: 39045

96.7 Chaîne 2 Meghriss with RDS . PS: CHAINE 2

107.1 Radio Inter ????? PI: 2205 PS: R.INTER_ RT: Vous ecoutez la Radio Algerie Internationale AF: 107,1 MHz, 104,3 MHz, (Filler)

This 107.1 asnwers my email from yesterday when I wrote "I thinked 107.1 was Radio Setif but not // in 90.4"

39046. Two new stations in ALG

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-04-14 18:30:20 UTC
From: Miquel Nicolau Amer
Topic: 39046 Message: 39046

I tuned in 91.8 Chaine 2 Akfadou. But also there is another station in 91.8 at 17:30 connect with Chaine 2 for about one minute. There are two stations Chaine 2 I know for the directivity of the station and because one station was delayed the audio one second.
After one station has followed different programming mixing Arabic and French. It must be a new station

In 103.5 heard for the first time Radio Multi-Chaines

Sorry for my bad English.

My logs from today with a weak tropo.

Hola Miquel,

Thank you for keeping track of all those changes in Algeria, this will help us up further north in Europe when in a couple of weeks the Es will start.

Regarding Radio Multi-Chaines, this seems to be a new network. The tx on 103.5 MHz probably is Meghriss.

73, Janpeter

Hi All,
Every the optimist (or glutton for punishment ?) I have put the Band I antenna back up. First thing I notice is the complete absense of any MS signals. Previously there was a constant stream of MS pings on R1 at this location. I assume that this is due to all the easy MS targets being shut down. Thought I might still get Lviv Ukraine though ?

Any of our friends on the continent confirm that there are still some receivable MS stations ?

Best Regards

39052. ANNOUNCEMENT: Skywaves Live VHFDX Chatroom

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-04-16 13:56:09 UTC
From: Jim Smith G0OFE
Topic: 39052 Message: 39052

Hello all,

In recent years, a number of us have used Skype messenger as a live "talkback" chat before/during openings. This has proved very useful.

Skype has its issues, however, so we toyed with the idea of using a web-based chat to try and get more members easily involved, and we have come up with using Google Hangouts.

The first chat we are starting is dedicated to VHF/OIRT and Band 2, as the Es season is just about to get underway.

A MW chat may well follow in the future.

The link is: <https://hangouts.google.com/> https://hangouts.google.com/

You will need a Google account if you don't already have one.

Once in Hangouts, search for Skegnessdx (John F) or radioredcat (Andy) or post your Google account name on this thread (or to me privately if you prefer) and one of us can add you to the chat.

In the Skywaves chat, we request that you keep the live chat radio-related and on topic.
The use of bad language should also be avoided.

Please do not use it to wind up or antagonize other users - if someone is annoying you then please block that user - (you have the ability to do that).

Enjoy!

Hi all

On the 21st of June last year quite a few loggings from the Basque provinces were made at my QTH in the southernmost part of Norway.

On 107,7 MHZ I had a station with PS=EiTB____ and PI=E304. There is no such entry in the FM-LIST, but the EiTB webpage

http://www.eitb.eus/eu/irratia/eitb-musika/frekuentziak/

states that there is a transmitter in Navarra (Malerreka/Lesaka) on this frequency.

Could I presume that what I logged is the Lesaka transmitter?

Thanks.

Arvid Frøsland

Oh Arvid!!.
Sorry, i forget to tell you about the new entry in FMLIST. Was added some days ago and yes, Pi-code is E304.
Thanks.

Thank you Usman.

My antenna was beamed towards 120 degrees so I had not expected Morocco
to come through so clearly when it's 90 degrees off-beam, but it's
certainly not impossible.

Best wishes.

John

Absolutely Usman, but I don't want you to think your help was not
appreciated. It certainly was!

You may well be right on 90.7, but I don't know if I have enough
evidence to support this being Morocco. If you heard an ID in there then
that's fine. Without an ID or some good proof then the log goes in the bin.

Thank you again and best regards.

John

Hi Mohammad
they're not audio files, they're spectrum file
you need a free programme like
http://www.hdsdr.de/ to play them

all the best

respected sir,thank you for replying as i have recently installed the
program as your requirement but unfortunately it plays only wav files, so
is there any other option in this software i'll be waiting

You'll need Monkey's Audio to decompress .ape files.

Monkey's Audio is a .wav file compression tool which reduces file sizes
by around 40-50%.

http://www.monkeysaudio.com/

John

Excellent logs for so early in the season Tim :-)
Have you ever had BLR on Band 2?
 Good DX.

Nick, Whitchurch, Hampshire.

Kenwood L-1000T, Yamaha T-2, Sony ST-SA5ES, Denon TU-800L, Kenwood KT-1100SD (modified), Yamaha T-85, Sony XDR-F1HD tuners, horizontal Körner 9.2 beam (Antennenland version), Yaesu G-450C rotator

thanks Nick :-)
yes, last summer
the details escape me but 103.5 & 102.3 ring a bell
it was the far west, Brest, Grodno etc

From: Jim Smith G0OFE
Topic: 39086 Message: 39086

Hello all,

On checking a couple of the Algeria streams, a lot of them seem to be no longer working (for me, at least)

There is a new page - http://www.algerie-radio.com/ where all the stations appear to be listed with the streams and all seem to be fine.

I am adding the individual streams to FMList as and when, to aid in quick IDs when the Es season properly gets underway.

A reminder that Algeria now has RDS, so hopefully streams won't be needed ;)
I got 88.4MHz Chaine 3 with a PI on 3rd Jan, and as we have read on here, most ALG stns now have RDS.

Hi Peter

Just wanted to clarify ... To date, only a tiny number of tx's in Algeria have RDS PI, based on listening from here in SE Spain. So we are likely still many years away from being able to ID solely from RDS. Some of the most powerful Algeria FM tx's arrive here in noise-free stereo during regular tropo with no RDS. So 88.4 Chrea is (sadly) the exception, rather than the rule!

Yours,
Grant

In addition, not all openings will produce RDS, and it will take a while to properly populate FMList with PI and PS codes.

Streams will continue to have a big part to play with ALG.

I have managed perfectly well in previous Es seasons to identify Algerian stations without using web streams, but each to his own.

I was only pointing out that Algeria now has RDS. It only needs one station of a particular network to be received with RDS, then the others can be ID'ed by being in parallel.

Hello Grant,
I was also trying to be helpful by pointing out that Algeria now has RDS.

I did not mean every single frequency on every transmitter has RDS. I meant most networks.

There are certainly more than two stations in Algeria with RDS, receivable in SE Spain with RDS. Miquel has received more than that in Majorca. You must have been unlucky. :-)

There are a number of suggestions and it comes down to what you can manage to get into the air, and whether you can build it yourself or buy it.
My personal summary is:
The Korner 9.2 comes first - but needs a good strong mount
The 5 ele compact yagi comes second - it has a much lower wind load. It has a lot lower f/b than the 9.2 but still better the standard 5 element commercial aerials.
Both of these can be purchased commercially. The 5 ele compact can be bought from HS Publications but has half inch elements - K6STI's design is for 3/8th. I actually built one with half-inch elements and am more than pleased with it's performance. F/B ratio is a lot better than a 'standard' 5 ele.

Brian K6STI has published a design for a 5-ele log yagi - it has a lower gain than the compact 5 ele yagi - especially at the top of the band, but has a higher front/back and front to rear rejection. I considering making one but construction is a bit more involved.

When you look at the relatively high cost of the some aerials compared to what you buy as a FM broadcast band remember 1) they aren't mass produced 2) try buying the materials yourself - my bill of materials for the compact 5-ele came to £57 after paying post and packing on various orders. It then took a significant amount of time to make it - but the end result was a great deal of satisfaction.

Regards

David

Hi dave
Thanks for the info on that, I think I will have to buy one, as for making one I would not know where to start, sounds to completed, do you know anything about blake fm aerials are they any good at all? because my small 4 element is a blake style aerial but there is loss from about 97 to 104mhz, just thought maybe 5 or 6 element would be better.
thanks again
from paul

From: Janpeter van Dijk
Topic: 38927 Message: 39109

Hi All,

That must have been the weirdest Band II sporadic E opening I have ever been in. Listening to lovely Greek DX coming in on many frequencies, while looking outside to see snow falling. Rather odd what nature is pulling together. Oh well, today saw a record breaking high of 19 °C in Greenland. At least the warm weather is hanging out somewhere :-)

Above average Es activity this early in the DX season. There are no guarantees for the weeks and months ahead though.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

39129. 106.9 34CA ????sk??

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-04 23:34:45 UTC
From: John Faulkner
Topic: 39129 Message: 39129

Does anybody know which station carries the PI 34CA on 106.9? There was a partial PS of ????sk??. This was received this morning via meteor scatter.

The PS might suggest Radio Eska from Radom, but the PI code is closer to that of PR Radio Pomorza I Kujaw from Brodnica (34CB).

Thanks.

John

Hi John,

34CA on 106.9 MHz belongs to PR Radio Pomorza i Kujaw from Brodnica. The full PS should be this: RadioPiK Brodnica 106,9_FM __(52)__ 3455060_ 3455090_

73, Janpeter

39132. Crete or Spain 107.0 ??

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-05 12:12:27 UTC
From: notmyregularemailaddress@...
Topic: 39132 Message: 39132

My earlier messages to Yahoo groups still haven't arrived. VERY slow today.

I just had a PI code of 30C6 on 107.0 during an opening to Spain. I entered the code and the only station which appeared was Radio Melody from Khania in Crete at 2900 km.

The signal was only a blank carrier. My antenna was vertical at the time.

I assumed this must have been Crete, but I only heard Spain elsewhere on the band and there were no appropriately placed Es clouds on the map.

I wonder now if I had Spain. Perhaps somebody can throw some light on this.

Hopefully this message gets through more quickly as I am posting directly within the Yahoo Groups page.

Thanks

John

39136. Band II Sporadic E Loggings for 5 May 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-05 19:43:15 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 39136

Hi All,

Today featured the first Band II Es opening of the season into Spain and Portugal. A decent opening too, with the MUF reaching out to the top of the band. Some unusual areas in Spain could be received. Several stations that were audible are more common with tropo than with Es.
A good start to the DX season!

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

** Personal First

(Yahoo is useless today. Test posts to myself appear instantly. There are still posts I made this morning which haven't appeared)

I thought I'd start the day looking at Dutch scatter. Some of this is better than I've received it before which makes me wonder if some of the Dutch transmitters have been changed, either by power increases or other improvements. Or maybe it's just a case of the scatter being better lately.

The amount of meteor scatter came as a surprise. The Eta Aquarides are possibly to blame for this, even though they are supposed to be a southern hemisphere shower. Some of them must have siplled over into the northern hemisphere.

Yet more early season Es and a few firsts.

Good DX!

Subject: [SkywavesDX] Crete or Spain 107.0 ??

My earlier messages to Yahoo groups still haven't arrived. VERY slow today.

I just had a PI code of 30C6 on 107.0 during an opening to Spain. I entered the code and the only station which appeared was Radio Melody from Khania in Crete at 2900 km.

The signal was only a blank carrier. My antenna was vertical at the time.

I assumed this must have been Crete, but I only heard Spain elsewhere on the band and there were no appropriately placed Es clouds on the map.

I wonder now if I had Spain. Perhaps somebody can throw some light on this.

Hopefully this message gets through more quickly as I am posting directly within the Yahoo Groups page.

Thanks

John

Hello Simon.

I got the PI after entering it into FM List on 107.0.

I don't know if you use FM List ... www.fmlist.org http://www.fmlist.org

You'll need to select the "ES (n)" option for stations of double-hop distance. Or just select "All".

Alternatively, on the FM List login page, just type the PI code 30C6 in the PI code search box.

I am not convinced this was Crete. It is more likely that Spain was received.

I am hoping one of our people in Spain has the answer.

John

39142. Sporadic E Log 5th May 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-06 06:48:39 UTC
From: Jim Smith G0OFE
Topic: 39142 Message: 39142

Interesting start to the season - on the evening of the 4th I logged a station on 50Mhz on the eastern edge of Ukraine some 2850km distant - unusual so early in the season.

Then yesterday, short opening to Algeria followed shortly afterwards by an opening to central and southern France. The Es cloud was quite close to here so I am suspecting some tilting of the cloud or something. Prop was as short as under 800km but there was little else!

** Personal First

I thought I'd start the day looking at Dutch scatter. Some of this is
better than I've received it before which makes me wonder if some of the
Dutch transmitters have been changed, either by power increases or other
improvements. Or maybe it's just a case of the scatter being better lately.

The amount of meteor scatter came as a surprise. The Eta Aquarides are
possibly to blame for this, even though they are supposed to be a
southern hemisphere shower. Some of them must have siplled over into the
northern hemisphere.

Yet more early season Es and a few firsts.

Good DX!

John Faulkner

Vimeo Channel: https://vimeo.com/skegnessdx

Receivers:
Elad FDM-S2 (Meteor Scatter and sporadic E)
Sony XDR-F1HD with Konrad i2c mod. (Tropo/Scatter)

Aerials:
Körner 9.2 @ 5.5 metres agl. QTH is approximately 3 metres asl, 1km from
the sea.
Fringe Electronics 20dB pre-amp.

Software:
Elad FDM-SW2, SDR Console File Analyser & RDS Spy via VAC.
XDR-GTK v0.3.1 for the Sony XDR-F1HD

Rotator:
Yaesu G-5500 azimuth & elevation rotator, allowing antenna to be vertical, horizontal, etc.

39144. FM List Prop Mode Issue - Oxford via MS

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-05 10:25:00 UTC
From: John Faulkner
Topic: 39144 Message: 39144

I received BBC R4 from Oxford on 93.9 via meteor scatter this morning -
I'll upload the file later to prove this.

Problem is, FM List won't allow me to log this as MS and automatically
selects Tropo. It's logical, I know. Maybe a bug?? Or is the propagation
mode always going to be automatically selected now?

Thanks

John

Hi John,

How can you be sure the MS was from Oxford TX? Could it not have been from a more distant UK TX?

Chris.

Hi Chris.

I was going on the assumption that Oxford was the only transmitter on the frequency with any reasonable power. All the other transmitters are flea powered.

Either way you look at this, it's an incredibly short distance for meteor scatter, but not my shortest. Holme Moss has also been received via MS. It's some form of meteor backscatter I was told. The same works for sporadic E. Signals can be received at much shorter ranges than you might expect during intense ionisation.

Holland was also received via meteor scatter yesterday.

Let's hope posts are a bit quicker today.

Cheers.

John.

Thanks John,

I've learnt something new now.

73,

Chris. (Lincoln, UK).

PS. Yahoo! seems to have improved a lot lately. Having just said that, it may go haywire again. Let's hope not!

39149. Army FM, Ukraine! 258.2mhz now

39155. FMLIST: Suggestion - Option to turn off real time logging?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-05 19:12:31 UTC
From: Jim Smith G0OFE
Topic: 39155 Message: 39155

Hello everyone,

After (yet again!) accidentally real-time logging earlier logs written down a couple of hours previously, an idea occurred to me.

There could be a user tick-box option to either log the current time, or leave it blank so you have to enter the time manually.

If you try to log with the time blank, an error box (in a similar manner to if you don't select a propagation mode) comes up asking you to enter a time.

So.. if you are logging after an event, you disable real-time to save you accidentally logging the time that you put it in, rather than the time of the opening - this would also prevent false alerts to others.

How easy would it to be to add this option to the site?

39158. AW: [SkywavesDX] FM List Prop Mode Issue - Oxford via MS

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-06 08:16:27 UTC
From: Günter Lorenz (FMLIST)
Topic: 39144 Message: 39158

> I received BBC R4 from Oxford on 93.9 via meteor scatter this morning -
> I'll upload the file later to prove this.

I have no idea how MS at 182 km distance works. I'd assume that the reflecting material/gases would have to be as low as 10 km above ground.
As there are other R4 tx in greater distance, it might have been one of them.

> Problem is, FM List won't allow me to log this as MS and automatically
> selects Tropo. It's logical, I know. Maybe a bug?? Or is the propagation
> mode always going to be automatically selected now?

Apart from that, there is indeed a line of code in FMLIST which converts all logs at distances < 200 km to tropo. This was introduced to avoid erroneous Es alerts.
A log's propagation can be edited in the logbook, so the listener has the final decision on the prop mode.

Günter

Thank you for this Günter.

I wasn't able to edit the propagation mode at the time, but I can now.
Good idea to introduce the auto-mode logging.

Short MS is unusual. I wouldn't have a clue how this works, but the
other BBC Radio 4 transmitters on 93.9 seemed too low power for the
strength of the signal received.

Thanks.

John

This would be a great idea.

Hopefully it would be 'switchable' so we still have the option for logging with automated current time/date.

I think I must be the biggest culprit for entering old loggings with the current time and date. I try not to do it, but I managed to do this FIVE times with the morning's Es recordings. You'd think I'd learn after doing it once or twice.

No, definitely meteor scatter.

The burst lasted only a second and all frequencies in the range were affected. There's a very clear difference between meteor scatter and aircraft/tropo scatter.

This is an example of very short meteor scatter which I caught during the early hours of this morning. It's clearly BBC Radio 4 and there are three transmitters on this frequency:

Holme Moss - 250 kW at 151 km
Bristol - 1.3 kW at 277 km
Rhymney - 20 watts at 290 km

Other short-range transmitters were also received at this time. Wenvoe on 94.3 for instance with the same signal strength.

Could this really be Holme Moss on some kind of meteor backscatter?

Thank you for this Günter.

I wasn't able to edit the propagation mode at the time, but I can now. Good idea to introduce the auto-mode logging.

Short MS is unusual. I wouldn't have a clue how this works, but the other BBC Radio 4 transmitters on 93.9 seemed too low power for the strength of the signal received.

Thanks.

John

I have no idea how MS at 182 km distance works. I'd assume that the reflecting material/gases would have to be as low as 10 km above ground.
As there are other R4 tx in greater distance, it might have been one of them.

> Problem is, FM List won't allow me to log this as MS and automatically

Apart from that, there is indeed a line of code in FMLIST which converts all logs at distances < 200 km to tropo. This was introduced to avoid erroneous Es alerts.
A log's propagation can be edited in the logbook, so the listener has the final decision on the prop mode.

Curious. I've never heard aircraft scatter sound like this. Have you Andy?

With aircraft scatter, you hear the build-up, then the peak, then the fading away. There's usually a cycle of fading which is very distinctive.

This is a clear example of MS, but I wondered if you might have been thinking this was aircraft scatter because of the underlying Holme Moss signal which was present throughout the video. The video was deliberately kept as short as possible due to the enormous time it took me to upload it when we had our slower (regularly failing) internet. The video display on the S2 clearly shows this was meteor scatter.

Cheers.

Hi John,

I'd be interested to hear this. Did you forget to include the link to the video in your email, or am I not looking hard enough?

Have you also considered / ruled out lightning scatter?

Regards,

Martin

No, definitely meteor scatter.

The burst lasted only a second and all frequencies in the range were affected. There's a very clear difference between meteor scatter and aircraft/tropo scatter.

Apologies, I forgot the link ...

https://youtu.be/amp99-hS8kI

I don't think it was lightning scatter. There was barely any rain that day, let along thunder storms. Temperatures were around freezing.

Hi Nick,

It is only now that I am listening to your audio clips. Great stuff to get in the mood for the new season.

The station on 106.8 MHz, where you state this to be probably Radio Romania Cultural, actually radiates the exact same program as Radio Moldova Actualitati that you received shortly before on 100.5 MHz. There are three txs having Radio Moldova Actualitati on 106.8 MHz. Difficult to say which one you got.

73,
Janpeter

Thanks Janpeter. I actually realised that after listening to the clips again but I obviously never got round to changing the name of the clip. There's still quite a few others that remain unidentified. I probably didn't post them all in the end though.

Very quiet today on the Es front but I'm hopeful it'll pick up again soon. I think the recent auroral conditions may have squashed the Es. Good DX.

Nick, Whitchurch, Hampshire.

Just wondering what it would be like with 5 x 250KW transmitters 39km away line of sight. Gives me 71db signals. Would assume I would be getting images/spurii with that.

Only the Elad S2 doesn't, of the SDRs that I have but that is a touch on the deaf side compared with the Perseus FM+

39179. Band II Tropospheric Loggings for 13 May 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-13 21:28:15 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 39179

Hi All,

Some nice, typical spring type Band II tropospheric conditions, which wasn't forecasted. It was interesting to see that the propagation path was changing as the cold air made its way down south.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Friday 13 May 2016

39183. UNID news on 66.38 MHz - russian?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-14 16:08:53 UTC
From: davebunyan@...
Topic: 39183 Message: 39183

I appear to be stuck right on the edge of the huge OIRT opening and am sifting out weak signals from my wav file recordings. Could someone please identify the language of this news broadcast received on 66.38 MHz at 1107-1109 UTC?

https://app.box.com/s/a8alu1jdssolwbgw39kpp7s0hwcxyzeb
https://app.box.com/s/a8alu1jdssolwbgw39kpp7s0hwcxyzeb

There was parallel reception on 67.31 which was even weaker and only becoming intelligble here and there - enough to confirm it was the same station. The only listed transmitter of this frequency is Radio Rossii. So if the recording is Russian then the latter frequency is a pretty long hop.

From: davebunyan@...
Topic: 39183 Message: 39187

Thank you Victor,

It is a very good question - which location is the station on 66.38?

Nyanodoma is the same direction as Urdoma (49 deg) from my QTH and both were received in the same short period of 11:07-11:09 UTC.

An hour later R. Rossii on 66.05, 69.02, 69.86, 71.39 and Rossiya 1TV were received - the direction was 56-58 deg. 66.38 was received at this time also. Bologoya on 66.38 is also heading of 58 degrees from here.

I've logged Urdoma as a 'possible' or tentative reception for 1107-1109 UTC but we will never know.

David

39188. Re:: Flanders will stop FM in 2022

Yahoo group: SkywavesDX (2016 — 2017)

Not only that but receiving the Belgian Nationals is not that exciting - and they get in the way of the more distant DX. Pure selfishness on my part I know, but they are pretty much there 100% of the time and only newsworthy is they are 0% BER on RDS.

But if they get rid of the dozens of 100 watt stations like topradio, club FM Radio Kompas etc - that will be different as I want to see how many different ones I can get over the years. Yesterday I added Radio Minerva to the list.

David

interesting
theres a case of a clear cut advantage to fm spectrum recording.

what came in on the other freqs? all short range stuff?

From: ilkka suni
Topic: 39192 Message: 39192

Hi folks,

As of May 10th 2016, a new nationwide nuisan... network is on air, in Finland. The network is titled
Helmiradio [Pearl Radio, Radio Pearl]. For me, this Pearl Jammer for instance nicely blocked some of my potential tropo frequencies, indicators from Estonia and Sweden.

The network is an affiliate of Nelonen Media, Sanoma Media Finland Corp. Their format sounds to be rock, oldies and 80's contemporary hits.

I really can't figure, who needs this new network repeating the same old same old, others already been airing for 30 years.

http://www.helmiradio.fi/

88.6 Helsinki
89.4 Hyvinkaa
91.2 Vaasa
92.0 Kuopio
93.6 Savonlinna [1 kW, vertical]

39195. The TV-tower in Borås has crashed

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-15 22:56:11 UTC
From: Christian Stödberg
Topic: 39195 Message: 39195

Hi!

Tonight, the tv-tower in Borås / Dalsjöfors (Heglared/Trollberget) (SE) suddenly collapsed. Of the 330m high tower, just 100m remains. The rest a lying in the forrest. So all TV- and radio signals from Borås are totally silent.

Why the guyed lattice tower, built 1959, suddenly collapsed is a mystery. No wind, no ice or no natural cause that can have caused the collapse.

The police is investigating this as a sabotage.

http://www.bt.se/nyheter/haglaredsmasten-har-gatt-av/

39196. FMLIST server down / Störung

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-16 07:16:17 UTC
From: Günter Lorenz (FMLIST)
Topic: 39196 Message: 39196

The FMLIST server is currently unreachable due to a hardware problem. As today is a public holiday in Germany, I am not yet sure if we can get the problem solved before Tuesday morning.
A new system is already under test and is available under a temporary address. The database is 3 days old.
FMSCAN: http://ng.fmscan.org
FMLIST: http://ng.fmlist.org --> Please do not enter logs or updates, as all changes will be lost/overwritten!!
These are TEST systems, so errors may occur.

Der FMLIST-Server ist zur Zeit wegen einer Hardware-Störung nicht erreichbar. Da heute Feiertag ist, kann der Fehler u.U. erst Dienstag früh behoben werden.
Ein neues System befindet sich bereits im Test, die Datenbank ist drei Tage alt.
FMSCAN: http://ng.fmscan.org
FMLIST: http://ng.fmlist.org --> Bitte dort keine Änderungen vornehmen bzw. Logs erfassen, alles wird überschrieben!
Da es sich um Testsysteme handelt, kann es zu Fehlern kommen.

73,
Günter

Hi Tim

I don't know what else came through with the Oxford transmitter, but the whole 6 MHz range was alive with MS. I will never know whether other signals were strong enough for RDS as I abandoned that file shortly afterwards due to the onset of Es. After that, a range of technical difficulties took over my computer and I lost everything on one of my hard drives, or so I thought.

For what it's worth, one by one, I thought that each of my hard drives had failed and I lost everything. Luckily, all important documents were backed up. Then the penny dropped. I soon realised that the replacement power supply I had just fitted (an old one I had saved) had faulty power connectors. But then it turned out that the previous power supply which I thought had failed was in fact OK. It was my video card which had failed. I couldn't re-instate the original power supply as U had thrown it away. Just some of the reasons why I should NEVER be trusted with modern technology. I'm dangerous!

Still sorting out the cable problems but I hope to be back in action in the next few days. Having a small refurbishment in the process too.

Cheers

John

From: AnnePaulWill@...
Topic: 39202 Message: 39202

Hi All,
Just an obersation. I am watching a carrier on R1 at the moment on 49.749,975 Mhz (assume 1tv St Peterburg). Fading up occasionally to v weak video. Noticed on the Spec lab trace the distinctive pattern of aircraft reflections and the carrier fading up strongly as the patterns crossed the carrier.

Not noticed this before. My location is very close to Heathrow, maybe 15miles or so to the west. Heathrow is on its usual westerly operations so I guess these are reflections from landing aircraft on approach from the East.

Paul,

It could equally be from aircraft at FL330 or above for example, some tens or 100+ of KM away.

39205. FMLIST server partially back ... / FMLIST Server wieder te ilweise verfügbar

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-16 13:38:11 UTC
From: Günter Lorenz (FMLIST)
Topic: 39205 Message: 39205

It was a quick decision to take the opportunity and move the FMLIST server
to the new environment.
All data entered / updates between May 15,22:30 UTC, and May 16, 12:45 UTC,
is currently lost. We will recover it in the next days if possible.
The database thus is as up-to-date as possible, and YES, you can now fully
use it for logging and editing.
Here are the temporary URLs:
FMSCAN: http://ng.fmscan.org
FMLIST: http://ng.fmlist.org
All other URLs (those starting with www) are not yet working but will be
established as soon as possible.
You are also welcome to report any bugs, errors, strange behaviours, or just
your excitement about the improvement in speed ;-)

Wir haben kurzfristig entschieden, die Gelegenheit zu nutzen und den Server
in der neuen Umgebung aktiviert.
Dateneingaben / -änderungen zwischen 15.05.2016, 22:30 UTC, und 16.05.2016,
12:45 UTC, sind im Moment nicht online - wir werden diese in den nächsten
Tagen nachtragen ,wenn dies sinnvoll möglich ist.
Die Datenbank ist also so aktuell wie möglich, und JA, sie kann und darf
wieder genutzt werden, auch für Log-Eingaben.
Hier die temporären Adressen:
FMSCAN: http://ng.fmscan.org
FMLIST: http://ng.fmlist.org
Alle anderen URLs (die mit www beginnen), sind noch nicht verfügbar, werden
aber so schnell wie möglich wieder eingerichtet.
Bugs, Fehler, seltsames Verhalten dürfen nun gerne gemeldet werden, genauso
wie die Entzückung über die verbesserte Geschwindigkeit ;-)

73,
Günter

It nows works Günter. And how!! Fast as lightning, very, very good. The ultimate test would be a giant Band II opening. Which I would like to see for other reasons also.

Thank you very much for all your efforts!

73,
Janpeter

Hi Janpeter,

thanks for testing. Both fixed - the temporary URLs are causing issues, as well as the proxy architecture.

73,
Günter

Yes, of course. Actually, the only "new" thing is the server.
The old URLs are already working again and you can forget about the temporary ng adresses.
By Tuesday, everything should be back to normal for everyone.

We will get that. Soon!
The Visual logmap is now back on auto-refresh every 60+x seconds when in "last 30 minutes" mode.

Hi Günter. Well done for getting things back online so quickly.

I''ve just tried the Visual Logbook here, and changed the log period to "Last 30 minutes (DCS)", but above the map on the right hand side, it says "REFRESH currently DISABLED."

Is there some setting somewhere I need to change to enable auto-refresh?

Ian Kelly

Topic: 39205 Message: 39219

Hello Günter,

Great work putting everything back online in very good shape !

I asked Heinrich DF8RY from CSVUserlistBrowser if he could add also the possibility to note that the PS code was received when logging a station to FMList. Now only the PI code is possible. We were used to do it that way when adding loggings directly via FMLists web interface. It looks like this is just a remarks text field where this is stored and he can put anything there as long as it doesn't exceed the field length (251 ?). And while you are the boss about the database he told me to ask you first.

73,

Guido.

Hi Guido,

is this just the info "RDS-PS has been received" or would it be the received RDS-PS? The latter would be fine.
I'll get in touch with Heinrich to accommodate this feature, which I fully support.

73,
Günter

Hi Simon,

Some to look out for, off the top of my head:

90.9 France Musique Carcasonne JN13

102.0 Sud Radio from Pic du Midi, JN02

105.0 RNE5, Lierganes IN83

Here are a couple of my logs from Spanish tropo openings, may give you some ideas.

http://ng.fmlist.org/fm_logmap.php?datum=2014-10-22 <http://ng.fmlist.org/fm_logmap.php?datum=2014-10-22&omid=2748> &omid=2748

39229. Is this really Medradio on 88.7?

Yahoo group: SkywavesDX (2016 — 2017)

A clip recorded in August last year:
https://app.box.com/s/dkqxqefgeew75zg6j9mjlsx70xudq5qe
RNE 5 CC takes over a little later (another one apparently not listed)
If that is Medradio the only tx listed is Guelmim/Fogo which is 2575 km from here. I'm thinking I may have got the ID from the RDS as it sounds strong enough but I can't remember for certain.
I think I also received this station earlier in the season too.
Thanks in advance for any help on this. Good DX.

Nick, Whitchurch, Hampshire.

39231. Audio distortion and RDS Problems on my FDM-S2

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-23 00:13:47 UTC
From: John Faulkner
Topic: 39231 Message: 39231

The result is my FDM-S2 being out of action. I am using tmy XDR-F1HD for band 2 DXing now. No recordings are being made. Everything is live and I am DXing 'single channel'.

It's all come about after a couple of weeks of computer disasters, resulting in no fewer than four Windows 7 installations on my main desktop machine. Windows 7 just gets worse, installing the wrong drivers, overwriting existing ones and causing all kinds of problems.

This is resulting in me having severe problems running my FDM-S2. It will run successfully on the lowest bandwidth - i.e. 192 kHz. Anything higher and the audio stutters badly with lots of distortion. The knock on effect of this is that RDS will no longer function properly unless the signal is very strong. Even Belmont and Tacolneston, my two strongest transmitters at S9+50dB and S9+40dB, respectively, only just give a PI code with a BER around 90%. There is no chance of obtaining RDS on anything weaker.

The problem is the same using the FDM-S2's own RDS decoder and also when I use RDS Spy via Virtual Audio Cable.

Has anybody come across this problem and, more to the point, found a way to fix it?

My techie computer friend has been to see this today and he confirms that everything is set correctly. The computer's resources are not being stretched. Far from it in fact. The RAM is fine and I am using only 2 GB out of 8GB. Nothing is being stretched beyond its limits at all. There is LOTS of headroom available in all computer departments. So what is happening?

Any suggestions please?

Thanks.

John.

John,

Try downloading the new SDR Console V3, try a 1.5Mhz bandwidth at first and see how that goes.

It doesn’t have recording (yet) but it’s an alternative to see if it’s the S2 software playing up.

If you have any issues, I’ll help you out via Teamviewer at some point.

Hi Simon.

I am using the same USB ports as before. The USB3 drivers are installed and working. It's a mystery why this is a problem now following my recent Windows re-installation whereas there weren't any issues l;ike this before.

It was also suggested that the chipsets on the motherboard might be failing.

I wondered if a change of power supply might be the cause too, though I cannot see how. It's not running hot, neither are any of the chips, etc.

I will uninstall and re-install all USB related hardware / software and try again. Hopefully that will solve it. The number of times I have tried this though. I will install only the FDM-S2 to begin with.

Thanks.

John

Sent: 23 May 2016 10:09
To: SkywavesDX@...
Subject: Re: [SkywavesDX] Audio distortion and RDS Problems on my FDM-S2

Hi Simon.

I am using the same USB ports as before. The USB3 drivers are installed and working. It's a mystery why this is a problem now following my recent Windows re-installation whereas there weren't any issues l;ike this before.

It was also suggested that the chipsets on the motherboard might be failing.

I wondered if a change of power supply might be the cause too, though I cannot see how. It's not running hot, neither are any of the chips, etc.

I will uninstall and re-install all USB related hardware / software and try again. Hopefully that will solve it. The number of times I have tried this though. I will install only the FDM-S2 to begin with.

Thanks.

John

Subject: [SkywavesDX] Audio distortion and RDS Problems on my FDM-S2

The result is my FDM-S2 being out of action. I am using tmy XDR-F1HD for band 2 DXing now. No recordings are being made. Everything is live and I am DXing 'single channel'.

It's all come about after a couple of weeks of computer disasters, resulting in no fewer than four Windows 7 installations on my main desktop machine. Windows 7 just gets worse, installing the wrong drivers, overwriting existing ones and causing all kinds of problems.

This is resulting in me having severe problems running my FDM-S2. It will run successfully on the lowest bandwidth - i.e. 192 kHz. Anything higher and the audio stutters badly with lots of distortion. The knock on effect of this is that RDS will no longer function properly unless the signal is very strong. Even Belmont and Tacolneston, my two strongest transmitters at S9+50dB and S9+40dB, respectively, only just give a PI code with a BER around 90%. There is no chance of obtaining RDS on anything weaker.

The problem is the same using the FDM-S2's own RDS decoder and also when I use RDS Spy via Virtual Audio Cable.

Has anybody come across this problem and, more to the point, found a way to fix it?

My techie computer friend has been to see this today and he confirms that everything is set correctly. The computer's resources are not being stretched. Far from it in fact. The RAM is fine and I am using only 2 GB out of 8GB. Nothing is being stretched beyond its limits at all. There is LOTS of headroom available in all computer departments. So what is happening?

Any suggestions please?

Thanks.

John.

39249. Re: [SkywavesDX] Audio distortion and RDS Problems on my FDM-S2

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-23 09:38:27 UTC
From: John Faulkner
Topic: 39231 Message: 39249

Thanks. That's one I'll bear in mind.

Just had a thought - there is a dual port lead splitter thing (I think that's the technical term) which came with the FDM-S2. I'll try that across the two USB3 ports later. That should deliver more resources to the FDM-S2. It should deliver more than enough 'juice' via the USB2 ports too. My laptop is fine with the FDM-S2 on 6 MHz bandwidth from just the one USB2 port.

So my shopping list now includes a new psu, plus a new motherboard. :-(

Another point - I note how the amount of audible distortion varies. This alone suggests there is a deeper problem. Either something is taking more resources as and when it wants to, or as you say, the motherboard drivers are failing.

Will get to the bottom of this.

Thanks.

John

Strange. FMLIST works fine on my Windows 10 using Chrome, Firefox, Internet Explorer (had trouble loading on first two attempts) and Edge, and also in the Chrome and Firefox apps on my Android phone.

Sometimes, rebooting your router (and your PC for good measure) seems to fix these problems where your computer refuses to connect to certain websites.

I quickly uninstalled all USB devices and connected the FDM-S2 to both
USB3 ports with the splitter. Reinstalled and problem still exists.

I really need to go out now so I will probably try one more Windows
installation later if I get chance. I could do with the reassurance that
nothing was corrupted on the last Windows installation - there were
boot-up problems due to the bad connectors to my hard drive.

It's all a bit of a shambles until I can replace my motherboard and psu,
but one more reinstallation might just solve the problem if the last
installation was damaged.

I have never known a time with so many computer problems.

Thanks,

John

Topic: 39231 Message: 39254

Also,

FWIW a user of my software upgraded from Windows 7 to Windows 10 and the CPU load of my software increased by 10%.

John,

I honestly don’t think a new Windows installation will help. Get the very latest updates first.

39255. Hardwell on Air 87.5 MHz

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-23 13:49:15 UTC
From: Alan Gale
Topic: 39255 Message: 39255

Hi All,

I have been hearing this station for most of the day (and last night too), there is no RDS ident, but regular voice announcements IDing as 'Hardwell on Air'.

Their website shows this is a podcaster, and the OFCOM RSL list has no mention of it, so I assume a pirate, but the station is in the Netherlands according to their website, and I'm wondering just where it is coming from? The signal is quite strong and very stable, so possibly being relayed by someone in the area. The format is Tech, House, Electro etc.

I'm in the north west of England, not too far north of Manchester, and have only just finished creating a new setup for FM DXing, so I'm a bit out of touch with the local scene at the moment.

Alan.

I was receiving a station on 87.5FM Sunday morning in Huddersfield. No RDS or IDs - trance music with 'listener messages' every few songs. I assume this was the same station, transmitting from the East side of Manchester?

BTW Hardwell is a Dutch DJ/Producer

Yes, Hardwell is a hard house DJ. I would imagine this station is relaying a station that carries Hardwell On Air as a syndicated programme - or perhaps just replaying a podcast direct. A lot of big name dance DJs do pre-recorded shows, which they sell to dance music stations, either terrestrial or online. So, Hardwell On Air won't be the station name.

OFCOM have never licensed 87.5 for an RSL as far as I know, so very likely a pirate.

Hi David,

Yes, sounds like the same one, not really my sort of music,
but interesting to know that it seems to be somewhere in the
area. I'm not sure what power they are running, but it's
about 8db stronger than Key 103 here.

Cheers for now, Alan.

Thanks Ian, I'm badly out of touch with the local pirate scene.
I thought it was a bit low for a RSL as they don't usually allow
them on the band edge. I'll keep an ear on this channel and see
how long it stays on for.

Cheers for now, Alan.

Interesting regarding Windows 10, Simon. Thanks for this. I don't intend to run Windows 10 in a hurry.

Regarding a Windows 7 upgrade, I find the computer is behaving oddly in other ways so I think this would be of benefit overall. This wouldn't be purely for radio purposes. I really don't want to do it but it's probably for the best. It would be interesting if I find out the FDM-S2 runs fine after a re-installation as this would probably rule out the motherboard chipset being faulty.

From: davebunyan@...
Topic: 39262 Message: 39262

In myFM when you click on DXMaps to set it to OFF the computer comes up with the message "URL not found".

I like to turn off the link to DXMaps when I uploading logs from recordings - so I don't accidentally enter data live. I also remember a post from Gunter that if FMList logging slowed down the turning off the link could help.

BTW the new hardware or whatewver definitely is a lot faster - thanks

David

Hi David thanks for spotting and reporting the issue which has been solved.

@ALL:

I’ve noted the proposal to switch off “real time logging”. This is on my to-do list.

Turning DXMAPS off may help if the DXMAPS server is not available: If you experience very long timeout during logging, this might be the case.

Good DX!

After a fresh Windows installation, without any problem, on a spare drive, the problem still exists, so I cannot rule out the motherboard anymore. I wondered if the psu might be a problem too, not delivering the full voltage when under load.

I haven't tested this.

Another thing which was suggested was that the FDM-S2 might be faulty. A possibility, but I don't know what kind of fault would produce this glitchiness. I tried to install it on my laptop but the old Celeron mobile processor took one look at the Elad, screamed and ran away at high speed.

A new PSU and motherboard will be ordered this week.

Thanks for you all your help and advice.

39266. Video Carriers - help for identification.

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-24 17:48:54 UTC
From: davebunyan@...
Topic: 39266 Message: 39266

Lots of reception on May 22nd in OIRT Band and 6m. From 15:30 to 16:00 UTC the OIRT reception was confined between bearings 70 and 86 deg - but on 6m I got stations from Finland - Russia (1700km/43 deg and Italy (1788/126deg). So not a great help for propagation paths.

49.73957 - this station was coming and going with nasty wide sidebands
49.739604 - a much cleaner signal showing when the first signal faded
49.749950 - the strongest signal - fair video on peak - showing an ice hockey match
49.757791
49.7604

At 16:02 a different carrier was seen - on 49.74718 - which logically should be Moscow at a bearing of 64 deg

So does anyone know who was screening an ice hocky match on 22 May 2016 in the period 15:30 - 16:00 ?

And does anyone one know which transmitter is outputting the horrible carrier? - I saw something similar back on 4th May 2016.

The problem with identifying the stations is that you can make a case for them all being Russian at a bearing of roughly 40-60 degrees. If 49.75 is St Petersburg (51 deg) and 49.747 is Moscow (64 deg) then 49.758 could be Gluboyke (61 deg). 49.760 would have to be Nyandoma (49 deg).

On R2 I got some strong video later from the 1st National channel - with a nice clear logo. I also got at varying times audio on 67.74, 67.75 and 67.758 with MDA TRM1 - so equally possible is some opf the Russian stations in that ddirection!

And shortly before the OIRT band shut down I got everything from Kiev - except chicken

Hi John,
You may want to consider some new usb cables. One of my other
Hobbies are PC Audio hi fi, l had a issues with a old mb that run
a E8400 dual core,it would overhead my mb,video chip and
would some how rewrite it's Firmware to a camera!
Sadly heat tends to make usb do stranges things at lest to my old Asus
mb. I have also had issues with some usb cables that brake down
and loose connection on certain mb's.
Having been in your shoes, it's very fustrating.
Hope you sort it out, BTW, I have been running Windows 10 since
the early beta days, and have never had the issues you have had.

From: davebunyan@...
Topic: 39262 Message: 39268

One addition to FMList logging that I would find very useful is to have a tick box on the logbook to flag up that the entry is from a recording/unattended. I think this is becoming more important as wideband SDRs are being used. My log for 24th May 2016 contains 22 logged live - but the big majority are from the wav files. During the main SpE season it is likely that the majority of logs will come from RDSlogs from using FMSuite for scanning. In the past I would type in "unattenede" - but more characters makes bigger files on the server.

If it requires re-writing the database - that is a huge thing to ask for. But if it is easy add a field - something to consider. (Would you tick a box to say "live" or tick a box to say "recorded"?).

At the moment I'm putting the letter "r" in front of a single digit for the overall quality.

Thanks

David

Hi Damien.

Thank you for your suggestion. I have swapped and changed USB cables throughout this process. I have also tried the dual/splitter thing so I ran the FDM-S2 from both USB3 ports simultaneously. No difference. Things were the same on last night's fresh Windows installation on a different drive, running only the FDM-S2. I have narrowed it down to three things anyway, all of which are going to cost money.

I am hoping to try my FDM-S2 on a friend's computer tomorrow. I just hope it's not the FDM-S2 which is at faulty, because that would be a bigger expense to get repaired.

Windows 7 is very frustrating. Its behaviour is totally different with each installation. How can this be? So many annoyances and irritating quirks. It's a different animal every time. There's no doubt that another installation is necessary as Windows updates are suddenly failing.

Microsoft Visual C++ has collapsed, necessary for running the S2. I cannot install it, uninstall it or repair it.

Where's the hammer?

Incredibly, System Restore is working this time!

Just done an experiment with the S2. Not sure if it means anything ...
It's distorted on playback and record, but plays older files back fine.
Is there anything I can deduce from this?

That sort of maybe indicates an issue with the USB side of the ELAD. I assume it’s getting enough power? I assume the USB cables are good – swap them out. Is there any way you can test with another PC?

This is my plan today, Simon.

The laptops we have are a bit underpowered for the S2, so I am hoping to take it to the local computer shop in town where my friend works. He offered to try it out in the shop. Just hope they aren't busy this afternoon.

Cheers

John

39273. UR-1 on 87.7 - where from?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-25 18:01:24 UTC
From: nick gilly
Topic: 39273 Message: 39273

Getting this via Es but it's not listed on FMLIST. Does anyone know where in UKR this is from please? Good DX.

Nick, Whitchurch, Hampshire.

39276. Sporadic E Loggings for 25 May 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-25 20:20:18 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 39276

Hi All,

An eventful Es-DX day today. In the early afternoon I started to catch an opening towards Tunesia and Algeria, but found a massive noise level on the band. Which was worst on the lower frequencies. This has been pesting me for many weeks now, it makes DX-ing in South - Southeasterly directions very difficult. Despite of strong signals, no RDS was decoded. I am sure many of the weaker stations went unnoticed.

Late in the afternoon and evening things became interesting, as a nice Band II opening developed into Skandinavia. Very strong signals from mainly Sweden and no noise to spoil the fun. The best part was yet to come though, with a very nice opening into Central Europe including some unusual short skip. It has been many many years since I last received Es-DX from the Czech Republic.
There are many first timers in the logbook.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Hi all.
A few UNIDs from recent Es here, as well as a recording of an unknown tx of UR 1 Persha Program on 87.7.Please see below:
unid Baltic station on 89.4: https://app.box.com/s/kgvgls1t3gvrlpuqzqft6hzwis8rc7qh
87.9 unid Russian language station: https://app.box.com/s/vqstfr34m6kkzidozr8oqx5m0r0ork9k
89.0 probably Estonia, but which one?:
https://app.box.com/s/6qegru9t1yxstv1n7xwgniz1trsyyz8n
87.5 unid Russian pop with a possible ID (very weak):
https://app.box.com/s/761mwskdf9jnkf66ldvn2gybuk93gsci
87.7 UR 1 Persha Program - anyone know where this is from?:
https://app.box.com/s/uzvpiuomo9ti8cofsi86p4qek8p0l859
Any help on the UNIDs very much appreciated. Thanks and good DX,

Nick, Whitchurch, Hampshire.

At last, a decent day of openings and my first loggings since 5th May some 3 weeks ago.

Began while I was at work, some Algeria during my lunch hour, so set a stream recording, later analysis revealed a short opening to Italy just before 1200z.

Came home later than usual thanks to a dead truck on the A31 and the usual Bournemouth Spur Road @^%&$*$ traffic and found an opening to Finland in full swing. Signals not strong here, but able to at last make use of being able to monitor several freqs at once including RDS thanks to the new Matrix feature on SDR Console. This faded, to be replaced with a marginal opening to Poland - those further east had much the better of it.

I have yet to analyse the stream I recorded for the period prior to my arrival home, however I am not expecting much as I was beaming at Italy at the time..

Three short and sweet sporadic E opening today, the last one after 1800
peaking to the top of the band and producing some reasonable DX at last.

All DXing done on my Sony XDR-F1HD today as my FDM-S2 is out of action.

Good DX!

Thanks very much Victor. I wasn't expecting 87.9 to actually be from Russia so that is a nice surprise. I was thinking maybe it was Radio SWH Plus from Latvia. The Bryansk tx is 2414 km from here. Good DX.

Nick, Whitchurch, Hampshire.

Hi

Large Italian sporadic about 1530 GMT on the lower band (up to 94 mhz).

Only 3 new stations for me :

*88.6 Radio Delta Uno, voice ID, Roccamorice ??

*89.5 "CENTRO____CAMPANIA" PI: 5479

*90.7 PI : 5347 Tele Radiopiu , Rocca di Papa.

plus the usual ones :

88.6 RADICALE PI : 5210

87.6 RAI PI : 5201

88.6 R C S PI : 5006

87.5 R ITALIA PI : 5220

93.7 VIRGIN PI : 5241

Cheers

Hi All,
Good Band 1 /OIRT opening this evening.
Russia 1 with good video on 49.757,814 Mhz on R1 and M1 Moldova on R2 at 59.239,545 Mhz.

Have weak video at the moment on 49.739,664Mhz. Good clean carrier but very unstable +/-20Hz and more with very smooth sine wave sweeps. Pictures not good enough to see a logo yet.

Have recorded 4 Mhz of OIRT at 70Mhz just need to find the time to listen now.

Regards

39295. Re: Band II Sporadic E Loggings for 5 May 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-26 20:09:58 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 39295

Hi All,

The Es season is in full swing now, with another big day for Band II DX. I missed a major part of the fun, being able to start my DX session not earlier than 17.40 LT.
The few things worth mentioning are:
- A single reception of a station from Pesaro. A rare location to begin with and all the more remarkable while everything else at the time was coming from Sardinia;
- The reception of Kaliningrad, which is rather rare;
- Lybia made its first appearance of the season;
- A Radio Rossia catch from Kozmodemyansk (ME), which is deep into European Russia;
- The reception of FM99 from Alytus (LTU), a low power tx.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

** Personal First

Belarus and Ukraine were received in the OIRT range from 0830, the MUF quickly spreading into band 2 where signals from the Balkans were coming through. I was lucky to be on 88.2 at just the right moment when Turkey appeared briefly. It lasted less than half a minute but produced a good signal with instant RDS. Around this time there was exotic sounding music on 87.5, Koran on 89.5 and 90.4, plus pops on 87.8. Signals from the Hungarian/Romanian border were received also at this time which would probably have been the point of double-hop.

Various other openings occurred throughout the day, but I was frequently away from the receiver. The FDM-S2 was out of action at these times, otherwise I could have left it recording. But I am pleased to say that the problems I have experienced with this are now rectified. I simply connected the FDM-S2's USB cable to a powered USB hub. It looks like the replacement power supply I fitted to my computer two weeks ago was not delivering enough juice. There could still be a problem with the

motherboard, but this seems like it was the probable cause of the issues. A new "Corsair" brand replacement psu has now been ordered. All today's DXing was done on my Sony XDR-F1HD.

Good DX!

39316. Two unid from UK

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-27 21:15:37 UTC
From: Németh József
Topic: 39316 Message: 39316

Hello All,

On wednesday I received many stations via E-skip from UK. I identified high power scottish tx's. I have two record, maybe lower power stations on 101.8 MHz. I heard, there are ID's on both, but I do not understand.

http://enjoe.ucoz.hu/_ld/4/418_1018unid.mp3

http://enjoe.ucoz.hu/_ld/4/419_1018unid2.mp3

Can you help me?

Thanks

regards,

Jozsi from Hungary

Hi Jozsi,

The first recording is "Heart". I don't know where from, as there are many Heart stations in the UK.

The second recording sounds like they are saying "NJoy radio". It sounds like a Dutch station. They use a lot of English language when describing pop songs and station IDs.

Chris, (Lincoln, UK).

Hi Josi,

The first clip has an ID of Heart so most likely Heart North East 10KW from Burnhope. Sorry but I cant identify the second clip.

Regards,
Chris.

Hello Jozsi. Only the first station is from the UK, the second is from the Netherlands!

The ID in the first recording is at 22 seconds. The DJ says "This is Heart". It will Heart Tyne & Wear from Burnhope, in North East England, the only Heart listed on 101.8.

The second recording has an ID slogan "Joy Radio, Hits Only". This didn't seem to match anything in the U, but I put the phrase in Google, and it turns out to be Joy FM in the Netherlands. Website: http://www.joyradio.nl/ http://www.joyradio.nl/

Ian Kelly

Correction: Joy FM should have Joy Radio. Checking FMLIST, there are two outlets on 101.8, Emmeloord / Alticom Mast and Leeuwarden / Ceresweg. Either would be a good catch, as listed as just 0.16 and 0.18kW respectively.

Well done to the two Chrises for beating me to this by 3 minutes, sorry for any duplication!

Ian Kelly, Reading, UK

Just another thought. There was a bit of classical music fighting it out with Heart. A possibility this was from Classic FM, which has three outlets on 101.8, including one on the outskirts of my hometown, Reading (Hemdean), although the other two listed might be more likely, being further east and north, and slightly closer to Burnhope and the Netherlands. We will never know, as there was no ID from the classical station.

Hello All,

Many thanks.

Ian - yes, on my records can hear Classic FM from 101.7 MHz. I received this with RDS from transmitter Black Hill.

My logs are on website fmlist.org:
http://www.fmlist.org/fm_logmap.php?datum=2016-05-25&omid=2588&band=ALL

regards,

Jozsi from Hungary

Hi Jozsi.

The second clip sounds Dutch to me, maybe Hit Radio from Antwerp, judging from the ID.
 Good DX.

Hi Jozsi.

2nd is 100% JoyRadio from Holland.

Nice catch !

Ruud

Subject: [SkywavesDX] Two unid from UK

Hello All,

On wednesday I received many stations via E-skip from UK. I identified high power scottish tx's. I have two record, maybe lower power stations on 101.8 MHz. I heard, there are ID's on both, but I do not understand.

http://enjoe.ucoz.hu/_ld/4/418_1018unid.mp3

http://enjoe.ucoz.hu/_ld/4/419_1018unid2.mp3

Can you help me?

Thanks

regards,

Jozsi from Hungary

Thanks Victor.
How sure are you about 87.7? Another DXer on the Real DX Yahoo group agreed with my suggestion of Krievijas Hiti with Russkoye Radio news. Smolensk would certainly be more interesting but I would like to be more definite.
 Thanks and good DX.

ID at 2:15

And Russkoye Radio news is (or are?) different.

Victor

39352. Es 28.5.16

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-29 00:06:19 UTC
From: nick gilly
Topic: 39352 Message: 39352

Another day of teases mainly, but with some very interesting reception thrown in.
An opening between about 3.10 and 5.05 pm local produced some interesting signals from Bulgaria and Romania, plus one Moldovan:
87.6 BNR Horizont Lom 2009 km (RDS)
87.9 Z-Rock Pleven 2129 km (RDS, 300 watts)87.6 Radio Vocea Speranţei Craiova 2020 km (RDS, 50 watts)89.4 SRR Radio România Actualități Negrești-Oaș 1819 km likely with news
87.9 Radio Noroc Edineț 2073 km (MDA) (RDS)
Then a gap before more patchy signals turned up between about 4.45 - 5.04 pm a few more:
87.8 UR 1 Persha Program Rivne FM Antopil' 1936 km ('Rivne FM' ID heard)87.5 Vesti FM Simferopol' 2696 km - IDed after Mike Fallon posted a video of his reception with a mention of 'Futbol disko' which I remember hearing88.0 folk music mixing with soft-spoken OM in Russian, the latter may have been Radio Dacha, Simferopol'87.9 unid in what sounded like Russian89.4 PR 1 Kraków 1513 km
Unfortunately all the recordings from this session may have been permanently lost as something went wrong during recording which seems to have corrupted the CD-R and means it cannot be finalised. So some potentially valuable clips have been trashed. As a result tomorrow I will be ordering a solid state recorder that records on to a USB stick or SD card. This will also mean no more waiting for CD-Rs to be finalised and I should be able to get recordings online much more promptly.
Another short lift between 6.42 pm and 7.05 pm produced signals from central Europe, including Fun Radio on 87.7 from Košice with RDS at 1640 km. I may have more IDs from this session when I go through the recordings. Good DX.

Nick, Whitchurch, Hampshire.

** Personal First

The second double-hop opening of the season and we're still in May!

Not much time for listening today with family visiting, but I took a few
crafty listens every now and again.

I didn't get much recording done on the S2 as most of the files became
corrupted but I managed to rescue the file which had the Ankara
reception (Phew!) and I am in the process of uploading this as I type
this log.

Good DX!

Thanks Victor. Erm, yes that's what I thought when I heard it but I thought I must have been imagining things.
There was definitely unusual/exotic signals on the band around the same time with Quran on 87.9 and 88.0 (no IDs of course) so I was lucky to catch a station with speech that may at least give a clue to the country of origin. God knows where some of that stuff was coming from. The very intense Es cloud over Turkey was linking up to the UK.

Shortly after that recording the band got taken over by Hungary and Romania. Good DX.

39366. Es Log 26th May 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-29 15:24:43 UTC
From: Jim Smith G0OFE
Topic: 39366 Message: 39366
Attachments: 1 described; binary payloads are missing from this source WARC

2nd half decent day in a row here. Missed most of the earlier activity as I was at work, though did remote in for long enough to catch some of the morning opening.
In the evening, an opening to Italy in full swing but didn't last too long. This was quickly replaced with an opening to the east to Poland and the Baltics. This was mostly 20 second teases, though it did open properly on a couple of occasions.
The evening ended with an opening to Norway.

Map and logs: http://www.fmlist.org/fm_logmap.php?dat ... <http://www.fmlist.org/fm_logmap.php?datum=2016-05-26&omid=2748> &omid=2748

Being able to monitor several frequencies and monitor RDS at once is really helping me make the most of the occasional and mostly fleeting openings here - the attached pic is a screenshot from the Italian opening.

A most frustrating afternoon and evening here.
Openings mostly consisted of short teases to the east, interspersed with long periods of nothing whole those further east had more luck.

Map and logs: http://www.fmlist.org/fm_logmap.php?dat ...
<http://www.fmlist.org/fm_logmap.php?datum=2016-05-28&omid=2748> &omid=2748

At the time of writing, Sunday has been even worse with a single unidentified TX of Actualite Romania on 88.1, while only 50 miles and more to the east of here, a remarkable opening to the east was in progress.
Hoping to benefit from the early evening surge..

There were also many stations without RDS, but I skipped them.

List of stations:
- 95.8 TRT FM (probably Aksehir, 960 km)
- 102.7 Radyo 03 (Afyon, 855 km)
- 99.1 Kolayli Radyo (Afyon, 855 km)
- 101.0 TRT Nagme (Aksehir, 960 km)
- 101.2 Show Radyo (Afyon, 855 km)
- 102.4 Diyanet Radyo (Afyon, 855 km)
- 88.2 Diyanet Kuran Radyo (Ankara, 950 km)
- 90.8 TRT Turku (3 tx possible)
- 96.3 TRT Nagme (Tatvan, 1760 km, not a short skip)
- 93.7 TRT FM? (the phone number in RDS is their according to Google, multiple TX possible)
- 98.8 Diyanet Radyo (Izmir, 670 km!)

From: Günter Lorenz (FMLIST)
Topic: 39371 Message: 39371

Hungarian DXer tringer1985 has made a notification to FMLIST regarding an Israeli station on 101 MHz with PI logged: 4305 PS logged: ASHAMS__
It was not - as he assumed - Radio Jerusalem, but Ashams Radio, which we had as "planned" since 2012, but first time observed abroad.
Good catch!

73,
Günter

Hi Christian;

on 93,9 you have Mondoradio Tutti Frutti,Parabita/Contrada Terrisi-Serra di San Eleuterio (LE), ID at 04 min 07 sec, and just before the speaker give the station phone number.

87,8 and 92,4 just music no talks or ID
89,6 nothing useful

88,3 two stations: one with sport talks, other religious, no IDs

I don't find the 1602 file, but there is a 1609 file but with some speech in UNID language

Alessandro,
Trieste, Italy

39373. Sporadic E Loggings for 29 May 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-29 21:06:00 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 39373

Hi All,

Today's Es propagation was not the big day I have been waiting for, but at times it came close. The opening lasted many hours, bringing in ten different countries.

In the afternoon Band II became a complete mess, with the skip area quickly bouncing from one country to another. This made ID-ing almost impossible, with multiple stations on each frequency.
During this period, lasting maybe 10 minutes only, I had some very unusual tropo scatter like propagation on Band II. Several stations from Baden-Württemberg were fading in with strong signals. Some of them even overriding semi-local stations. Amongst others I heard Heidelberg, Waldenburg and Grünten. It seems to have been related to the E-skip, but this is too uncertain to include these in the logbook.
Adding to the mess on the band was again a rediculous noise level on the lower half of Band II. And last but not least, there was multiple Es propagation also. Nothing ID-ed of course, but for a good while I had an Arabic language station on 94.0 MHz. For sure this was not from Africa. Other multi-skip was probably there, but burried under local stations and the sinlge hop plethora.

So far this season has been impressing me. With some not very common skip patterns.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

39376. Es 29.5.16 including double-hop to Iran

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-29 21:51:11 UTC
From: nick gilly
Topic: 39376 Message: 39376

Well, this was a day to remember. Whilst there wasn't a big blockbuster opening here with lots of logs, there was an opening in the early afternoon that commenced with some very unusual double-hop. It started at 1238 UTC with jazz on 88.0 which faded out only to be occasionally punctuated with snippets of Quran prayers on 88.0. I knew this was double-hop as the signal was peaking more-or-less east and the MUF map showed a large cloud over Europe linking up to a very intense cloud over Turkey:

https://app.box.com/s/rg8hi8d3c7a64jqc5i3b37hzu4gh8xnl

87.9 also had an unidentified Quran station on, and unfortunately IDs were not forthcoming on these stations:

https://app.box.com/s/6pcteibmqxdbvjd3te4lpzbeleakn1pu

However, at 1243 UTC I came across a station on 89.0 with talk, which turned out to be in Farsi. It sounded like an OM in the studio talking to another OM on the phone, and at this stage I was thinking maybe I was imagining things:

https://app.box.com/s/4re18oo3w00xlpfs1wc04v5rj4hm5kui

This is probably an outlet of IRIB Radio Javan, the most likely site being Ahar/Kuh-e Qezel Qayah which is the nearest big tx at a distance of 3987 km/2477 miles! Thanks to Paul Logan and Victor Rutkovsky for confirming that this was Farsi and therefore Iranian in origin.

Shortly after this single-hop stations from Hungary & Romania took over the band, up to around 101 MHz. One Romanian that was IDed was Digi FM on 91.4 from Gheorghieni/Harghita-Băi at 2033 km:
https://app.box.com/s/rcdfjfwl97nq1xn1n98v4xej6wewucxm

At around 1350 UTC there was another brief fade-up on 87.9 of exotic-sounding music and a YL on the phone talking to the OM host in the studio in Turkish, but I'm not sure if these were one station or separate ones.

Apart from a brief Italian taster earlier this evening that has been it for today.

So, my first ever reception of Iran on FM here! I still can't believe this happened. It's still only May too and it makes me wonder what is going to happen next? Good DX.

Nick, Whitchurch, Hampshire.

*WELL DONE to Nick for a phenomenal catch in Iran!*

I'm half way through this afternoon's S2 recordings. This was, undoubtedly, my best day of Es loggings for me EVER!. Ankara, Adana, Kayseri, Istanbul, Sanliurfa and VAN were coming through. Van is in the south-east of Turkey, close to the Iranian border.

There were a few Arabic stations coming through which I have yet to check on the files. These may have been Syrian or Iraqi. I somehow doubt that Iran would have come through here as the path was wrong, although it might just be possible.

I will post my recordings tomorrow. It's a little awkward at the moment as the grandchildren are staying with us at the moment and my computer time is a little restricted., but hopefully soon.

Good DX!

John

Hi Christian,

the station you heard on 92.4 is for sure Radio Italia Solo Musica Italiana.
at 5:25 you can hear clearly "Disco Italia" and, at 8:23, you can hear "Radio Italia Live".

Concerning 88.3, the station (in my opinion there is only one, not two) mixed with Radio Maria seems very likely Radio Sportiva: no Ids at all, but you can hear some talks about football and I think I recognize the presenter's voice.

You are quite right Victor (of course). I wonder how that logging got in there. This should have been Stalitsa from Orsha. I think I was to stressed out with all the DX yesterday. The extremely fast responding FMLIST has doubled my logging speed. But I think I need to slow down a bit :-)

Thank you for correcting me.

Congratulations with getting Iran Nick! Very well done. You are quite right that this season is off to a remarkable start, with some unusual skip patterns. With a higher than normal amount of double hop.

More than you I was right in the middle of the single hop skip, bringing lots of fun but also a completely congested band. I had just one Arabic language station on 94.0 MHz with studio talks, no ID. This was when Bulgaria was very strong. Assuming the first hop bounced off the south west tip of the Black Sea, then the second hop lands in the UAE, Oman or South East Saudi. Given the nature of the transmission, I would not expect this to have been Saudi though. Which leaves UAE and Oman. Based on FMLIST the only candidate is then Radio Oman Quran. But nothing is for sure here unfortunately.

Onderwerp: [SkywavesDX] Es 29.5.16 including double-hop to Iran

Well, this was a day to remember. Whilst there wasn't a big blockbuster opening here with lots of logs, there was an opening in the early afternoon that commenced with some very unusual double-hop. It started at 1238 UTC with jazz on 88.0 which faded out only to be occasionally punctuated with snippets of Quran prayers on 88.0. I knew this was double-hop as the signal was peaking more-or-less east and the MUF map showed a large cloud over Europe linking up to a very intense cloud over Turkey:

https://app.box.com/s/rg8hi8d3c7a64jqc5i3b37hzu4gh8xnl

87.9 also had an unidentified Quran station on, and unfortunately IDs were not forthcoming on these stations:

https://app.box.com/s/6pcteibmqxdbvjd3te4lpzbeleakn1pu

However, at 1243 UTC I came across a station on 89.0 with talk, which turned out to be in Farsi. It sounded like an OM in the studio talking to another OM on the phone, and at this stage I was thinking maybe I was imagining things:

https://app.box.com/s/4re18oo3w00xlpfs1wc04v5rj4hm5kui

This is probably an outlet of IRIB Radio Javan, the most likely site being Ahar/Kuh-e Qezel Qayah which is the nearest big tx at a distance of 3987 km/2477 miles! Thanks to Paul Logan and Victor Rutkovsky for confirming that this was Farsi and therefore Iranian in origin.

Shortly after this single-hop stations from Hungary & Romania took over the band, up to around 101 MHz. One Romanian that was IDed was Digi FM on 91.4 from Gheorghieni/Harghita-Băi at 2033 km:

https://app.box.com/s/rcdfjfwl97nq1xn1n98v4xej6wewucxm

At around 1350 UTC there was another brief fade-up on 87.9 of exotic-sounding music and a YL on the phone talking to the OM host in the studio in Turkish, but I'm not sure if these were one station or separate ones.

Apart from a brief Italian taster earlier this evening that has been it for today.

So, my first ever reception of Iran on FM here! I still can't believe this happened. It's still only May too and it makes me wonder what is going to happen next?
Good DX.

Thanks very much Janpeter. I wonder why there is so much extra activity to the east this year so far? Normally common countries such as Spain, Algeria and Italy have been conspicuous by their absence. Maybe a weak jet stream or unusual weather patterns?

What sort of programming did 94.0 have? And what is the distance to the Radio Oman tx to your QTH? Good DX.

The programming was studio talks with a YL moderating. The distance to the Radio Oman Quran tx is 5490 km. Which I now realise is a bit much for a double hop. On the same path Qatar and Bahrein would also be a possibility. With Zoetermeer - Doha at 4922 km. I do not know the ITU country code for Bahrein, it seems not to be included in FMLIST.
Should the length of both hops be similar I wonder? If the second hop has been shorter, then Iraq and Kuwait become a possibility.

Don’t rule out chordal hop – where the signal does not bounce off Earth at all, but reflects off two clouds to extend the distance.

Google chordal hop propagation.

WELL DONE to Nick for a phenomenal catch in Iran!
I'm half way through this afternoon's S2 recordings. This was, undoubtedly, my best day of Es loggings for me EVER!. Ankara, Adana, Kayseri, Istanbul, Sanliurfa and VAN were coming through. Van is in the south-east of Turkey, close to the Iranian border.

There were a few Arabic stations coming through which I have yet to check on the files. These may have been Syrian or Iraqi. I somehow doubt that Iran would have come through here as the path was wrong, although it might just be possible.

I will post my recordings tomorrow. It's a little awkward at the moment as the grandchildren are staying with us at the moment and my computer time is a little restricted., but hopefully soon.

Good DX!
John

Yesterday around 12:00 UTC I received in Budapest from SE direction at 93,70 MHz.
I did not find this PI on FMLIST & FMSCAN.

Here is what I saw with RDS Spy:
http://s26.postimg.org/sbp72lrmh/UNID_2016_05_29.png
http://s26.postimg.org/sbp72lrmh/UNID_2016_05_29.png

PI:9905
PS:RA?? M??

My recording is just music, so can not help to identify :-(

Thank you for any help,

Balazs

39403. 29-05-16 Recordings - Part 1

From: John Faulkner
Topic: 39403 Message: 39403

Posting these ahead of some others as these were the most interesting sounding stations.

87.7 unid music 1330 29-05-16
https://app.box.com/s/fgwfe0z5eadmqv436w47pk65olwqz6zk

88.3 unid language 1330 29-05-16
https://app.box.com/s/d13pmwl78bgy9phrqcezd8wo1aj1rxor

89.0 unid Arabic or similar. Mention of BBC Arabic 1330 29-05-16
https://app.box.com/s/r4h3h75pwqmvisqvwm7p55z4hpfqhier

As you will see, there are descriptions in the titles, but the 89.0 is intriguing as I thought there might have been a mention of Iraq in this. There are clearly mentions of "London", "BBC" and "bbcarabic.com". Possibly "Al Medina Iraq"

Thanks.

John

39408. 89.0 IRIB Radio Iran - Ferdows site

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-30 11:48:10 UTC
From: nick gilly
Topic: 39408 Message: 39408

Can anyone confirm whether this is correct please? WRTH Lists an IRIB Radio Iran tx in Ferdows on 89.0 MHz, and my Iran clip has been tentatively IDed as Radio Iran by an Iranian DXer. I can't find this site listed on 89.0 in FMLIST, which just lists Radio Javan sites on this channel.
So is the info about Ferdows correct please? If so, the distance to here would be something ridiculous, maybe too far to be true... Thanks and good DX.

Nick, Whitchurch, Hampshire.

Looking more carefully on Google Maps and FMLIST, there is a tx listed on 89.0 from Sarayan, which is not too far SE of Ferdows, but again, it is listed as IRIB Radio Javan. Could it be this site? Good DX.

Nick, Whitchurch, Hampshire.

Can anyone identify the language in this clip please?:
https://app.box.com/s/v2d3a8lclijuqiiixcutpcc0pv4joiec
I thought it was Turkish but apparently not. I sent it to Kurt Zscherp and he said it sounded like Russian maybe mixed with a Turkic language. This was during yesterday afternoon's mega-lift and it faded up in isolation quite a while after everything else had gone. Thanks and good DX.

From: Jim Smith G0OFE
Topic: 39420 Message: 39420

At last, a decent day here with three distinct openings following some early teases to Italy -

First one was to the Balkans at lunchtime, followed shortly afterwards with the path to the Azores opening up.

I had to go out for a couple of hours and left a stream recording, later analysis revealed a short lived Slavic sounding station, no RDS.

Then, from 1600, a strong opening to Romania/Hungary/Slovakia/Czech/Poland lasting an hour and a half.

Logs (think this may be my largest one-day log yet..) and map:

From: Janpeter van Dijk
Topic: 38927 Message: 39424

Hi All,

For most of the day the position of the Es cloud was unfavorable for Band II propagation at my location. The exception came in the early evening, when for 45 minutes a very intense opening into the Balkan area occurred. This brought again unusual short skip, with once more Slovakia appearing. Getting this country once per year is rare, getting it two times before it is even June is unprecedented.
And even better, also Slovenia made an appearance. It has been at least 25 years since I last received a station from this country.

The total country count for today is fifteen.

To top it all off, since starting with the DX hobby more than 40 years ago, I have never had so many first time catches in the month of May. A remarkable start to the season!

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

39425. Is this Radio Javan from Iran on 89.0?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-30 21:35:57 UTC
From: davebunyan@...
Topic: 39425 Message: 39425

Some intriquing Qu'ranic reception on 87.9 and 88.0 matching Nick Gilly's recording. Then on 879.0 I was able to extract this recording from the adjacent channel interference from BBC R2 Wrotham (my local). At the end of the recrding the yl can be heard to say "Radio Java.." with the first vowel drawn out ie "Radio Jaava.".

The only match in FMList that I can find is Radio Javan - from Iran - and Nick has already had confirmation that his reception was Farsi. What I don't know, because of fading etc, is whether this yl giving the id is following on from the 'beaty' music or whether that was a different station.

I would like someone to confirm what I heard at the end of the clip - I actually put the id on a second time.

https://app.box.com/s/w8xfg1u3742omg89htee4ob3zinmfgst

the other clips are on skywaves.org

Thanks

David

39426. IBA (Independent Broadcasting Authority) 'Tale of A Tower' -- Emley Moor - YouTube

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-30 22:06:48 UTC
From: Paul R
Topic: 39426 Message: 39426

On 19 March 1969, a combination of strong winds and the weight of ice that had formed around the top of the mast and on the guy wires brought the Emley Moor transmitter mast crashing down, blacking out TV signals for around 6 million viewers in the Yorkshire area. This is a fascinating IBA (Independent Broadcasting Authority) documentary produced in the early 1970s telling the story of the tower collapse, the erection of a temporary mast and the rebuilding of the main Emley Moor TV transmitter mast.

Hi Franco,

exactly!

92.4 is Radio Italia from Lecce - Via Taranto, 175 (LE)
(the speaker talk about email of the radio)

88.3 Sportiva from Rocca di Papa (RM)
Maria From Milazzo-Monte Trino or Mantova (not MAter on this frequency)
Fabrizio

Thanks Hannu. Yes the reception is brief and it is difficult to catch what is being said. Perhaps it is SRR Radio Cluj.
 Good DX.

  Can anyone identify the language in this clip please?:
https://app.box.com/s/v2d3a8lclijuqiiixcutpcc0pv4joiec
I thought it was Turkish but apparently not. I sent it to Kurt Zscherp and he said it sounded like Russian maybe mixed with a Turkic language. This was during yesterday afternoon's mega-lift and it faded up in isolation quite a while after everything else had gone. Thanks and good DX.

Fascinating video. Emley Moor Mast is a local landmark (I can see it and Holme Moss from my home) and Maurice G3MMK who worked there at the time the original tower collapsed was one of my Elmers back in the early 90's.

Thanks for sharing,

David M0OSA

39432. Iraqi listings in FM List / My unid 92.8

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-31 11:03:51 UTC
From: John Faulkner
Topic: 39432 Message: 39432

Regarding my presumed reception of Iraq on 29th, I just noticed that FM List has this listed as BBC World Service (yes, it's taken two days for me to realise this!!!). Yet what I received on the 29th was clearly the BBC Arabic service.

Looking at my 92.8 English BBC ID station, I had no idea what this could be, but Ian Kelly says that the BBC use 92.8 in Kirkuk. This is marked as "unid" in FM List. Has FM List got these listed incorrectly? Maybe 92.8 has BBC World Service. ???

I can't find any audio streams for 92.8. A podcast for the time of my reception would be good. The BBC Arabic podcast matches my reception on 89.0 so that would appear to confirm that.

I am trying to get my head around this but struggling against a lack of time with the grandchildren staying and me getting behind with work in the process.

Here's what I heard on 92.8 again.

https://app.box.com/s/vm6hir6tdpw2yt0t4x5zv57sa4vnod4i

John.

I see there is also a "planned" 200kW Syrian on 92.8.

Clutching at straws now :)

There could also be a vague ID at 32 seconds, just before the jingle:
https://app.box.com/s/vm6hir6tdpw2yt0t4x5zv57sa4vnod4i Sounds like an
Arabic word, but not clear at all.

39440. Iran and Iraq 29th May 2016 - more stations and recordings

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-31 15:48:37 UTC
From: davebunyan@...
Topic: 39440 Message: 39440

I've now gone through more of the wav file download and have got THREE more stations for consideration.

93.9 MHz https://app.box.com/s/zyysj59piqefpeyndgo2wdau14ahhcek https://app.box.com/s/zyysj59piqefpeyndgo2wdau14ahhcek there is a very distinctive bell/clock chime followed by the sation id which sounds like "Radio Nooah". I tracked it down to Radio Nawa (Iraq)- which has a live stream and on the half hour just gone - the same distinctive chime. Listen carefully at 40 seconds into the recording and keep it in mind when you listen to the next one. (And the same distinctive chime/bell and run in format just after the hour today)

Link to Radio Nawa webstream اوەن ڤێدار - FM 89.9 - Baghdad - Streema Player http://streema.com/radios/play/22749 as I can't record the streaming audio into WavPlayer (I messed up the set up). Try on/just after the hour and half-hour.

http://streema.com/radios/play/22749

اوەن ڤێدار - FM 89.9 - Baghdad - Streema Player http://streema.com/radios/play/22749 اوەن ڤێدار, FM 89.9, Baghdad. Listen live plus station schedule, song playlist, location and contact information online.

View on streema.com http://streema.com/radios/play/22749
Preview by Yahoo

89.5 MHz https://app.box.com/s/9y3lfdna45k6vbjrvogksy755nmtxb8e At the beginning of the recording the run up to a news broadcast starts and https://app.box.com/s/9y3lfdna45k6vbjrvogksy755nmtxb8e https://app.box.com/s/9y3lfdna45k6vbjrvogksy755nmtxb8ethe announcer mentions "Ukraine"Just under 1 minute into the recording the presenter says "Parliament Iraq" - but listen carefully beforehand at around 40 seconds - the distinctive bell/chime is underneath - and Radio Nawa from Kirkuk is listed (my 3rd station for consideration). There is also a female 'arabic-type' voice underneath. So what IS the station at the beginning - Ukrainian? and is it the same announcer saying "Parliament Iraq"? it is getting very confusing.

You'll also notice the downside of being so close to Europe - 93.9 has German tropo and 89.5 has Belgian tropo interfering at times

Having slept on it overnight these are my current thoughts - based on the fact that all my reception at the time was on a bearing of 97-100 deg - mostly 98 degrees.

Yesterday's postings:

1. the Quranic chanting on 87.9 and 88.0 - during the time the two were in sync - can only be Turkey either Nagme or TRT1.

2. the station on 89.0 - Radio Javan from Iran - voice id - and thanks to all for confirmation. Tentatively identified as coming from Kuh-e Nuh - 3kw - 4070km/100 degrees - but there are other possibilities including a 100 kw station at Shustar (4420km/100 deg). [But it has be logged somewhere!] https://app.box.com/s/w8xfg1u3742omg89htee4ob3zinmfgst

https://app.box.com/s/w8xfg1u3742omg89htee4ob3zinmfgst

3. the Arabic on 88.0 - IRQ Radio Duhok - Kirkuk (3866 km / 100 deg) - same location as the background station on 89.5 https://app.box.com/s/azhhoyyowzvrhcowd69pt1r23aouxq2t
https://app.box.com/s/azhhoyyowzvrhcowd69pt1r23aouxq2t

4. the Arabic on 91.5 - IRQ Babar Gurgur Radio - Kirkuk (3866 km / 100 deg). It has been pointed out that in this recording the announcer is saying "Lebanon" in arabic. This would be a very different direction to all my other loggings - but half an hour later TV from Jordan on Ch E£ was received in Sorn nr Ayr - so it can't be ruled out.
https://app.box.com/s/57qeetgx48nmf4v5m19v9zndmdytpapo
https://app.box.com/s/57qeetgx48nmf4v5m19v9zndmdytpapo

Today's postings

5. The station on 89.5 with announcer saying " Ukraine" near the start and "Parliament Iraq" about a minute later. Is this two different stations??

6. The station on 93.9 MHz with the distinctive bell/chime - Radio Nawa (Iraq) on an unlisted frequency.

More feedback would be appreciated - looks like the 29th has been a good day for more than one DXer.

By the way - where do I find the RealDX yahoo group - I can find reference to an e-mail to RealDX{@}yahoogroups.com but can't find the group.

David

Topic: 39440 Message: 39443

Hi David. Superb recordings! Amazing getting Iraq as well.
Can I ask - that 3rd recording of 88.0 - isn't that the announcements from the Quranic station that was also on 87.9? It sounds like the same clip from last night. On that recording the Quranic prayers stop at 23 seconds and then after a few seconds the birdsong and announcements start. So as the language on the clip is Arabic, then that would probably rule out Turkey for these signals. I wonder if they came from Syria? On FMLIST there are unid stations listed on both 87.9 (northern Syria) and 88.0 (listed with 100 kW). Maybe they both carry the same station?

Since we both had Iran on 89.0, we almost certainly had the same tx site. For me, it was coming in more-or-less from the east, and looking at FMLIST, the nearest high power site (98 kW) is Ahar/Kuh-e Qezel Qayah which is on a bearing of 91 deg from here at a distance of 3987 km (a bit closer for you). This is the presumed site I have mine down as.
As for Real DX, hopefully you should be able to join from here:
https://groups.yahoo.com/neo/groups/realdx/info Good DX.

Hi John,

I am trying to listen to your audio clips, but get this: Could not connect to the requested server host.

Is something wrong on my side or is the app.box server down?

73,
Janpeter

Onderwerp: [SkywavesDX] Iraqi listings in FM List / My unid 92.8

Regarding my presumed reception of Iraq on 29th, I just noticed that FM List has this listed as BBC World Service (yes, it's taken two days for me to realise this!!!). Yet what I received on the 29th was clearly the BBC Arabic service.

Looking at my 92.8 English BBC ID station, I had no idea what this could be, but Ian Kelly says that the BBC use 92.8 in Kirkuk. This is marked as "unid" in FM List. Has FM List got these listed incorrectly? Maybe 92.8 has BBC World Service. ???

I can't find any audio streams for 92.8. A podcast for the time of my reception would be good. The BBC Arabic podcast matches my reception on 89.0 so that would appear to confirm that.

I am trying to get my head around this but struggling against a lack of time with the grandchildren staying and me getting behind with work in the process.

Here's what I heard on 92.8 again.

https://app.box.com/s/vm6hir6tdpw2yt0t4x5zv57sa4vnod4i

John.

Hi Pedro,

This is valuable information. Could you ask Salah if he has more information on FM stations in Algeria? Or if he could provide some web site URL's where information can be found?
We have too many UNID txs in Algeria, we need help!

Thanks,
Janpeter

I've never known Box to go down before.

This will give me a chance to get all the files uploaded and linked.
I'll post again shortly. Maybe to morrow now. Of course I'll have to
wait until Box are back online.

39452. Re:: Information about radio station in Italian

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-05-31 21:32:11 UTC
From: Dario Gabrielli
Topic: 39314 Message: 39452

In Great Britain I know that exists two radio stations that had an
Italian program direct to Italian emigrant. LIFE FM 103.60 in Harlessden
Brent and BBC Three Countries Radio 95.50;103.80 and 104.50 FM in Luton
but now I don't know if broadcast in Italian.

Good DX and Thank you

Dario

.

I thought it was Turkish but apparently not. I sent it to Kurt Zscherp and he said it sounded like Russian maybe mixed with a Turkic language. This was during yesterday afternoon's mega-lift and it faded up in isolation quite a while after everything else had gone. Thanks and good DX.

Nick, Whitchurch, Hampshire.

Bits of Es today to Spain, N Africa and Italy.

Managed to record some streams while at work, and caught the Spanish opening after 1600 and the Italian opening a couple of hours later.

Map and logs:

39458. Band 2 Unids: 29-05-16

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-01 08:22:40 UTC
From: notmyregularemailaddress@...
Topic: 39458 Message: 39458

Here's the complete list of unidentified stations from May 29th.

I know there are a lot, but any help would be gratefully appreciated. This was the best session of double hop I have ever known.

The Arabic / exotic music stations are the more interesting as the propagation path suggests these might be from Iraq or Iran. I am also baffled by the BBC ID on 92.8. BBC WS Arabic was received on 89.0 around this time. I just hope there are some clues in the Arabic speech.

Thank you for your help.

Hi Jurgen,
Yes thats really interesting. The signal got really strong here for a while, but (don't tell anyone) I am dxing through a teamviewer session at work today and its very slow and difficult via WiFi ! At least it enabled me to catch Jordan for the first time this year which I would have missed otherwise.

Regards
Paul

Thank you Niels.

I need to find out if the listed service is English and hopefully find a
podcast or something which might have that jingle.

Best wishes.

John.

Topic: 39440 Message: 39471

Hi Nick,

I've gone back and carefully checked. The recording on 88.0 with the bird id is different to the chanting on 87.9 at this time. On 87.9 the chanting goes on and on - on 88.0 we have the om talking in Arabic. Having said that having listened very carefully the first of the two bird calls is under the main signal - so we've got a 2nd arabic station on 87.9. It isn't Iraq as there is a positive ID for Radio Javan on 89.0 - an entirely different recording.

87.9 improves at around 1303 UTC with chanting and I've re-done the recording with lower bandwidth to make it slightly clearer - near the end there is an om talking - maybe someone can identify the language here as well - but it is not that clear.

https://app.box.com/s/vgt2a0itxji0a46n4l4x907zi955qg46
https://app.box.com/s/vgt2a0itxji0a46n4l4x907zi955qg46

At one point 87.9 and 88.0 appear to be the same program - but not most of the time. So still a mystery - the bird song "id" is a big clue.

So I am back to full circle - the bird song is associated with an Arabic om speaker. It can be heard faintly on 87.9 - diffferent to the Quranic chanting. I can't help thinking that it is Iraq - but no Irag station is listed on 87.9 and only R Javan is listed on 88.0. Mind you R Nawa is not listed on 93.9 - but it was received with 100% id with these others

FMList has Syria on both frequencies with the one on 88.0 being 100 kw - so maybe the Arabic station on 91.5 is Lebanon. In which the propagation path is different and would have to have been a multiple hop without an intermediate ground point.

Tantalising and frustrating. BTW the file from 88.0 has accidentally bee n labelled 88800kHz - definiely 88.0

David

Thanks Dave. So that would suggest that 87.9 and 88.0 are different stations but maybe network for prayer times. Difficult to tell but it sounds like the OM is speaking Arabic on your redone 87.9 clip.
"In which the propagation path is different and would have to have been a multiple hop without an intermediate ground point" - which would be chordal hop. I wonder if this was involved too because the cloud propagating the distant Middle eastern stations was over Turkey and I would have thought that in theory would have been too distant to access here in the UK via a 'simple' 2 hops. It's certainly fascinating and intriguing stuff this radio propagation lark!
I hope you can get some more IDs as it would be helpful to both of us.
 Good DX.

From: Németh József
Topic: 39457 Message: 39473

Hello Peter,

On 90.2 and 94.3 are MR1 and MR2 from tx Nagykanizsa, on 95.9 is MR1 from tx Pecs. On 101.5 is MR1 from tx Csavoly, and the end of Unids3 clips is a hungarian station too, maybe MR1 from tx Szeged on 90.3.

regards,

Jozsi from Hungary

39474. 87.9 Radio Vratsa BUL Radio Fokus since Apr 22nd

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-01 19:43:53 UTC
From: nick gilly
Topic: 39474 Message: 39474

Found a 'Radio Fokus jingle on 87.9 on a recording from the Balkan opening from 30.5.16.
This appears to be the new name for Radio Vratsa, from the Vratsa tx site:

39476. Sporadic E Loggings for 2 June 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-02 22:45:37 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 39476

Hi All,

It took a while before this evenings Band II Sporadic E opening developed into a decent top of the band opening. The start of the session, with propagation into Italy, was extremely messy. Very unstable and generally weak signals, with nevertheless three or more signals on each frequency. I hardly could use anything in this timeframe.
And then the opening was trying to pull several tricks on me. With the propagation switching between Italy, into the Balkans and suddenly into Spain. And back again, while I was still turning the antenna towards Spain. At the same time I heard several strong signals carrying BBC Radio 2. This was again the backscatter Es, or maybe better in this case, side scatter Es. While this happened, also BBC Radio 2 from Gibraltar was audible. I was close to getting completely lost on what I was receiving. Very, very fascinating stuff. And highly unusual all of this.
This season continues to impress me. And we have only just started.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Hi Peter,

two suggestions.
Radio Italia Anni 60 has regional avertisements; in your recording, you can hear the one of this company: GZ Consulting Gianluca Zamagni Broker Pesce Vendita Prodotti Surgelati Congelati Trade IGT http://www.gzconsulting.net/

http://www.gzconsulting.net/

GZ Consulting Gianluca Zamagni Broker Pesce Ven... http://www.gzconsulting.net/ La GZ Consulting si occupa di trade a livello nazionale e internazionale.

View on www.gzconsulting.net http://www.gzconsulting.net/
Preview by Yahoo

They are located in Rimini (Emilia Romagna) so it seems that the most likely location is Castel San Pietro Terme/Monte Grande (BO) who is in the same region.

Radio Maria on 90.5 might come from Emilia Romagna too, but unfortunately there is 4 different possible locations :

Castel San Pietro Terme/Monte Grande (BO)

Monte San Pietro/San Lorenzo (BO)

Savigno/Monte Pastore (BO)
and

Sestola/Roncoscaglia (MO)

73's and good dxs!

Thanks for watching the video, and thanks for the suggestion. My Italuan isn't good enough to hear it was a regional ad.

At that time other stations were coming in from Bologna.

Peter

A strong opening to first of all Romania and the Balkans, mixed with North Africa and later Spain well after the prop to the south-east had faded. Around 1645, the MUF rose all the way to 144Mhz to Romania and the Balkans, a reminder of my very first experience of Es on this same date back in 1985 in the shape of a 2m contact in present-day Croatia.

The opening eventually faded around 2000 here. Quite a number of unknowns which I will post separately.

From: nick gilly
Topic: 39486 Message: 39486

Hi all.
I recorded this clip during the chaotic Balkan opening on June 2nd, which starts with Otvoreni Radio from Zagreb but which is subsequently replaced by an UNID station with a YL speaking accented German (first appears at 1 min 15 sec):
https://app.box.com/s/y2163oue2kupbkkzpcdzq844frock33j
There is then a sung jingle starting at 3 min 27 which sounds like "Radio Reginthal" followed by schlager. I can't match the jingle with anything in FMLIST. Judging from the accent of the speaker, I was wondering if it may have been in the Südtirol region.
Any help with this much appreciated.
 Thanks and good DX.

Nick, Whitchurch, Hampshire.

They do have German Language programmes, but time doesn`t fit here.
Maybe the relay of Radio Neumarkt, and the jingle of Radio Romaina Resita inbetween ?

Great Catch anyway :)

73!

Thanks Arvid. No the jingle is definitely the German language station. The accent of the speaker sounds Alpine to me. Austria was also coming in at the time.
Is the jingle saying "Radio Region Thal"? Not sure. Region Thal is in Switzerland. Hmmmm. Seems a bit unlikely but you never know. Good DX.

39492. Re: Germany uses a different DVB-T2 standard

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-04 09:35:39 UTC
From: Chris Thatcher
Topic: 39491 Message: 39492

Hi Jurgen,

Yes it is a mess. The new standard to be used in Germany is DVBT-2 with H265 (AVC) codec.
Your receiver probably uses the standard we use in the UK, which is DVBT-2 with H264 codec. That's why the UK will not use H265 AVC (Advanced Video Codec), because all DVBT-2 H264 devices currently in use would immediately become obsolete.

Best regards,

Chris. (Lincoln, UK).

From: franco289@...
Topic: 39495 Message: 39495

Hello everybody,

I am looking for a simple software to download in my pc, and I need your suggestions.

I might wish to connect my DE 1103 to my pc, to record what I listen during Es openings (the purpose is clear: storing a trace of my rare dxs, and trying to reduce my Unids). And so, I need a free and user-friendly software and I also need to know if the jack to insert in my Degen might be "stereo" or "mono".

Thank you for your replies and many 73's

Franco

Yes Norway has been in at weak levels on 91.8/98.7 (Bjerkreim) and 91.1 (Bokn) this morning.
 Good DX.

Thank you Ole.

They're still coming through here now. Signal is slightly lower so no PI code.

Regards.

John.

Hello Paul,

The ID on 106.8 sounds like Opus Radio to me.

The music that pops up interrupts the end when she is giving some significant info.

Peter

Holland here in Huddersfield with the car radio and a discone in loft connected to my Elad S2. Nearly all stations are fully quieting and full RDS.

Good DX, David

Hi Paul,

I have a good clue for you

EMUN FM seems to be a network of small local broadcasters.
EmunFmRadio http://www.emunfmradio.cat/

EmunFmRadio http://www.emunfmradio.cat/

View on www.emunfmradio.cat http://www.emunfmradio.cat/
Preview by Yahoo

107.2 is very likely broadcasted from Alferràs, while 107.1 comes from Radio Corbins.

Hi Paul, concerning 106.8 please consider that c in "L'Arboc" is not c, but is a ç. Her pronunciation is more similar to a "S" than a "C".

That's why I think that your identification is right.

Stereo signal coming in strong at 101.2fm. RDS tells me this is Bremen 4.

Also getting the Norwich transmitter of R4 and Classic FM coming into Slough strongly, with a stereo signal.

Wow I had to quickly put up my 5 element for some chance of these, it's not very high but Bremem 4 quite strong with me and also on 100.8, plus German Classical station on 101.8 ?

39519. Band II Tropospheric Loggings for 5 June 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-06 07:42:33 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 39519

Hi All,

A truly superb day for Band II tropospheric DX yesterday. Bringing around the clock DX and the best opening into Scotland I have ever had. Whereby a lot of main tx-ers produced instant RDS signal levels. In addition a couple of handsful with gap fillers were audible, some at decent strength. It has been long ago since I had so many first timers during a tropo DX session.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

39520. Es and Tropo log 5th June 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-06 07:51:06 UTC
From: Jim Smith G0OFE
Topic: 39520 Message: 39520

Tropo was the main headline here, with a bit of Spanish and north African Es being the filling in the sandwich.

In the morning the path opened up to Norway - though there was no sign of the more extensive openings those further north enjoyed. This path persisted on and off till early afternoon.

Norway returned briefly mid-evening, but the path to north Germany opened up as well, and some Dutch stations (usually a struggle here due to cross-polarisation) also logged.

Logs and map: http://www.fmlist.org/fm_logmap.php?datum=2016-06-05&omid=2748

I am at home on leave this week, which is a cue for the Es to take a dormant break as happened last year!

==========

Jim, Bournemouth, Dorset. IO90BR.

39523. Norwegian DAB - Tropo - 6.6.16

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-06 08:24:31 UTC
From: chris.thatcher123@...
Topic: 39523 Message: 39523

Hi folks,

At approx 8:30 BST Norway was booming in on DAB/DAB+. Sounding really good. Just look at the bit-rates! We (UK) could learn something here!!

Does anyone know the likely transmitter and it's location?

Hi friends,I need help with this one from the big openning on June 2nd. On 101.8, in a mix of
German stations (+ MaximaFM, Almendralejo, 70 km from my QTH) I heard this
ID or slogan. It also sounds German to me...Thanks for your help. 73!

39529. Is it possible to identify individual DAB transmitters?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-06 12:32:34 UTC
From: davebunyan@...
Topic: 39529 Message: 39529

I got all excited yesterday and threw together a 3 ele DAB yagi out of spare aerial parts. It helped thjat I had already made a dipole with a parasitic aerial earlier.

Results were unexpectedly good with Dutch ensembles and German ensembles received as well as the Norfolk and Northamptionshire ones on 10B and 10C.

It looks like the transmitters should carry data identifying it specifically - TII Main id(Hex) and TII Sub id(Hex) - but DABPlayer doesn't display this. Do any DAB radios have this info accesible. To quote from the OFcom Tech Parameters web-page Tech Parameters http://stakeholders.ofcom.org.uk/broadcasting/guidance/tech-guidance/tech_parameters/

http://stakeholders.ofcom.org.uk/broadcasting/guidance/tech-guidance/tech_parameters/

Preview by Yahoo

"The Ensemble will normally be broadcast from a number of transmitters on the one frequency; this is known as a Single Frequency Network (SFN). Certain makes of radio enable the listener to identify which particular transmitter within an SFN is the dominant one in a given area, which can be useful in orientating receive aerials. Each transmitter carries its own Transmitter Identification (TII) codes and these 2 digit 'main' and 'sub' codes are also included in the spreadsheet, but be warned that they are stored in ‘hexadecimal' form, so you may need to convert them if your radio presents them in 'decimal'. "

That would make DAB-DXing a lot better if it is actually a part of every transmitter's data stream.

BTW I am currently listening to Radio Gelderland on the 8ARandstadNl ensemble - DABPlayer is reporting 14dB signal level which has risen from around 6dB in the last 15 minutes. Ensemble 9D Noord-West NL has just kicked in again at 9-10dB

This is what I received in the late evening of 05 June 2016. This morning so far no German MUXes found

DAB log using sdr-j dab

5B HOL MTVNL Rotterdam, Goes or Rijswijk – data only
5C D DR Deutschland carrying Deutschlandfunk and DR Kultur
6B D DR Deutschland carrying Deutschlandfunk and DR Kultur
8A HOL Randstand
9D HOL Noord-West NL
10B G Norfolk Norwich ensemble

10C G Northamptonshire
12C HOL NOS – data only

Local DAB MUXes that are giving reception

11A SDL National
11D D1 National
12B BBC National

DABPlayer for me is much more sensitive than sdr-j dab - I had no reception from the Essex ensemble at all on the sdr-j - but 17 dB S/N ratio on DAB Player.

David

Hello Mauricio,
I think you are correct, but the DJ says "ganz neuer Radio" - ("pretty new radio"),if my ears don`t fool me :D, and then possible ID which drowns in the interference.

According to Ofcom's Technical Parameters fro DAB your Roberts radio may be able to access the TII codes to give the precise transmitter Tech Parameters

I've the same problem - identifying the transmitter, but with a couple of the German ones I reckon I pin the location as beoing the same as the analogue stations receioved at the same time - so Aurich and Bremen. The Dutch - one would likely be Rotterdam.

I've installed DAB Player and it is much more sensitive.

David

thanks Arvid. Some seconds before there was a jingle of "Die Neue Welle" between two songs, so all points to the same station.

Hi David,

I've looked at my Roberts radio. There is a fair amount of info available (such as bit-rates), but nothing regarding transmitter sites, as far as I can see.

It would appear that the Norwegian transmitter is located somewhere in the Stavanger area, the far south-west of Norway. This would make sense, as it's the shortest distance to my QTH.

All Norwegian gone now, but I'm still receiving Freez FM on DAB 9D (Noord-West NL) from Netherlands.
Best regards,

Chris. (Lincoln, UK).

I don't know of any modern DAB+ radio which can display the TII codes...nice of they did though doesn't the dab player software show this ?

DAB is designed to be used in single frequency networks, where proper sync of all transmitters is important, as all tx transmit the same stream and the receiver combines from various tx signals.
The TII signal is therefore not part of the stream but radiated on a much "lower" level, i.e. it is coded in adjacent carriers on an OFDM symbol.
As it is not in the stream, and the NOXON API does not allow access to the OFDM layer, DAB Player cannot display it. And most other DAB receiver chipsets can't.
I've always wondered how sure the OFCOM statement sounds - so there must be (or have been) at least one consumer-level DAB radio that can show it.
The alternatives come from Rhode&Schwarz and cost 30 k€ or more. I've seen such a beast once, it showed up to 4 transmitters contributing to the reception.

73,
Günter

Hola Mauricio!

For me (via little Genelec monitors;) and no headphones sounds like..in my opinion.."...Radio ..eben" (so its Radio Sieben = 7 BWy region). German dx'ers maybe say something else, but still..
my 2 cents,
Hannu

"Ganz neu auf Radio ... hier ist ..."
The signal fades down when the station name is mentioned (Murphys law). But there are traces of the word "Sieben" = 7, the fist sillable is there.
So this is Radio 7, 10 kW from Ulm.

73,
Günter

An update. My recording has now been confirmed 100% to be IRIB Radio Javan thanks to help by Mauno Ritola on the WRTH Facebook group. There is a podcast of the programme I received here:
http://radio.iranseda.ir/LightBox/?ch=13&d=5%2F29%2F2016%205%3A00%3A00%20PM&t=17%3A00&title=%D9%81%D8%B1%D9%85%D9%88%D9%84-%D9%8A%DA%A9-%D8%B2%D9%86%D8%AF%D9%87
The audio matches my recording roughly from about 16 - 23 minutes on the podcast.
As for the transmitter site, who knows? However, receiving Iran on FM has been a personal goal of mine since Günter posted his clips of Iranian double-hop in 2010. I thought it might have been impossible from the UK, but as May 29th has proved, never say never!
 Good DX.

Nick, Whitchurch, Hampshire.

Subject: Re: [SkywavesDX] Es 29.5.16 including double-hop to Iran   The programming was studio talks with a YL moderating. The distance to the Radio Oman Quran tx is 5490 km. Which I now realise is a bit much for a double hop. On the same path Qatar and Bahrein would also be a possibility. With Zoetermeer - Doha at 4922 km. I do not know the ITU country code for Bahrein, it seems not to be included in FMLIST.Should the length of both hops be similar I wonder? If the second hop has been shorter, then Iraq and Kuwait become a possibility. 73, Janpeter Van: "nick gilly nickgilly@... [SkywavesDX]" <SkywavesDX@yahoogroups.co.uk>

Onderwerp: Re: [SkywavesDX] Es 29.5.16 including double-hop to Iran   Thanks very much Janpeter. I wonder why there is so much extra activity to the east this year so far? Normally common countries such as Spain, Algeria and Italy have been conspicuous by their absence. Maybe a weak jet stream or unusual weather patterns? What sort of programming did 94.0 have? And what is the distance to the Radio Oman tx to your QTH? Good DX. Nick, Whitchurch, Hampshire. Kenwood L-1000T, Yamaha T-2, Sony ST-SA5ES, Denon TU-800L, Kenwood KT-1100SD (modified), Yamaha T-85, Sony XDR-F1HD tuners, horizontal Körner 9.2 beam (Antennenland version), Yaesu G-450C rotator   On Monday, 30 May 2016, 7:30, "Janpeter van

Dijk janpeter_van_dijk@... [SkywavesDX]" <SkywavesDX@...> wrote:

Congratulations with getting Iran Nick! Very well done. You are quite right that this season is off to a remarkable start, with some unusual skip patterns. With a higher than normal amount of double hop. More than you I was right in the middle of the single hop skip, bringing lots of fun but also a completely congested band. I had just one Arabic language station on 94.0 MHz with studio talks, no ID. This was when Bulgaria was very strong. Assuming the first hop bounced off the south west tip of the Black Sea, then the second hop lands in the UAE, Oman or South East Saudi. Given the nature of the transmission, I would not expect this to have been Saudi though. Which leaves UAE and Oman. Based on FMLIST the only candidate is then Radio Oman Quran. But nothing is for sure here unfortunately. 73, Janpeter Van: "nick gilly nickgilly@... [SkywavesDX]" <SkywavesDX@...>

Onderwerp: [SkywavesDX] Es 29.5.16 including double-hop to Iran Well, this was a day to remember. Whilst there wasn't a big blockbuster opening here with lots of logs, there was an opening in the early afternoon that commenced with some very unusual double-hop. It started at 1238 UTC with jazz on 88.0 which faded out only to be occasionally punctuated with snippets of Quran prayers on 88.0. I knew this was double-hop as the signal was peaking more-or-less east and the MUF map showed a large cloud over Europe linking up to a very intense cloud over Turkey:

https://app.box.com/s/rg8hi8d3c7a64jqc5i3b37hzu4gh8xnl

87.9 also had an unidentified Quran station on, and unfortunately IDs were not forthcoming on these stations:

https://app.box.com/s/6pcteibmqxdbvjd3te4lpzbeleakn1pu

However, at 1243 UTC I came across a station on 89.0 with talk, which turned out to be in Farsi. It sounded like an OM in the studio talking to another OM on the phone, and at this stage I was thinking maybe I was imagining things:

https://app.box.com/s/4re18oo3w00xlpfs1wc04v5rj4hm5kui

This is probably an outlet of IRIB Radio Javan, the most likely site being Ahar/Kuh-e Qezel Qayah which is the nearest big tx at a distance of 3987 km/2477 miles! Thanks to Paul Logan and Victor Rutkovsky for confirming that this was Farsi and therefore Iranian in origin.

Shortly after this single-hop stations from Hungary & Romania took over the band, up to around 101 MHz. One Romanian that was IDed was Digi FM on 91.4 from Gheorghieni/Harghita-Băi at 2033 km:
https://app.box.com/s/rcdfjfwl97nq1xn1n98v4xej6wewucxm
At around 1350 UTC there was another brief fade-up on 87.9 of exotic-sounding music and a YL on the phone talking to the OM host in the studio in Turkish, but I'm not sure if these were one station or separate ones.

Apart from a brief Italian taster earlier this evening that has been it for today.

So, my first ever reception of Iran on FM here! I still can't believe this happened. It's still only May too and it makes me wonder what is going to happen next? Good DX. Nick, Whitchurch, Hampshire. Kenwood L-1000T, Yamaha T-2, Sony ST-SA5ES, Denon TU-800L, Kenwood KT-1100SD (modified), Yamaha T-85, Sony XDR-F1HD tuners, horizontal Körner 9.2 beam

39540. Tropo / Temperature Inversion

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-06 17:24:35 UTC
From: John Faulkner
Topic: 39540 Message: 39540

While at the new Gibraltar Point Visitor Centre this afternoon, I took a few photos out over The Wash from the viewing platform. The platform is no more than about 20 feet above the ground.

When I returned home, I used a distance-to-horizon calculator and I discovered that the visible horizon at only 20 feet above the ground is only 5.5 miles, yet I could clearly see the other side of The Wash some 15 miles away, plus a few vessels about ten miles down the coast, seemingly floating in the air. I didn't think anything of it until I entered some data into http://www.ringbell.co.uk/info/hdist.htm. So what I was able to see was only possible because of the temperature inversion. I guess this all ties in with the level of tropospheric ducting is in the atmosphere at the moment.

German signals from the Aurich and Steinkimmen transmitters are S9+50dB here in broad daylight. This is a BIG tropo and, with a bit of luck, it will spread elsewhere inland this evening.

Good DX!

John

AS subject.

If you know him, a kindly quiet word would not go amiss.

He is logging on FMList - tropo to Norway, as Es.

Unfortunately this is causing issues with false high MUFs on DXMaps..

He is not the only one, unfortunately.. a number of amateurs have been falsly logging 4m tropo as Es over the past couple of days, with similar effects.

Hi All,

The Northsea has turned into a large refractive area. Today was day number two with around the clock DX. Making this a very good tropospheric Band II spell. Which I had not expected based on the forecast maps.
As I type this, things are still going very strong.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Thanks Tim.

Les is very welcome to use them if he want to, but I didn't think they were that great. They were taken with a 300mm lens at full zoom, but the camera, a Nikon D7000, has seen better days. It used to reliably take high quality photos, but it's not been the same since I dropped it on concrete from 8 feet. :(My 18-35mm lens didn't survive.

I'll take photos of the same areas once the tropo has subsided and see how much difference there is in the visibility.

John

Hi Jim,

Good that you mention this. I have seen a lot of these mistakes the past weeks. A guy in Germany that was logging all Es as Aurora Es, Es as tropo, tropo as Es like you mention, etc.

Making these remarks is one thing, what to do about it is somethin else. I am assuming that the DX-ers simply click the wrong box when they start their DX session. I am not sure that an automated warning system could be programmed, that would send a note to the DX-er in case an unlikely propagation mode is reported.

73,
Janpeter

Onderwerp: [SkywavesDX] Does anyone know David Visser (HOL) ??

AS subject.

If you know him, a kindly quiet word would not go amiss.

He is logging on FMList - tropo to Norway, as Es.

Unfortunately this is causing issues with false high MUFs on DXMaps….

He is not the only one, unfortunately.. a number of amateurs have been falsly logging 4m tropo as Es over the past couple of days, with similar effects.

I think a clear reminder at the top of the logging screen reminding users to be careful to log the correct prop mode might be an idea, allied to a pop-up box to similar effect when someone goes to enter a log for the first time in each login session.

Perhaps a similar reminder to “Are you logging live? If not, check your times!” if not logging live too. I know I have put in a log as “now” when catching up the day after a busy Es opening, for example. Oops!

I don’t know how easy that would be for Gunter to implement…

Hi Andy,

June 5th and 6th were very exciting - I haven't begun to log the tropo reception on FMList to any extent - I was relying on RDSDatalogger on the SDRPlay withRDSSpy whilst playing with DAB etc.

June 5th 23:00 local time
8A Randstad NL
9D Noord-West NL
12C NOS - data only

June 6th 00:30 local time
5C DR Deutschland.

June 6th 07:00 local time
5B MTVNL
5C DR Deutschland
6B DR Deutschland
8A RandstadNL9D
10B Norwich
10C Northamptonshire
12C NOS

Jun 6th 21:00 local
10B Norwich
10C Surrey. N Sussex
10D HeartsBedsBucks
9D Noordwest NL

Jun 7th 00:45 local
12A VRT DAB
12C NOS - now with sound

The most persistent DX was 9D Noordwest NL, NOS and Norwich. It all faded out by late morning but right now (16:06 BST) the following are giving sound

5B MTVNL, 8A Randstaad NL, 9D Noordwest NL, 12C NOS - just managed with a few stutters.

I wonder how long it will go on for?

David

May I remind all users of DAB Player software to generate CSV and FIC files of their DX logs (and also of local stations) - these files are used to keep DABLIST up-to-date.
Details: www.fmlist.org/noxondab and
http://www.myradiobase.de/fmlist/How-to-export-DAB-FIC-Multiplex-Configuration.pdf

Good DX, be it analogue or digital!

Hi All,

Today was a busy day for a DX-er. In the morning there were some nice remains of the big tropo event of the last two days. Shortly after the tropo had subsided, an Es OIRT opening developed.
More fun came in the evening, when a good Es opening into Turkey showed-up on Band II. So the tropo is gone and the Es is back. A nice swap I would say.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

From: ilkka suni
Topic: 39562 Message: 39562
Attachments: 1 described; binary payloads are missing from this source WARC

Due to Risto banning me from the dx-hardcore mailing list, after I finally brought up the coffin [see photo attached] delivered to my front door during the Finnish DX-Council year 2001 summer meeting, I am no more able to deliver Es alerts via the dx-hardcore list. So being, in case I have immediate Es info to the finnish FM listeners, I will do so via the DXmaps.

There must be a way to re-purpose the coffin; possibly take off the lid,
turn it on its side, and use as an LP cabinet?

Open well.. sort of..) to the Balkans at the time.

92.4 PI 80F0; rolling PS "LASI, REKLAM"

Playing local music. Didn't stay in for more than 15-20 seconds.

If anyone can offer a clue, I would be grateful.

Hi Peter,

you were receiving the starting of the news af 13h. broadcasted by In Blu Circuit.
It seems that, on 88.7, there is one and only radio who broadcasts it:
88.70 BluradioVeneto-inBlu Teolo/Monte Grande (PD) BLURADIO _VENETO_ 5A7F
73's

39582. Band 2 Es logs - 8th June 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-08 18:20:11 UTC
From: Jim Smith G0OFE
Topic: 39582 Message: 39582

An early start with the band open as early as 0600 here to Finland. Nothing loggable as the couple I had were multis.

Annoyingly I had to take my car for a service just as things opened a bit more around 0630, and by the time I fought through all the school-run traffic and got back an hour later it was just about all over, with a little CZE/SVK prop up to 0815.

Those further east continued to have conditions for a further couple of hours - how many times have I said that this season... I think I may have to move to the Norfolk coast!

Finally a 2 minute tease to ALG and Spain around the middle of the day, and that was that.

Recorded a stream while I was out and managed to pull out a few Balkan/Romanian stations.

Map and logs:

39584. FM-DX Loggings for 8 June 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-08 19:44:06 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 39584

Hi All,

Another swap totday. Not with the Es, this stayed. But the tropospheric conditions made a return. And how! Conditions deep into Germany whereas simultaneously Scotland returned with a big bang. With the antenna beaming east, I still got instant RDS from Meldrum. And I am using no less than a Körner 15.11!
Add to this a good Band II Es opening into Belarus, with occasional flurries from the Balkans, Ukraine and Italy. Making up the ingredients for a totally insane Band II DX morning. All in all a great DX day!

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

From: Christian Stödberg
Topic: 39592 Message: 39592

Hi!

Next weekend, my local HAM-radio club will have an antenna testing field day and I think this is a great opportunity to test DTV DX.

First of all I will try to receive Norway (Halden) and the Denmark (Tolne/Nibe).

But then, my question is: Is it possible?

In the good old days we could receive daily TV from Norway on E11. But now everything's digital. FM can be heard weak but readable.

The transmitter in Halden stands 320m above sea level and is 280m high. I will stand approx 120m above sea level with free view in the local area towards north and west.

The transmission channel from Norway is E32

But I have some hights between me, Denmark and Norway, some around 200m.

And then Denmark. It is and was hard to even receive FM and TV in Göteborg just on the opposite side the sea from Denmark. The transmitter in Tolne/Mossbjerg is aimed away from Sweden and I think Nibe outside Aalborg is a bit too far away. The tower in Tolne is just 155m high and stand approx 50m over sea level. It uses E29 in a single mode network.

One can receive FM from Denmark if you're just beside the sea along the swedish westcoast. But FM can be received just where on the mountain will be have our field day. Norway can be heard weak as far as Göteborg.

Nearby me I have two strong transmitters on E28 and E31 and one strong on E30.

I will use a 75el antenna with 34dBi gain inclusive preamp. (Televise DAT HD-75)
Will it be better with two antennas stacked?

Distance to Halden/Høiås: approx 113km
Distance to Tolne/Mossbjerg: approx 147km

Do you think it's possible or just a dead end?

Will my nearby transmitters interfere the weaker neighbour channels ex E29 and E32?

73 de Chris

Hi Chris,

what kind of receiver do you plan to use?

73,
Günter

Hello Chris!

How long will your feeder be? The preamplifier can be a blessing, or a curse. It's not
uncommon for a preamp to overload or block the recevier if you have nearby transmitters
on adjacent channels. Be aware of this. I myself always prefer more antenna and less
electronics on top of the mast.

Regards / Nick

39597. FM-DX-pedition started in SW-Finland

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-09 13:32:01 UTC
From: harriku@...
Topic: 39597 Message: 39597

Hi all,

Traditional Finnish FM-DX-pedition started yesterday. There are 6 FM-listeners in far distant Utö island in SW Finland (about 70 km from the continent). The size of the island is about 1.5 x 1 km. The pedition lasts for 10 days from Wed 8.6 till Sun 19.6.2016.

Daily report can be read from http://www.fmdx.tk http://www.fmdx.tk

The previous years' diaries are in http://uto-fmdx.blogspot.fi/, http://uto-fmdx.blogspot.fi/ but because I can not participate the pedition this summer the web-address is changed. Usually the crew number is 8.

This is the 8th time in a row for Utö-FM-DX-pedition.

39599. China heard in Finland again on FM

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-09 14:24:46 UTC
From: harriku@...
Topic: 39599 Message: 39599

DX-news here,

Jussi Suokas in East-Finland in Joensuu heard China on 89.5 MHz on the Wed 8th June 2016.

It was audible even for 10 minutes fading in and out.
This station is Xinjiang Luse Guangbo PBS (Green Radio). The distance is about 4100 km.

The station is identified by China specialists among Finnish AM-DXers and talking items on the recording were
also confirmed to be from the Xinjiang area. Audio confirmed by CRI and native Chinese.

At the same time RUS Tuymen-stations were audible on CCIR-FM from the first skip area.

On 14th May 2016 Lars Lahti in North Sweden, Haparanda (near Tornio, Finnish boarder) heard three chinese stations.It was spotted to be Yili RGD. Distance far over 4000 km (4400 km?). It fits to the lists as on 88.4 the language was uigur.

The audio-clips from Lars Lahti's catches are here
http://bbs.fmdx.tk/index.php/index.php?topic=421.0
http://bbs.fmdx.tk/index.php/index.php?topic=421.0
A few years ago Markku Sollo (East Finland) heard Chinese stations first time in Finland on FM. It seems those signals and this 89.5 came from the same tower from China.

Hi!

It will be on a temporary mast/pole. The feeder will be not more than 10m long.

Two of the transmitters are within visible area, 10km and 25km.

The nearest has 0,5kW ERP and the two other 50kW ERP.

39602. France Musique on 101.6, which site please?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-09 16:58:37 UTC
From: nick gilly
Topic: 39602 Message: 39602

Hi all.
During this morning's tropo conditions I logged a France Musique outlet on 101.6. According to FMLIST, the likely candidate would be the Gérardmer/Bois des Rochires site, judging from the direction it peaked at. This is listed as 250 watts vertical and is 688 km from here. However, I wonder if I had a different site. The signal was coming in well and replaced what is normally Breeze Four Marks, and was, I estimate, nearly at RDS level. I think it would be highly unlikely that such a low power tx at that distance would come in so well on a horizontal beam. So, could there be another, closer site that I could have picked up? Maybe a new tx? Thanks and good DX.

Nick, Whitchurch, Hampshire.

Kenwood L-1000T, Yamaha T-2, Sony ST-SA5ES, Denon TU-800L, Kenwood KT-1100SD (modified), Yamaha T-85, Sony XDR-F1HD tuners, horizontal Körner 9.2 beam (Antennenland version), Yaesu G-450C rotator

39603. BIG Scandinavian tropo

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-09 17:32:08 UTC
From: John Faulkner
Topic: 39603 Message: 39603

I hope this spreads inland and elsewhere this evening. There are some BIG signals from Germany, Denmark and Norway across FM as I type.

Flea powered Norwegian and Danish locals are producing RDS! This is the strongest tropo I have ever known in this direction.

Danish and Norwegian signals were audible on the car radio while driving through town an hour ago.

Good DX!

John

Nick,

the CSA database has only the two sites which we have on FMLIST.
Are you sure about France Musique? Radio Classique is on that channel too.

Hi Günter. Yes it was 100% definite as it was in parallel with Lille on 88.7. France Inter is listed on 99.2 from the Gérardmer/Bois des Rochires site but there was only a weakish WDR 2 on there. Another factor which makes me think maybe I received an unlisted site.
 Good DX.

From: jouni.keskinen@...
Topic: 39599 Message: 39606

Yes, 100.7 probably from Urumqi too. Perhaps even a same mast as on 89.5.
Should be Xinjiang Xinwen Guangbo (News Radio) on 100.7 if the lists are correct. Their main frequency is 96.1. See: http://www.xjbs.com.cn/node_2785.shtml
http://www.xjbs.com.cn/node_2785.shtml
No id on the clip I think.

Congrats to Alexander in Petroskoi!

Hi Peter,

all the sites that miss in your log are currently listed in Fmlist.

Sportiva on 90.0 comes from Rocca di Papa/Monte Cavo (Rm)
Radio WE on 89.5 comes from Cori (Lt) and, on 89.6, is aired from Canneto Pavese/Monte Bruciato (Pv)

73's and good dxs,

Franco

Thanks Franco.
I am unable to download the latest pdf from fmlist. Mine is out of date.

Peter

39613. UNID German ID 106.0

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-09 23:02:33 UTC
From: John Faulkner
Topic: 39613 Message: 39613

I have an ID from a German station on 106.0. The ID does not sound anything like the name of the stations listed and none of the web streams for 106.0 matched, with the exception of Lamberti Radio (Kirchenfunk), for which I could not find a web stream. Can anybody help please?

https://app.box.com/s/vr5fonse3mbxnt362up2iez9wik9q6xl

Thanks.

John

39614. Band II Tropospheric Loggings for 9 June 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-10 00:12:25 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 39614

Hi All,

Today yet another BIG tropospheric Band II event. Even though I had to miss everything until around 5pm LT, my logbook is still huge. With an incredible number of stations at RDS strength.
The highlight for this session was clearly the best opening I ever had towards Berlin.
This is an excellent week for Band II DX-ing.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Thursday 9 June 2016

From: nija
Topic: 39592 Message: 39618

Hello again!

OK, then I would strongly suggest you skip the preamp completely. The
loss in that
short feeder will be minimal and the preamp will be more like a curse
just messing
up your reception.

Good luck!

/Nick

I'm happy to look into details. In the meantime, here is a current PDF package:
http://www.fmlist.org/PDF_Italy20160610.zip - 2 MB, just Italy, or
http://www.fmlist.org/PDFs_Europe20160610.zip - 16 MB, Europe, North Africa, Middle East.

73,
Günter

Thanks Guenter.
That worked very well.
Much better than me trying to persuade the FM List's ancient UI to let me download PDF's

Peter

39623. 88.3 ingle, help needed

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-10 14:43:10 UTC
From: ilkka suni
Topic: 39623 Message: 39623

Hi folks,

This morning at 0911z I got this jingle on 88.3 MHz:
https://app.box.com/s/x64equghit3cd3ksv5khvjsbdfknbuv8

My yagi was pointing at "Turkey and Middle-East". At the same time, on 6mb there was lots of multi-hop traffic to Northern Europe, by an amateur in the Middle-East [stupid me, I forgot to check the DXmaps section Africa, to see where the traffic was iriginated from].

The station was audible for a minute or so. The band was otherwise empty, yet a minute later Radio Zvezda of Sevastopol-tx popped up steady, on 88.3.

To me, the jingle sounds like a four-letter station call, Would this be just TGRT FM from Turkey, or even something via a double-hop.

Thanks in advance, for any help.

73, ilkka

Or is it "Itsy-Bitsy FM"? Does not quite fit the Itsy Bitsy format I have experienced, though.

This is not TGRT. They do not play that kind of music.
I never heared a jingle like that in Turkey.
73, Kurt from Istanbul

Thanks, Kurt!

Considering the current conditions of 6mb in the morning, I was hoping for 2-hop from the Middle-East. By what I have concluded, the station might be either from Jordania or Lebanon, or taking the risk of being ridiculous, a triple-hop from Kenya???

Or, eventually, I could be stumbling on some simple single-hop European. Anyway, the station should be from somewhere in the azimuth 165...170 degrees, looking from my angle.

Sorry to bother you, folks.

I suppose, after all, it's just Itsy Bitsy [ROU], and the jingle goes pronouncing "Itsy Bitsy...*mumble-jumble*...Itsy Bitsy FM".
Actually, now that I carefully listened to the jingle again, I can make nothing else out of it than "Itsy Bitsy". This morning, from 0900z up until 1300z, they aired the programme "Happy Music".

So much for my wishful multi-hops... My apologies.

39629. FM-DX Loggings for 10 June 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-10 20:15:58 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 39629

Hi All,

The tropospheric Band II conditions have finally disappeared in the course of today. Meaning that the final bit of it this morning, was a sort of a grande finale. I had some trouble waking up, after a very late end to the previous day due to the conditions. Twenty years ago I would have made this an allnighter. But once I had turned the radio on, I was instantly at the highest state of alert. I could hear several first timers from Poland and not only that. Most of the them came with instant RDS levels.

Regarding the Band II tropo, the past week has been unique in the combination of the wide spread skip area, the duration and the intensity of the conditions.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

39632. Band 2 Es Log Friday 10th June 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-11 07:08:46 UTC
From: Jim Smith G0OFE
Topic: 39632 Message: 39632

After an extremely frustrating Thursday when the Band 2 Es openings did everything it could to get as close to here as possible without actually getting here (one 2 minute tease to ALG apart), the gods finally relented on Friday and granted me some small openings.

I missed most of the early ALG/TUN opening as I had an 0900(bst) appointment. Managed to record a stream however. The early afternoon opening to the south didn't happen here as the clouds were too close, as they were for several hours in the early evening with a very focussed opening just clipping the western edge of Portugal here at the end of the opening. Before this, I may have had R Renascenca in Madeira, but it was so weak that I was unable to match enough with the stream to be sure, so I did not log it. Shame, because MDR has eluded me so far.

Finally, a teaser to the east before things died off.

From: nick gilly
Topic: 39633 Message: 39633

This was recorded on the morning of the 8th June with patchy Es into Eastern Europe, Finland and shortly afterwards the Balkans:
https://app.box.com/s/bvzopgvnvdwoqbmz6jf1pj9lbn0qxn7m
What language is the YL speaking please? There may be an ID at about 2 min 58 sec.
Any help much appreciated. Thanks and good DX.

Nick, Whitchurch, Hampshire.

Thanks Victor. VladTiarev on Real DX also confirmed this. Last time I had this tx on May 25th it had UR-1 programmes, so I presume this is a regional opt out.
 Good DX.

From: franco289@...
Topic: 39636 Message: 39637

Hi Paul, yes, it's in Corsican language.
It's very close to Italian (normally I can understand at least 80% of what I hear or read in Corsican) and there is only a slight influence from French language (in general for words who express "modern" things and concepts).

Best 73's
Franco

39638. Re: AW: [SkywavesDX] France Musique on 101.6, which site please?

Yahoo group: SkywavesDX (2016 — 2017)

From: nick gilly
Topic: 39602 Message: 39638

Here's a recording of the France Musique outlet on 101.6:
https://app.box.com/s/ixuhcbrmc324nk390j1ewg644de65smq
Seems too strong for a 250 watt vertical at 688 km, especially as it replaced a semi-local. Good DX.

Nick, Whitchurch, Hampshire.

  Hi Günter. Yes it was 100% definite as it was in parallel with Lille on 88.7. France Inter is listed on 99.2 from the Gérardmer/Bois des Rochires site but there was only a weakish WDR 2 on there. Another factor which makes me think maybe I received an unlisted site.
 Good DX.

Nick, Whitchurch, Hampshire.

39641. Arabic recordings from May 29th

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-11 17:44:54 UTC
From: John Faulkner
Topic: 39641 Message: 39641

I am about to start compiling my logbooks from the last of couple of weeks. I would like to give a BIG thank you to Kurt for his help with my Turkish recordings. Most of these are now identified and have been added to the log.

Before I submit the rest, I wondered about having one last attempt at trying to get some more detail on the Arabic stations I recorded on May 29th. I have posted twice to RealDX and tried several attempts to contact an Arabic speaking DXer recently but to no avail. My obvious assumption should probably be that there is nothing useful in the recordings which would aid identification, but I'm not so sure. I have come up against a brick wall.

In the past, some DXers have contacted forums where Arabic speaking people have been kind enough to listen and translate some of the Arabic speech into English. If anybody could point me in the right direction I would like to have one final fling at this as I feel sure there is some interesting Iraqi DX in these recordings.

I'll post the remaining recordings here one more time, just in case. Of particular interest are the stations on 87.7 and 88.3, believed to be Lebanon and Iraq, respectively. 89.9 may be Baghdad, 92.8 also. I think 92.5 was Turkish but I'll include it below anyway.

Thanks again.

John

Hi Paul,

I am not 100% sure, but I really think it's one of phone-in broadcasts aired very often by Radio Bleu RCFM.
En fact, Radio Salve Regina broadcasts only religious programmes but in this case you can hear a strange talk about wild beasts who appear in lady's home town.

Best 73' and good dxs,

Franco

A very nice opening (in 2 distinct phases) to end my few days off.. back to the grindstone today!

Around 1540 I commented to myself that it wasn't looking too promising.. then a few minutes 10m began to stir with a good selection of European beacons suddenly in. Within 20minutes an opening to the Baltics was getting into full swing with good signals from LVA EST LTU and latterly NE Poland and Kaliningradsk.

I was hoping for my first Russian logging and checked for St Petersburg, but to no avail, so RUS will have to wait for another day.

Then, after a pause of an hour or so, it opened up again to Greece, Albania and the far SE of Italy and Croatia. Mixed in with this was a brief opening to Portugal, then Sweden. Didn't know where to point the beam by this point!

Best opening (by some distance) of the year so far, and it was nice to start the game and get the full 90 minutes for once, instead of sitting on the subs bench hoping for a little run out in injury time!

39658. Recent Balkan and Baltic Es UNIDs

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-13 12:01:03 UTC
From: John Faulkner
Topic: 39658 Message: 39658

A Balkan station from May 2nd:

94.7 unid ID 1657 02-06-16
https://app.box.com/s/q0o9xvg8ou1l4h4hxrf140xwammle1ha

From the Baltic opening yesterday, 12th. This sounds like Sky Plus, but there's nothing listed with that name:

97.4 unid ID 1625 12-06-16
https://app.box.com/s/psc5w5jtqw4k4kh7x55838810ig11xs7

Yesterday's Baltic opening also brought a Sky Radio jingle on 89.5. Again, nothing is listed and a Google search revealed nothing.

Thanks if anybody can help with these.

John

39659. Kaliningrad 101.9?

39669. Band 2 Es Monday 13th June 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-13 19:13:00 UTC
From: Jim Smith G0OFE
Topic: 39669 Message: 39669

Back in the day when I was very active on the Amateur 6m band, the old adage was "look out for short skip to Scotland and/or E4 TV from Iceland" as an indicator of 6m Transatlantic propagation.

Back at work today I saw that the 6m transatlantic path was open between Europe and North America as early as lunchtime. Driving home this afternoon, it struck me that the adage should work in reverse.....

What followed shortly after I got home just before 1600z, was a nice opening to Iceland lasting a little over an hour

Signals were never strong, and indeed I only got one PI code, but was able to use streams to ID the stations.

This opening was very welcome as I'd only logged a single station in Iceland before, and that was in 2014.

indeed, absolutely great opening,
i listened to 93.1 Maria Vilnius for ages, was very surprised how
many Polish & Belarusian words the Lithuanian YL used, i could
understand most of it

i tried 103.8 for Znad Wili but the MUF didn't come close

This is uncharted territory in a way. Belarus in particular. A lot of stations did not have RDS but you could occasionally hear Belarusian cities mentioned. There were a few unlisted sites coming through, plus one or two stations listed a "Planned" but obviously on the air now. Hopefully I'll be able to find some useful info out of this.

It was a monster opening to this the area and I deliberately recorded lots of files, as I did of the excellent Icelandic opening yesterday.

Trying to get through the files as quickly as I can. Logs shortly.

John

39677. FMList issue ?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-14 13:56:46 UTC
From: Guido Schotmans
Topic: 39677 Message: 39677

Hello,

Is anybody else experiencing issues adding logs to FMList the last few minutes ? I had several errors like this when clicking submit :

Proxy Error

The proxy server received an invalid response from an upstream server.
The proxy server could not handle the request POST /fi_inslog.php.

Reason: Error reading from remote server

73,

Guido.

39678. RE: [SkywavesDX] FMList issue ?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-14 14:08:24 UTC
From: Guido Schotmans
Topic: 39677 Message: 39678
Attachments: 2 described; binary payloads are missing from this source WARC

Now I see that the logs are, notwithstanding the error, added to my logbook.
Strange.

73,

Guido.

Guido, Ced, Andrew and all,

this is caused by DXMAPS, which is not responding, causing a timeout.
So you may want to disable DXMAPS temporarely.

Logs are first written to FMLIST, and then sent to DXMAPS.

What was the time between submitting the log, and the error message? Few
seconds?

73,
Günter

Hi Günter,

I have been having the same issue several times the past weeks. I knew about the fix.

On average I think dxmaps gets out of order once per day. On bad days, this happens up to three times per day. Should we keep the link to dxmaps? I like the dxmaps site, it provides a good overview of the position of the Es clouds. But FMLIST getting stuck when dxmaps gets stuck is a nuisance.

73,
Janpeter

Hi folks,

If I read things right, was there a suggestion to
exclude DXmaps from FMLIST? I think, this would
be a mistake. Furthermore, gets DXmaps excluded,
I will not pay the support fee for DXmaps.

Rather, the basic preference for FMLIST myFM
could, or even should be "DXmaps off". Wishes one
loggings transferred to DXmaps, one checks the box.

Hi Ilkka,

> If I read things right, was there a suggestion to
> exclude DXmaps from FMLIST? I think, this would
> be a mistake. Furthermore, gets DXmaps excluded,
> I will not pay the support fee for DXmaps.

No, that is neither intended nor suggested.
When the DXMAPS servers log interface is not responding (which happens rarely, but it does), FMLIST times out. In the old architecture, in operation until 4 weeks ago, the timeout was 2 minutes - equal to 500 eternities of SpE.
As we discovered today, the new architecture of FMLIST servers times out more quickly, which is good.
And in this case, to be able to continue fast logging, I suggest to temporarely set DXMAPS OFF. One click in myFM.

> Rather, the basic preference for FMLIST myFM
> could, or even should be "DXmaps off". Wishes one
> loggings transferred to DXmaps, one checks the box.

You're suggesting kind of an "opt-in" solution.
Current situation is that ALL logs go to DXMAPS, unless a FMLIST user explicitely clicks on DXMAPS OFF. This is a session-based "opt-out".
There is one big benefit of this architecture: already any first log, when Es strikes, is sent to DXMAPS and serves to alert.
But perhaps you are thinking of an additional profile option, so a user can definitively "opt-out" of DXMAPS. Technically possible.
BTW, even logs in the past (SDR users working through their recordings) are sent to DXMAPS - no problem, they don't spoil the alerting, but will add to the rich database of "QSOs" on DXMAPS.

73 and good DX de Günter DL3GLF
(Es clouds are sitting either above my head or at points where the other end is ... somewhere in the Atlantic Ocean)

Hi Janpeter,

thanks for your observation. I was not aware that it gets stuck that often.

I would very much like to keep the link, it has brought our hobby to the attention of many HAMs, observing the FM bands is of great benefit to them.

May I suggest that you write a few friendly lines to ea6vq@..., who runs the server – perhaps he can do something.

I am planning to modify myFM such that DXMAPS will be automatically but temporarely disabled when we find it is not responding. But from time to time I have to pass a log to see if it has recovered.

Reminds me of traffic jams and navigation systems: If all cars were deviated from a queue, how would you find out that the queue has gone?

73,

Günter

Betreff: Re: AW: [SkywavesDX] FMList issue ?

Hi Günter,

I have been having the same issue several times the past weeks. I knew about the fix.

On average I think dxmaps gets out of order once per day. On bad days, this happens up to three times per day. Should we keep the link to dxmaps? I like the dxmaps site, it provides a good overview of the position of the Es clouds. But FMLIST getting stuck when dxmaps gets stuck is a nuisance.

73,

Janpeter

Onderwerp: AW: [SkywavesDX] FMList issue ?

Guido, Ced, Andrew and all,

this is caused by DXMAPS, which is not responding, causing a timeout.
So you may want to disable DXMAPS temporarely.

Logs are first written to FMLIST, and then sent to DXMAPS.

What was the time between submitting the log, and the error message? Few seconds?

73,
Günter

Hi Günter,

I possibly misinterpreted this sentence:

<<<<<QUOTE*****Should we keep the link to dxmaps? ****QUOTE>>>>>

At 22:36 14.6.2016, Günter wrote:
><<<<<QUOTE*****There is one big benefit of this
>architecture: already any first log, when
>Es strikes, is sent to DXMAPS and serves to alert.****QUOTE>>>>>

Yes, this to me, too, is the primary aim when
logging to DXmaps [quit sending reception reports
and collecting QSL cards, in early 90's]. Even
though, false Es alerts might and even do happen,
and I personally feel quite humble, humiliated
and stupid, having alerted Es possibly on a false
basis. Then again, the Es sometimes is tricky, as we all know.

73, ilkka

Hi Günter,

I agree that it is important to be able to use this site for early warnings. However, the visual logbook page has the same functionality. For OIRT and Band II that is.
It is just unfortunate that the dxmaps site is unstable. Today it got stuck three times.

Anyhow, I will get in contact with EA6VQ.

The above clip was recorded on 104.1 on Monday 13th June, during Es.?

I have ruled out the other listed possibilities, so I think it is this one:

102.100 ISL Skagafjörður/Hofsós nv is Útvarp Kantrýbær 0.500 h19w25/65n54

Can someone please confirm?

Another query, I had commentary on "Euro 16" Ireland v Sweden on 89.5. Who could this be? I think it was Icelandic but don't have a good recording. It wasn't RAS 1 or RAS2.
Thanks

Peter

Hello Paul,
Thanks for the suggestion.

It was fair strength at times, but I forgot to make a further recording. (I was too excited at getting my best ever Icelandic FM opening)

I did have a YL on 87.9 who sounded more Swedish than Icelandic. (She faded out before I had chance to record).

Next time ISL comes I'll make several dozen IQ WAV recordings.

Peter

Topic: 39714 Message: 39714

Hi again. This was heard this morning over a semi-local during an opening to Tunisia and Algeria. I see nothing listed from these countries on 107.8: https://app.box.com/s/koi2zp99z50m5kxbhway7lmxzp7pm035 It's brief but hopefully something can be extracted from the content or accent. Any help much appreciated.

Thanks and good DX.

Nick, Whitchurch, Hampshire.

What a day! The third period of double hop into Turkey in less that a week and we're still only in the early stages of the season!

It began with simultaneous openings to Poland, Slovakia, Moldova and the Balkans. Istanbul appeared briefly on 87.5. Then Ankara and Adana appeared, cross fading with each other. It was clear to see which areas of Turkey were received as the two different areas of skip faded in and out independently, demonstrating that there was more than one Es opening in place.

Sanliurfa and Kayseri appeared in the south of the country, then Duzce in the north-west. Then things started getting serious with the appearance of the Van transmitter in south-eastern Turkey.

Was it going to extend further? Arabic appeared on a few frequencies. Clearly something unusual was happening. At 13:30, the biggest surprise of them all came in, right at the end of the opening. The BBC World Service's Arabic programme appeared on 89.0! I wasn't sure what I was hearing to begin with, but the words "London", "BBC" and "bbcarabic.com" were all there. Ian Kelly came to the rescue with a link to the BBC World Service Arabic podcast for the same time and, after cross-referencing everything, it became clear that what I had heard was "BBC World Service Arabic". The transmitter in Baghdad was inline with my reception, so it seems safe to assume that this was definitely double hop Es to Iraq. Two other transmitters of BBC WS Arabic are also listed on the frequency, but the Baghdad transmitter was the closest. I can't rule out this being one of the others but Baghdad may make more sense due to other Arabic stations received at the time which were also potential Baghdad transmitters.

Since this was an unusual opening, I decided to back up all my FDM-S2 files which contain the Turkish and Arabic DX. I created two Mediafire accounts where I have stored 18 files. I feel sure other stations may be identified from these in the future. They can be accessed at:

You'll need Monkey's Audio to decompress the files: www.monkeysaudio.com/

I would like to say a BIG thank you to Kurt in Istanbul for his help with my many Turkish recordings.

For the record, here are recordings of a few unidentified Arabic stations I have been trying to track down. Hopefully I may find an Arabic speaker one day who will be able to listen and spot a few clues.

89.9 possibly Baghdad? 1319 29-05-16

Early opening to Tunisia Algeria Sardinia which I found while remoting in from work over breakfast. Not too strong (though the antennas were lowered = more local noise and lower signals.)

Also had some unlisted Tunisia stations which I will post separately.

Log and maps: http://www.fmlist.org/fm_logmap.php?datum=2016-06-16 <http://www.fmlist.org/fm_logmap.php?datum=2016-06-16&omid=2748> &omid=2748

Hi all,

Had the following during this morning's opening to North Africa:

88.2 PI: 7209 PS: MOSAIQUE

88.9 PI: 7204

91.6 PI: 7210 PS: JAWHARA

If anyone can offer any information as to where transmission sites for these stations are, I would be grateful.

Thanks.

Hi Jim,

I can't find much on the Internet. I would assume your 7204 PI to belong to Radio Sfax, the tx site I don't know.

The new QRG for Jawhara FM is listed on their web site, but they do not give tx sites.

For Mosaïque FM I have some more. This station is building a nationwide network and has started several new frequencies.
The 88.2 MHz tx is most likely Kasserine/Jebel ech Chambi, ex Radio Kef. Furthermore they now have 95.3 MHz from Sfax and 107.5 MHz from Mahdia.

73,
Janpeter

Hi Janpeter.
Mosaïque FM on 88.2 hasn't replaced Radio Kef as I received both of them this morning: https://app.box.com/s/yixcmgyefte13on3zs82krhrv7z2enl9 You can hear Radio Kef cross-fading near the end of the clip.

Also, who would be on 107.8? Maybe another Tunisian? I had a brief burst of Arabic news over a semi-local station during this opening:
https://app.box.com/s/koi2zp99z50m5kxbhway7lmxzp7pm035

There is nothing listed in TUN or ALG on FMLIST.

Good DX.

Nick, Whitchurch, Hampshire.

HiDo not know if this of any help regading recent queries re Tunisia . When in Tunisia a couple of years ago Mosaique FM was using 88.90 from Hammanet. Also on 93.90 Nabeul, and 94.90 Bou Kornine,I think perhaps these are a bit out of date by now so please excuse errors. Stations keep changing freqs and sometimes its hard to keep up to date with them. Edward BakerMatagordaPto del CarmenLanzarote

I found this post on Facebook which has been translated which may be a comprehensive list of Mosaïque FM's frequencies:

Mosaic in Tunisia and Algeria and # # Libya on the FM waves
Bizerte: 106.2 or 107.8
Tunis: 94.9
Ariana Governorate: 94.9
Manouba Governorate: 94.9
Ben Arous: 94.9
State of ZAGHOUAN: 107.8
Nabeul: 92.9 or 88.9
Jendouba: 105.8 or 107.0
State of Beja: 94.5 or 105.8 or 107.0
State of CAF: 94.5 or 105.8
Siliana: 94.5
Sousse: 107.8
Monastir: 107.5 or 107.8
Mahdia: 107.5
Sfax: 95.3
Kairouan: 107.8 or 102.3
Kasserine Governorate: 88.2 or 91.1
Sidi Bouzid Governorate: 88.2 or 91.1 or 102.3
Governorate of Gabes: 104.8, or 88.2
Medenine: 89.2
Tataouine Governorate: 104.8 or 107.0
State of Gafsa: 88.2
Tozeur: 101.4 or 107.0
Kebili Governorate: 88.2
Annaba Province Algeria: 107.0
Ras Jedir Ztun and Zuwarah Libya: 89.2

Odd that Kasserine is listed on 88.2, as I clearly heard Radio Kef co-channeling, as you can hear on my recording. Perhaps this was Gafsa that was received. 89.2 would be Medenine. Good DX.

Hi Ruud. That is Paul Farley's video but I had very similar reception. I suspect that the other station xfading on that video is Radio Kef, as it was here.
 Good DX.

Nick, Whitchurch, Hampshire.

  According the many tropo DX logs from a Dutch guy who was in Malta end May early June I see on visual logbook that he heard many test tones on FM which he claims to be from TUN including 88.2 MHz.Many years ago I was at Djerba for holiday and could near also test tones which came from LBY because these days they were not broadcasting 24/24h a day but now this must have been new stations.Ruud

Hi Nick,

As far as my information goes. there is still a Radio Kef from Makthar/Souk Jomaa on 88.2 MHz.

The 107.8 MHz I do not know, but given the program format I would expect another new tx from Tunisia. Quite a lot of development is going on in this country but it is difficult to find good information on the Internet. I will keep searching though.

73,
Janpeter

HiDo not know if this of any help regading recent queries re Tunisia . When in Tunisia a couple of years ago Mosaique FM was using 88.90 from Hammanet. Also on 93.90 Nabeul, and 94.90 Bou Kornine,I think perhaps these are a bit out of date by now so please excuse errors. Stations keep changing freqs and sometimes its hard to keep up to date with them.

Here in the states, the majority of our commercially available antenna pre-amplifiers seem to be wide band in nature. Most cover VHF up into the UHF range. They also tend to have much more gain that is generally needed, though on some models this is adjustable.

I’m hoping the situation is different in Europe. I’d like to find a low-noise figure, modest gain (15-20db maximum) and FM band only preamplifier for use in FM DXing.

Could someone be so kind as to make recommendations? Preferably with links to the products on a web site. Most grateful.

VHF 1220-FM: http://www.fringeelectronics.co.uk/standardrange.html

P1285 psu for above: http://www.fringeelectronics.co.uk/powersup.html

The gain & noise figures are stated on the page.

I've been using these for years. Reliable, etc. I have recommended them
to other DXers over the years and they too have had good results.

Hi Les,

Fringe Electronics of Mansfield England make a masthead amp for FM model VHF1220FM which has 20dB gain and a noise figure of 1.8dB http://www.fringeelectronics.co.uk/standardrange.html I have never used this amplifier myself as the FM band over here is crammed with so many high power signals that overload is already a problem without an amp, hence amps at my location are a complete no-go. That said I do have experience of Fringe's Band 3 masthead amps from 25 years ago when I use them for TV-DX and can highly recommend them. I also use a Fringe 6-way distribution amp that I bought from the 30 years ago and it is still going strong and in service today.

Hope that is of some help.
Regards,
Chris Howles (Lichfield, Staffs, UK)

I’ve given up on Fringe. They advertise stuff for sale on their website which is no longer in production. Why they can’t edit the website or remove the products they no longer sell I have no idea.

That's interesting. They are a very small cottage style company but they do have a good name regarding their products. They only recently added overseas shopping to their site. This is Mansfield though, they probably haven't been connected to the electricity supply yet. (I know - I used to liove there)

Best to email or even telephone them to check on availability. Thee may be other brands which are as good, or better, but you won't go wrong with their products. They were very helpful on the phone to me last year when I was making enquiries for a Dutch DXer. Don't let the website deter you. This company know what they are doing, web skills aside. But I agree, there's not much excuse these days for not keeping your web store up to date.

You are right Nick, that program is also listed for that site. As is Radio Kef. It is difficult to judge what is right and what is wrong. On the other hand, Radio Kef has been received yesterday, simultaneously with Mosaïque FM. And I do not recall having seen RTCI being logged on 88.2 MHz lately. So most likely it is Mosaïque FM from Kasserine and Radio Kef from Makhtar.

Hi Janpeter.

Mosaïque FM on 88.2 hasn't replaced Radio Kef as I received both of them this morning:

https://app.box.com/s/yixcmgyefte13on3zs82krhrv7z2enl9
You can hear Radio Kef cross-fading near the end of the clip.

Also, who would be on 107.8? Maybe another Tunisian? I had a brief burst of Arabic news over a semi-local station during this opening:

https://app.box.com/s/koi2zp99z50m5kxbhway7lmxzp7pm035

There is nothing listed in TUN or ALG on FMLIST.

Good DX.

Hi Jim,

I can't find much on the Internet. I would assume your 7204 PI to belong to Radio Sfax, the tx site I don't know.

The new QRG for Jawhara FM is listed on their web site, but they do not give tx sites.

For Mosaïque FM I have some more. This station is building a nationwide network and has started several new frequencies.
The 88.2 MHz tx is most likely Kasserine/Jebel ech Chambi, ex Radio Kef. Furthermore they now have 95.3 MHz from Sfax and 107.5 MHz from Mahdia.

Onderwerp: Re: [SkywavesDX] Tunisia unknowns/unlisted.

Hi Janpeter.

Mosaïque FM on 88.2 hasn't replaced Radio Kef as I received both of them this morning:

https://app.box.com/s/yixcmgyefte13on3zs82krhrv7z2enl9

You can hear Radio Kef cross-fading near the end of the clip.

Also, who would be on 107.8? Maybe another Tunisian? I had a brief burst of Arabic news over a semi-local station during this opening:

https://app.box.com/s/koi2zp99z50m5kxbhway7lmxzp7pm035

There is nothing listed in TUN or ALG on FMLIST.

Good DX.

Nick, Whitchurch, Hampshire.

Hi Jim,

I can't find much on the Internet. I would assume your 7204 PI to belong to Radio Sfax, the tx site I don't know.

The new QRG for Jawhara FM is listed on their web site, but they do not give tx sites.

For Mosaïque FM I have some more. This station is building a nationwide network and has started several new frequencies.

The 88.2 MHz tx is most likely Kasserine/Jebel ech Chambi, ex Radio Kef. Furthermore they now have 95.3 MHz from Sfax and 107.5 MHz from Mahdia.

73,

Janpeter

Onderwerp: [SkywavesDX] Tunisia unknowns/unlisted.

Hi all,

Had the following during this morning’s opening to North Africa:

88.2 PI: 7209 PS: MOSAIQUE

88.9 PI: 7204

91.6 PI: 7210 PS: JAWHARA

If anyone can offer any information as to where transmission sites for these stations are, I would be grateful.

Thanks.

Hi,

on 8,30 CET today catched my first Russian station Radio Chanson on 88,80 fading in and out in stereo, sometimes with RDS. Found on their website that transmitter on 88,80 is located in Tiraspolj, Moldova.

This is also my first catch from Moldova, signal came reflected from West Europe, antenna is pointed to Slovenia and Austria...

Tuners: Kenwood KT-6050, Hitach FT-007

Regards my friends, good DX.

87.8 NRJ 104,0 Kalmar Oskarshamn 1330 km:
https://app.box.com/s/wclsz3e994q9utjznqltmzdav19z2gdq
87.7 SR P1 Halmstad 1116 km + unids:
https://app.box.com/s/8h98h12gmeo8zscsrl3r2o2rlqe98a2g
87.6 NDR 1 Radio MV Vorpommern Barth 1005 km:
https://app.box.com/s/c2zawwlflrdigojy3dlq5uxv8pb6vbqm
87.9 unid Poland: https://app.box.com/s/87if6ghzucys3srfgi8n28cvf63ndbd5
88.2 probably TRT 3 Radyo Üc Istanbul 2578 km:
https://app.box.com/s/ukjpvvtqusv77jc59jst100yc56q4fif
87.7 TRT Nağme Bolu 2759 km: https://app.box.com/s/woxej18honlac2pzb2dq19fboix7vdzl
87.9 unid: https://app.box.com/s/frfvq9r1vl3uaxtu3akqx4ssdp6yi510
87.6 unid Eastern European song: https://app.box.com/s/hqt30ejy7ha7zf9lcl5svol11ubarloy
89.4 TRT?: https://app.box.com/s/gzr4xtycl9a7oku2upa4jd2b8bzoy5kw
88.0 probably TRT, not sure which network:
https://app.box.com/s/fgrjihgf81stqduyavpew6hlwyrpdeoo - another recording of this one to come later
88.2 Diyanet Kuran Radyo Ankara-Dikmen 2911 km?:
https://app.box.com/s/7ak3rw9mspul4oc99mlfbpyjxfxvmj6p

Thanks very much to Kurt Zscherp for his help with the Turkish UNIDs. I also have a recording of another UNID Turkish station on 88.4 and more of 87.7 too but these will also have to wait for later.
Interesting how the Turkish stations were mostly in on their own which suggests some sort of chordal hop may have been going on.
 Good DX.

39766. Florian-stations from Germany on 84-87 MHz / New discovery

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-18 17:16:53 UTC
From: harriku@...
Topic: 39766 Message: 39766

Hi from SW Finland,

First time ever I tried frequencies below 87.5 MHz during Sporadic-E-opening. At the same time there were full of Italians on FM-band up to 108 MHz. Date was Sunday 29.5.2016.

I found and recorded German talking traffic around 85-87 MHz. I understood it must be some kind of emergency traffic as a lot of streetnames were announced etc.

Jürgen Bartels told me these are fire- and emergency stations and he identied a few for me. Later I also managed to id some of them myself (with BOS-list).

German firestations on the radio are all called "Florian + cityname"! For example firestation in Heidenheim-city is announcing "Florian Heidenheim". So it is possible to id them.

Florian is a saint for firemen in Germany. He lived in the end 300th century in North Austria. Later he became saint for the firemen. In 1975 Florian-name was taken in use for fire-trafiic-stations in Germany.

I have checked only a few frequencies and here are the results from Sun 29.5.2016:

86.155 Florian SHA, Schwäbisch Hall (BWü).
86.375 Florian Rottal-Inn, Rottal-Inn (Bay). http://www.feuerwehr-rottal-inn.de
http://www.feuerwehr-rottal-inn.de/
86.455 Florian Neu-Ulm, Neu Ulm (Bay).
86.495 Florian Memmingen, Memmingen (Bay).
86.995 Florian Alb Donau, Ulm Kreis, Oberdischingen local (BWü). "Florian Oberdischingen"
87.155 Florian Heidenheim, Heidenheim (BWü). http://www.feuerwehr-heidenheim.de
http://www.feuerwehr-heidenheim.de

There were bad rains in South Germany on this Sunday 29.5 and several people even died. Therefore there were a lot of emergency traffic all around.

I sent a reception report to Florian Heidenheim. The man whose voice I heard replied me and he wondered how his voice could travel even to Finland.
He wrote that the power of the tx is only 10 Watts and the height of the antenna is 42 m.

Thanks Jürgen for help on these. Two years ago I idenfied several fire- and emergency stations from the East coast of USA on 33-34 MHz with the help from Paul Logan.

Topic: 39767 Message: 39767

Just a quick note to say that I noticed that the solid-colour doughnuts in the DCS/30 minute display are now drawn as 2 outline circles instead of solid colour.

Looks a lot better during big openings as the map is now easier to see.

Good idea.

Like far too many days this season so far, today a frustrating one with the Band 2 openings continually just out of reach to the east for hours on end.

The Turkish openings reported in neighbouring counties under 50 miles away once again refused to extend to Dorset and no mini-opening lasted longer than a couple of minutes at a time (and usually much less) to Sweden, Finland, Baltics and Poland.

Perhaps I might get better luck tomorrow!

From: Janpeter van Dijk
Topic: 38927 Message: 39772

Hi All,

I have a strong video carrier on 49.6654 MHz. What could that be about? Never seen this before.
Unfortunately I have no means of displaying the video.

73,
Janpeter

Hi Peter. 89.5 is Hungarian so best guess for that would be Music FM from Budapest. 87.7 is Polish so almost certainly PR 1. 88.2 is also Polish but there are several possibilities for that one. Not sure about the others.
 Good DX.

Nick, Whitchurch, Hampshire.

To be precise, Pridnestrovye.
As a matter of fact, there is locally produced Radio Sputnik programming in Chisinau, Moldova (in Russian and Moldavian. aired via Radio Alla/Hit FM at certain time slots) while Pridnestrovye relays Russian language content from Moscow on dedicated channels, all day long...
In short, completely different programming

39787. Sporadic E Loggings for 19 June 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-19 19:29:19 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 39787

Hi All,

Today's Sporadic E DX was almost a carbon copy of yesterday's Sporadic E DX. With the Band II opening again being painfully difficult.
We are almost halfway the season and I have not seen a decent, top of the band opening into Spain or Italy or Greece or North Africa. Which is a first in all of my years as a DX-er.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

https://app.box.com/s/7ak3rw9mspul4oc99mlfbpyjxfxvmj6p

Thanks very much to Kurt Zscherp for his help with the Turkish UNIDs. I also have a recording of another UNID Turkish station on 88.4 and more of 87.7 too but these will also have to wait for later.
Interesting how the Turkish stations were mostly in on their own which suggests some sort of chordal hop may have been going on.

Good DX.

Another typical 2016-season kind of day, with most of the action further east with a few scraps tossed under the table over this way.

Some early teases from the east with most only lasting a few seconds and not possible to identify. MUFs collapsed after the middle of the day.. recovering towards sunset giving openings further east, extending here for just a couple of minutes to bring Austria and Hungary.

Map and logs: http://www.fmlist.org/fm_logmap.php?datum=2016-06-19 <http://www.fmlist.org/fm_logmap.php?datum=2016-06-19&omid=2748> &omid=2748

39791. More from my May 29th Arabic UNIDs

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-21 11:22:43 UTC
From: John Faulkner
Topic: 39791 Message: 39791

Further analysis of the recordings, thanks to Ara Bailan who posted in the "WRTH - World Radio Tv Handbook" Facebook group. His post reads thus:

"
All my answers are not final:
89.1 Tangier (Tanjah in Moroccan Arabic).
89.9 Possibly Baghdad. The name of the Anbar Province in Iraq was mentioned.
88.3 Kuwaiti or Iraqi Arabic. Most likely Iraqi.
88.0 Unid language, could be Tamazight from Morocco or Algeria.
91.1 Unid language sounds Arabic, but keeps looping the same sentence.
87.7 Possibly Tamazight from Morcco or Algeria. Keeps looping the same sentence
93.3 Kurdish, possibly Turkish. Most likely Kurdish.
Second 93.3 entry. same as previous one.
87.7 Arabic.
92.8 Sounds like a BBC relay.
92.5 Arabic, possibly Lebanese dialect.
92.4. Turkish.
91.1 Koran, not further identified.
92.5 Could be Iraqi, Saudi or Gulf Arabic.
"

Just to point out that the 89.1 entry was not mine, but Mauno Ritola's. This got added to the thread.

89.9 does indeed look like being Baghdad. It fits the conditions. I think this warrants a "Tentative" inclusion in my log for the day.

88.3 is intriguing and definitely needs further analysis, but Iraq would again fit the bill. The site is Karbala if so.

88.0 has already been ID'd as TRT3, so not Morocco. RDS was identified around this time, pointing to the Ankara transmitter.

93.3 The second station may be Iraq but this is unclear. Tikrit, Umm Qasr and Kirkuk are listed.

92.8 is looking more and more like being BBCWS from Kirkuk. Maybe that links nicely to 93.3 above.

92.5 is interesting. Maybe Lebanon was there after all. But the second Arabic on 92.5 may be Iraqi, Saudi or something else "Gulf" Arabic. They do sound like two different stations, and there were a few frequencies which had multiple Arabic around this time.

This doesn't give any more concrete IDs, but indicates the recordings which might benefit from further analysis.

Assuming the Arabic stations were all from Iraq, and that is the most likely scenario, narrowing down a particular part of Iraq is going to be impossible considering the widespread beamwidth received at the time (western AND eastern Turkey was received). Then we throw Lebanon into the picture - there would have been a first hop point present with my reception of Romania/Serbia/Bulgaria border area at that time.

It's all 'wide open', but a pattern may be emerging, that of possible reception of Kirkuk and Karbala. I think these sites need to be noted tentatively in my logbook, but nothing is anywhere close to being certain, apart from the BBC WS Arabic ID on 89.0, which looks like being from the Baghdad transmitter.

John

Excellent work John :-) It's good you are now getting some ideas of what was coming in during that amazing lift.
I wonder who 91.4 is? Could it be Kurdish? Apparently this language is related to Farsi. Good DX.

Nick, Whitchurch, Hampshire.

Thanks Nick.

91.4 is the REALLY interesting one. It looks like Lebanon is in my recordings too, but most of the Arabic stations are probably from Iraq. There were no IDs in the recordings.

Here's what a Palestinian gentleman said on the Skywaves Facebook page - and I offer my thanks to Stig Hartvig Nielson for passing on my recordings:

"
89.9 possibly Baghdad? 1319 29-05-16
Yes, sounds like from Iraq. They mentioned Fallulah.

88.3 unid language 1330 29-05-16 (Arabic?)
Yes - two Arabic stations. One with Iraqi music and the other with someone talking in Arabic (Iraq)

88.3 unid Arabic 1343 29-05-16
(Radio Orient, Lebanon?)
No, not Lebanon - but again could very well be Iraq. They are talking about footbal.

88.0 unid language 1302 29-05-16
News in Arabic. Iraq

91.1 Brief Arabic or similar 1327 29-05-16
Yes, again Arabic. And again Iraq

87.7 Brief Arabic (audio looped) 1324 29-05-16
This is most likely Egypt.

93.3 unid language and unid music stations 1324 29-05-16
?

93.3 More unid eastern music over Turkey 1322 29-05-16
?

87.7 unid language 1303 29-05-16
Not Egypt. Not Iraq. Probably Lebanon.

92.8 unid accented English station mixing TRT Van. Baghdad? 1330 29-05-16 (Maybe Farsi cuts in briefly)
Difficult. Not Palestine. Sounds like an English BBC-ID at the end?

92.5 Possibly Arabic 1343 29-05-16
Arabic. Lebanon

91.4 unid language 1343 29-05-16
Not Arabic. Probably Farsi.

91.1 young person's Koran 1343 29-05-16
Could be from anywhere.

92.5 Possibly Arabic 1330 29-05-16
Difficult. This could be Saudi Arabia or one of the Gulf states or possibly Iraq.

I understand that the accent in Iraq is (sometimes) quite similar to the accent of Saudi Arabia and the Gulf states

89.9 possibly Baghdad? 1319 29-05-16
Yes, sounds like from Iraq. They mentioned Fallulah.

88.3 unid language 1330 29-05-16 (Arabic?)
Yes - two Arabic stations. One with Iraqi music and the other with someone talking in Arabic (Iraq)

88.3 unid Arabic 1343 29-05-16
(Radio Orient, Lebanon?)
No, not Lebanon - but again could very well be Iraq. They are talking about footbal.

88.0 unid language 1302 29-05-16
News in Arabic. Iraq

91.1 Brief Arabic or similar 1327 29-05-16
Yes, again Arabic. And again Iraq

87.7 Brief Arabic (audio looped) 1324 29-05-16
This is most likely Egypt.

93.3 unid language and unid music stations 1324 29-05-16
?

93.3 More unid eastern music over Turkey 1322 29-05-16
?

87.7 unid language 1303 29-05-16
Not Egypt. Not Iraq. Probably Lebanon.

92.8 unid accented English station mixing TRT Van. Baghdad? 1330 29-05-16 (Maybe Farsi cuts in briefly)
Difficult. Not Palestine. Sounds like an English BBC-ID at the end?

92.5 Possibly Arabic 1343 29-05-16
Arabic. Lebanon

91.4 unid language 1343 29-05-16
Not Arabic. Probably Farsi.

91.1 young person's Koran 1343 29-05-16
Could be from anywhere.

92.5 Possibly Arabic 1330 29-05-16
Difficult. This could be Saudi Arabia or one of the Gulf states or
possibly Iraq.

I understand that the accent in Iraq is (sometimes) quite similar to the
accent of Saudi Arabia and the Gulf state
"

Though nothing is concrete, the picture is becoming a little clearer.

Regards.

John

39794. UNID May/June 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-22 06:56:24 UTC
From: gertdx@...
Topic: 39794 Message: 39794

I hope some of you can help me with some of my unidentified stations the last month. Any help apreciated!

May 14 2016
Conditions towards Czech Republic in the beginning, later Germany

89.1 MHz:
https://app.box.com/s/fyjzzaxmvt4oi5126r4vj4lrx1qkh0k6
Is this ČRo Radiožurnál?

May 29 2016

In the beginning stations from Croatia and Italy, later also stations from France, Slovenia, Serbia, Austria and Hungary

92.6 MHz with announcement for Abruzzo. Is this Studio Delta? Musica del Abruzzo
https://app.box.com/s/hzlapht6gpav1woaf9f0pxem93dmda12

June 8 2016

Conditions beginning with Russia and Ukraine, moving to Romania/Moldava and later too a wide spead area from Poland to Serbia.

99.5 MHz Probably from Serbia? "...erno Show"
https://app.box.com/s/qvis0h5wzkzvp0gohpmr3r679o2ogmkc
I have an ID on this recording "???? Radio". Too Weak. Perhaps different stations
https://app.box.com/s/7uvo7jcetcb0nlrjfzsl27wyuzim61yj

100.9 MHz with a weather forecast in Ukrainian? Or Russian from Moldova?. Dorozhnoye Radio, Lipetsk logged half an hour earlier.

https://app.box.com/s/hx7g3qnxnu5ap9nh0go1zqwv5vigf7gw

102.5 MHz. Which language?

https://app.box.com/s/hojbf2iab0f406oysbwpafbod6u0nk0c

103.7 MHz UNID with Telemarketing 2.... I also have an ID Radio-----ova
Mix of stations.
https://app.box.com/s/kyebefhg2cp5w3b0ekcemnm7r99qt9wu
https://app.box.com/s/n7l20jndkes22ozsywh9g9chmzy3zbx2

106.8 MHz Station from Ukraine? with commercials

https://app.box.com/s/ydhrj8vst5y9po7ewc1tif17qq2z1zgh

39795. New two stations in Algeria

Hi again,

on 103,7 there are several ID as Radio Dvadeset Sedan (= 207) as well mentions of Sarajevo and Bjielijna.
Unfortunately I've found nothing on FMList and web about this station.

Well done Gert.
Just 500W from a small town surrouned by hills and mountains.
The station is religious-catholic, a sort of the "well known" Italian Radio Maria.
The word Ognijsce means fireplace.

Now, what does the jingle say? I am not convinced, it says "Khoroshoye Radio".

The frequency is 88,8. The opening was drifting, somewhere amidst Crimea, Turkey and Moldova. In my comprehension, this station could, propably even should be from Moldova,

Is this a programme, or a slogan by R Shanson [RUS//MDA], or is this Khorosheye FM, not listed on this frequency, in FMLIST? I vaguely recall, having gotten this same jingle, or slogan, on 88.8 was it in 2015 or 2016.

Thanks in advance, for any help.

"Khoroshoye Radio [Shanson]" is the slogan of Radio Shanson.
And this is its jingle.
And at 0:42 Radio Shanson ID.

Khoroshoye means "good"

Victor

39807. More Arabic Recordings from 29th May 20-16

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-24 09:47:25 UTC
From: davebunyan@...
Topic: 39807 Message: 39807

Earlier recordings posted from 88.0 and 91.5 MHz were identified by Matthias as being Arabic. The two files below are the whole length of the reception - 9 minutes or more. These contain quite a lot more (obviously) and there is more than one station present. It is difficult to tell how many stations - but on 88.0 about 28 seconds in is the annoying unidentifed bird call jingle which may not be the same station as the arabic later. Between the two bird calls is a male voice which is indistinct. German tropo appears now and then.

If anyone can extract any more info out of these two files I'd be very grateful.

Apart from a nice little opening on Thursday lunchtime the Es have been very quiet since the beginning of the week. Rather unfortunate personally as I have had the last week off work. But the length and depth of this quiet spell is somewhat unnerving at what should be statistically one of the better weeks of the season. Here's hoping the Es wake up soon! Good DX.

From a Band 2 perspective…

It’s been a rather poor season so far in the UK generally, in terms of quantity at least; those in more eastern parts have had some exotic dx at least.

Good start, then May was virtually dead for three weeks, then a decent 10 days or so from the 25th, and has been very bitty after that, and very dead for the past few days.

The last ‘proper’ opening here was the morning of the 16th – since then I’ve been restricted to literally 2 minutes here, 30 seconds there etc etc. last weekend. Today not looking promising.

The quality of the season has rolled off dramatically the further west you are, IMHO.

Hoping for a decent July to stop this becoming a poor season here.

The only bright point is that I have got better at identifying and logging stations thanks to improvements in software, and more experience on my part. But for that, my log would look very sparse indeed.

It has probably been even more dismal here in NW England. I last had an Es opening on 18th June. It didn't last long but thanks to an SDR and help from users on YT and this Group, several stations were identified, from HNG CZE SVK POL ROU

Since then one brief Arabic station on 87.6, most probably Algeria.

Me buying an SDRplay to add to my Perseus/FM+ & FCD Pro +, probably jinxed the Es. Sorry everyone.

According to http://www.spaceweather.com/ there is a 40% chance of a G1 class solar storm today which might liven up the Es layer otherwise this June could be notable for its lack of DX.

I assume the poor Es DX conditions is due to a lack of sunspots this month?

It’s true that the solar wind is elevated at the moment. It was 350km/s at the time of the Madeira opening on Thurs, but then jumped to 550km/s at the time the Es died.

I am trying to keep an eye on the solar wind speed, I have a suspicion that elevated solar wind speed suppresses Es activity.

There is no documented proof that solar activity affects Es, but in my experience, very high solar activity can suppress temperate zone Es, 1989 being a classic example.

There is no relationship so far as I can tell, between sunspot numbers/2800Mhz solar flux, and Es.

So far as geomagnetic activity is concerned.. in my experience it can go one of 2 ways. It can kill the Es totally, or spark it into life.

I remember reading many years ago that SpE was usually better during low sunspot years. Certainly it seems that recent bursts of solar activity have only served to either dampen down activity or kill it stone dead. The last couple of seasons have also seemed to show a growing NW/SE divide with a higher-than-average chance of exotic double-hop in SE England and very poor conditions in the north and west of the UK. As for the reasons behind this, who knows? Maybe a weaker and more meandering jet stream?
, Good DX.

39815. SDR Uno v SDR Console RDS decoding comparison

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-25 10:33:14 UTC
From: Jim Smith G0OFE
Topic: 39815 Message: 39815

I meant to post this on the Skywaves list - I posted this on the web forum a couple of days ago.

Downloaded SDR Uno (formerly Studio 1, now provided free as part of the SDRPlay SDR package) and been having a play with it.

Some thoughts on what I have found:

Personally find it rather clunky to use with all the individual windows and the 1Mhz limit on non-SDR Play sdrs is a nuisance.

I have found it will play back SDR IQ files I recorded with SDR Console V2.3 (just as well,with the lack of Es at the moment!) so I can run a direct comparison of the RDS decoding on SDR Console V2.3 and SDR Uno.

The developer of Studio 1 made some bold claims about RDS reception and remember him saying that he could decode RDS with signals as little as 10db s/n ratio. I have no reason to doubt him, but I will say that some stations have their RDS levels turned up quite high and will therefore yield data on a relatively low signal. One or two of the newly RDS-equipped Algeria (Tebessa) stations come to mind.

As an experiment, I played back the recording I made of my Msallata (LBY) reception in July last year. A good test on a fairly marginal signal.

On SDR Console, it readily yielded the PI code, and eventually a PS code too on a signal peak.

ON SDRUno, I also got a PI out of it fairly readily, but despite leaving the recording looping for a period of time, I never got a PS out of it.

This would appear to show in this case, SDR Console is at least the equal of SDR Uno/Studio 1, and is probably margially better.

I need to try with another recording where it only just gives a PI code - I will do this when I have more time.

My general feeling this season, having SDR Console V3 to play with, is that it is marginally even better still at decoding RDS. Unfortunately V3 does not yet have IQ file playback facilities yet.

What Console V3 does have is the ability to put up to 24 receivers (or VRXs in SDR Uno) in one single matrix AND have RDS decoding, and all in one tidy configurable window. In that respect, it is much better than SDR Uno.

Unfortunately I have had a lot of trouble getting RDSSpy to work, either through HDSDR, Elad software or SDR Sharp, and on three different machines. Sometimes it works ok-ish, sometimes not at all, so I am not able to run the

same Msallata file on that for comparison.

Hi,

the transmitter 99,5MHz is 37 km from me, located in Djakovo, Croatia. The name of the station is Novi Radio (New Radio). I suspected because the speaker speaks about local community enterprise named Komunalac and Univerzal, and they are located in Djakovo, East Croatia. The station has RDS NOVI RADIO 99,5 MHZ. The voice of the speaker is familiary because I hear it regulary ever day. The web site and stream:

http://novi-radio.hr/

Nice catch! Thank you for recordings, in other recording I can clearly hear "Novi....radio".

Best regrads.

On this side of the Atlantic most Dxers have received little or nothing in the way of skip and it's almost July! Two Dxers in Ontario have had some good openings, as well as a handful in Florida, but for most of us...hardly anything.

I was in the habit of checking DXMaps on my phone for openings when we were away from home but that seems to be a waste of time.

There's always next year?

Hi folks,

I live in south-eastern Finland, in locator KP41GD, right next to the 30 kW Joutseno tx.

Starting from May 26th, In Finland we had it for some three weeks rather decent. For me, 3 maybe 4 days were quite generous. About a week ago, the band 2 went silent, on CCIR-FM actually nothing over here, in this last week.

What bothers me is, I have not experienced a proper opening to Great Britain and Ireland, since June 2013. Us abroad, are running out of time, as you are turning to DAB. I myself have run out of space, too, ever since the '80s. Within a 12-mile radius, there are 6 transmitters... I recently scanned the FMLIST, trying to figure out any potential frequency to pick up any new station to me, from G and IRL. The chances are pretty much none, the band is so jammed.

Be the conditions as they may, over here in the north we lived quite a magical night, last week. The shortest night of the year happened the same night did the full moon. Such has not happened since the year 1948. In the northernmost Finland, the Sun next sets in late July, that goes for Iceland as well as the northernmost Norway, Sweden, Russia and Alaska, Canada, too.

73, ilkka
[FIN - Joutseno]

I have a recording of The Weather Show from a couple of weeks ago when we had the intense tropo. This was aired on BBC Radio Sheffield. There was some discussion about sporadic E. Paul Hudson and Jim Bacon were talking about how the jet stream was the cause of the Es. No other factors were mentioned, such as thunderstorms, but we know there may be other influential factors. The programme was obviously not going to delve too scientifically into the cause, but suffice to say that the jet stream was put forward as the culprit. Not solar activity. This was the first time I have heard somebody with an understanding of the science make such a bold claim as the the cause. I still have a recording of the programme and I will upload it if anybody is interested.

Regarding the thought that solar activity is involved with Es, I have always always understood that this kills Es, quite the opposite to enhancing them. I have seen this happen many times. There have been Es in the past, then the sun has hiccups and BANG! and the Es have gone (in true Cillit Bang style!) Solar wobblies are also notorious for destroying medium wave conditions and in no uncertain terms, BUT this also *briefly* enhances MW conditions around the moment of impact.

I don't know if the same brief enhancement is true of band 2 with the Es, but I remember receiving a few Istanbul stations at the bottom of band 2 on a particular day last year. The sun had just slammed its solar wind into the atmosphere. Moments later, the Turkish Es had disappeared and the band was devoid of Es for a while. So was the sun responsible for the brief Turkish reception? It doesn't make sense to me that the sudden impact of the solar wind briefly enhances the jet stream, unless there is some brief increase in ionisation. Some scientific bod will no doubt have the knowledge, but I think it's safe to say that prolonged periods of enhanced solar activity KILL the Es. I think we've all seen this over and over again.

My 2p. Comments welcomed.

John

39826. Es to Madeira 23.6.16, plus a possible Canaries log

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-26 11:13:00 UTC
From: nick gilly
Topic: 39826 Message: 39826

Some recordings from the nice little opening to Portugal, Madeira and possibly the Canaries on Thursday 23rd June:
87.6 RDS Seixal 1528 km: https://app.box.com/s/yg7cl4va40wpi00oskbl68w8ktd60vqc

91.4 Iris FM Benavente 1481 km: https://app.box.com/s/0wznizph3frc6igswoj6nbeuk977tyyb

88.7 RDP Antena 2 Serra de Montejunto 1469 km:
https://app.box.com/s/y0u98qwpay9g1x04ruy6sodv9btc3d09

91.6 very likely Canaries, perhaps Radio Faycaṅ Arrecife 2678 km?:
https://app.box.com/s/rjvjvpa2krhu9dunvnoevb7ureed6bod (this was the only Spanish-language station on the band, and it was coming in with Madeira)

88.0 Raḍio Renascença Pico do Silva 2418 km (Madeira) (pt 1):
https://app.box.com/s/ggegiuv5ol7er2uefwwwio14kuqpx5kf

94.1 unid, perhaps CNR?: https://app.box.com/s/j0mlod09oi1r0mk9ekgohzi6y00wnmu2

88.0 Raḍio Renascença Pico do Silva 2418 km (Madeira) (pt 2):
https://app.box.com/s/fvadfpva055qgvas282h2zipl87u0d4e

91.6 unid, probably CNR (VERY weak now):
https://app.box.com/s/mx1lwnoiosoo4ct4nn8goh96vvxdrx0d I don't know for sure who 91.6 was but if there is anything to go on from the format then any help would be much appreciated. I think the last clip is too weak to dig anything out but I thought I'd include it anyway. Thanks and good DX.

I've always held the belief that high solar activity does not help with Sporadic E. Having said that, based on what I have seen on the VK Logger site over the past few summers what seems to be happening is that the Es is still happening but the skip distances are much greater. This would mean that signals from Australia would pass over New Zealand.

Perhaps what is happening is that weather patterns are having more of an effect on propagation. I hesitate to use the term but it could be that climate change is the cause of the degradation?

Paul

In Christchurch New Zealand, I had a better summer than the previous two I had openings from Australia on two occasions the previous two years was one opening and the following none at all.

An interesting thing that did occur last summer was the higher number of tropospheric openings we had. With Christchurch being midway down the South Island I was able to hear stations to the north and south. Wellington at the southern end of the North Island was the most regular and at times when there was a local translator on the same frequency as the station in Wellington the local station was overridden. As most of the stations are networked out of Auckland, local advertising was able to sort out the mess.

I sympathise with the crowded band, I have 27 local FM stations that have significant power plus umpteen low power FM stations to contend with. Considering Christchurch has a population of 366,100 the number of stations is utterly ridiculous.

I myself have run out of space, too, ever since the '80s. Within a 12-mile radius, there are 6 transmitters... I recently scanned the FMLIST, trying to figure out any potential frequency to pick up any new station to me, from G and IRL. The chances are pretty much none, the band is so jammed.

Be the conditions as they may, over here in the north we lived quite a magical night, last week. The shortest night of the year happened the same night did the full moon. Such has not happened since the year 1948. In the

northernmost Finland, the Sun next sets in late July, that goes for Iceland as well as the northernmost Norway, Sweden, Russia and Alaska, Canada, too.

?

In Christchurch New Zealand, I had a better summer than the previous two I had openings from Australia on two occasions the previous two years was one opening and the following none at all.

An interesting thing that did occur last summer was the higher number of tropospheric openings we had. With Christchurch being midway down the South Island I was able to hear stations to the north and south. Wellington at the southern end of the North Island was the most regular and at times when there was a local translator on the same frequency as the station in Wellington the local station was overridden. As most of the stations are networked out of Auckland, local advertising was able to sort out the mess.

I sympathise with the crowded band, I have 27 local FM stations that have significant power plus umpteen low power FM stations to contend with. Considering Christchurch has a population of 366,100 the number of stations is utterly ridiculous.

Hi folks,

I live in south-eastern Finland, in locator KP41GD, right next to the 30 kW Joutseno tx.

Starting from May 26th, In Finland we had it for some three weeks rather decent. For me, 3 maybe 4 days were quite generous. About a week ago, the band 2 went silent, on CCIR-FM actually nothing over here, in this last week.

What bothers me is, I have not experienced a proper opening to Great Britain and Ireland, since June 2013. Us abroad, are running out of time, as you are turning to DAB. I myself have run out of space, too, ever since the '80s. Within a 12-mile radius, there are 6 transmitters... I recently scanned the FMLIST, trying to figure out any potential frequency to pick up any new station to me, from G and IRL. The chances are pretty much none, the band is so jammed.

Be the conditions as they may, over here in the north we lived quite a magical night, last week. The shortest night of the year happened the same night did the full moon. Such has not happened since the year 1948. In the northernmost Finland, the Sun next sets in late July, that goes for Iceland as well as the northernmost Norway, Sweden, Russia and Alaska, Canada, too.

Hello Peter,

Are you sure it was Rádio Comercial from Portugal? It sounds me improbable, as the frequency 89.9 or the adjacent 90.0 MHz are used in most regions of POR, so I hardly believe that ANACOM would assign such frequency for a new transmitter. So, although not strictly impossible, it could happen... if the technical project presented to ANACOM by the station mentions one of the few locations where the new tx wouldn't affect others. As far as I know, Rádio Comercial is not testing new transmitters in MDR or AZR. Anyway, if it was undoubtedly Rádio Comercial, I will try to investigate the situation.

39859. Körner 9.2 to rotate in Azimuth and Polarity

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-06-30 04:06:02 UTC
From: Les Rayburn
Topic: 39859 Message: 39859

I’m interested in using a Korner 9.2 antenna as my primary FM DX antenna.

http://ham-radio.com/k6sti/korn92.htm

I’ve noticed that some users have configured the antenna to rotate in both azimuth and polarization. I have a Yaesu rotor (designed for satellite operation) that could be pressed into service to allow me to mount the antenna for that sort of operation here.

https://www.youtube.com/watch?v=ZRmRLiNrULs

My question is what would be the advantage to this vs. a traditional azimuth-only installation? Would it be possible to achieve deeper nulls on locals? Any other advantages?

From: Günter Lorenz (FMLIST)
Topic: 6621 Message: 39866

We have now finally completed the migration of the FMLIST infrastructure to a completely virtualized system.
This has been the cause for some interruptions yesterday and today, as the network components were prepared and the last component was virtualized.
We'll try to keep Murphy busy elsewhere, so there should be many years of quiet waters ahead.

Good DX to all of you in the second part of the SpE season!

Günter

39867. Onkyo T-4970

Hi all,

Does anyone have a scan of a circuit diagram for an Onkyo T-4970 they could share with me please? I have just got one of these receivers and I'd like to disable it from muting when there is no/weak signals. I may also look in to changing the IF filters too. Any help would be greatly appreciated.

Regards,
Chris Howles (Lichfield UK)

Hi Chris,

I could not find the service manual for the T-4970, either. I am not sure if I get things right, but as I understand, the T-4970 circuitry could be pretty close to one of these models:
http://www.hifiengine.com/manual_library/onkyo/t-4670.shtml
http://www.hifiengine.com/manual_library/onkyo/t-9090.shtml
One must register, to be able to download the manuals.

I own, have owned some of the late '80s and early '90s Onkyo models. It is likely the T-4970, too, has a trim pot for the muting level. This is a very useful trim:
for instance, in the '80s and '90s I used my T-4150 for an Es alerter. The muting level trimmed, and the tuner all the time scanning them 20 memories, with the 8-element vertical yagi she was a fool proof Es sniffer.

Those Onkyo models I owned, were pretty good handling the local strong field. Not as sensitive as some of the Akai and Yamaha tuners I owned, though.

73, ilkka

Hi Ilkka,

Thanks for taking the time to reply! I think partially with your help I have got what I need. According to the info on this page Tuner Information Center - Onkyo Tuners http://www.fmtunerinfo.com/onkyo.html

Tuner Information Center - Onkyo Tuners http://www.fmtunerinfo.com/onkyo.html Reviews and photos of vintage stereo tuners, including Kenwood, Sansui, Pioneer, McIntosh, Yamaha, Accuphase, Onkyo, Denon, Rotel, Technics, Tandberg, Magnum Dynalab. Ceramic filter modifications.

View on www.fmtunerinfo.com http://www.fmtunerinfo.com/onkyo.html
Preview by Yahoo

the T-4970 is a European version of the American T-488F and as luck would have it the HiFiengine website you highlighted above does have a service manual which I've now downloaded. Comparing the circuit to the innards of mine does suggest it is the same or at least very similar.

Cheers,
Chris.

The best day for ages. The band was wide open to Spain and Morocco when I got home from work at 2 pm local, with signals up to the top of the band. As time went on the propagation gradually shifted a little further east with Algeria and Tunisia appearing, and then some Italians. We had to go out at 4 pm but when I got back at a little after 5.45 pm local the band was flooded with Spain/Morocco and Algeria. Just out of curiosity I turned the beam to the east whilst tuned to 87.9 and heard an OM speaking in an odd language, quite strong and then the RDS popped up: TRT_Rd_1! This was TRT Radyo 1 from Mudanya at 2621 km. However, it had faded out by the time the CD recorder was ready to go. Grrrr. However, a few minutes later another Turkish station appeared on 87.8, which I did record:
https://app.box.com/s/pr49ilvmdsxuw9rgnxcfxtzjaztcbx6u
Kurt Zscherp is 99% sure this is Bayram FM from Bebze at 2616 km, so many thanks for that. These were the only Turkish signals heard though. Everything else was coming in from the south.

As the opening went on it gradually shifted again towards eastern Algeria and Tunisia, and again southern Italy and Sardinia. Corsica also made an appearance on 88.0 (France Musique from Ajaccio). One or two Balkans were heard too as I kept trying to the east after the Turkish reception. The opening finally dropped out at about 9.50 pm. Good DX.

From: Miquel Nicolau Amer
Topic: 39885 Message: 39885

Hi all,

My wife has a Skoda Fabia and its autoradio is good.

I'd like have the data, clock and GND for decoding RDS with my computer
but I don't see where is the RDS demodulator chip.

Can you help me and tell me where is the demodulator chip.

Thank you in avanced

Thank you Edward. So Yumor FM could have an outlet in Ukraine on 87.5.

Nothing else from Ukraine was coming in at the time of my 87.5
reception, although other Ukraine stations were received at different
times.

Perhaps a new transmitter. I just find it hard to accept that this was
Brest when the word "Ukrayins′kyy" was mentioned so many times in the
commercials.

Regards.

John

Hi Paul,

in this recording there is nothing really useful to identifiy the station; but, between the three txs listed in Italy on this frequency, the most likely is
91.85 RTUA Orvieto/Corso Cavour/Colonnetta di Prodo (TR)

En fact, what you can hear doesn't matchs absolutely with the format of M2O and Radio Studio Più, and the man speaking has a slight accent who reminds me the one typical of people living in Southern Umbria.

Many 73's and good dxs,

Franco

39891. Band 2 Es Log Wednesday 29th June 2016

From: Jim Smith G0OFE
Topic: 39891 Message: 39891

After a quiet period here since 13th June (only short openings consisting mostly of short teases from that date) things finally livened up here with a big opening to the Mediterranean which lasted for many hours. Was at work for the first part, but was home a little before 1600 with an Italian opening in progress. This soon moved to Spain/North Africa with Italy/Tunisia also reappearing later. Also some short skip to France and some Sardinia to finish.

I may also have had Msallata from Libya, around the same time as Mike Fallon logged it - well-modulated Arabic and not one of the usual suspects, but annoyingly, the lack of a stream and a failure to pull RDS data from the signal means that I cannot be sure.

Map and logs:

39896. Sporadic E Loggings for 1 July 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-01 20:15:36 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 39896

Hi All,

Several hours with sporadic E band openings today. Two simultaneous and unstable Es clouds made the early evening opening difficult to use. The MUF did not reach out to above 100 MHz.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Friday 1 July 2016

Which station is this on 88.5 ?
It is not SR P1
All help received with thanks

Rostov? Really? :) That would be VERY nice. :) But would they carry adverts for Ukraine? That would have to be a double hop as Rostov is just beyond the eastern Ukraine border.

The band seemed really unusual around this time. There were a few stations which seemed to be Ukrainian, but which did not have RDS. They were mostly very weak - true to some double-hop signals perhaps. Kyiv came in around this time and Rostov is perfectly on-path. One drawback is that I just checked the DX Maps database and 6m conditions did not suggest any double-hop conditions. To my mind, to this slightly removes the possibility of double hop. This will have to be marked as "unknown site" as the ads for Ukraine surely must rule out this being Russia. Yes?

Thank you Hannu. It's one to watch for in the future. 87.5 has thrown up many interesting signals recently. I often check web streams for the usual 87.5 suspects, but very often nothing matches. Perhaps some new stations and txs on the air there.

Just to add that E conditions here today were feeble. Even when Italy came through late in the afternoon, only Radio Maria 88.0 (multi-tx) was strong enough to produce RDS. It was another day of sporadic TEASE.

Regards.

John.

Hello John, sorry, did not read about the ADs for UKR;)..just the Yumor FM (Salsk-tx, RO/rus) on 875..on our databases.
Maybe later it will be solved (Victor..)

Thank you Victor.

I wish I'd kept the recording. I saw Brest to begin with but the ads for Ukraine suggested not.

All will be revealed.

Cheers

John

Hello Peter,
It is definitely NRK P1, px "Kveldsåpent". (Like Ole told :))
Your recording similar to the px at 1: 33.40 into the
show.https://radio.nrk.no/serie/kveldsaapent/DMPA03012916/30-06-2016
73!

39917. RDS Spy Questions [FM DXing]

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-02 17:31:45 UTC
From: Les Rayburn
Topic: 39917 Message: 39917

Finally managed to get Virtual Audio Cable software configured correctly. It will now feed audio from either my Airspy SDV (via the MPX plug-in and VAC) or direct from the Elad FDM-S2 SDR to VAC.

I want to use RDS Spy to do unattended monitoring of a clear frequency here to look for RDS decodes via meteor scatter. I've searched the web looking for the optimum configuration of RDS Spy software for this purpose, but really haven't found anything.

Can someone pass along some recommendations for software settings within RDS Spy with this type of logging in mind?
As always grateful for the advice. Thanks to all who helped me get both Elad and #SDRSharp running with RDS Spy. Much appreciated.

73,

Les Rayburn, N1LF

Hi Les,
Under Configure/Options

/General
Enable super pi detector
Reset RDS data on pi change
Reset RDS data on timeout
Signal timeout 3 seconds (the minimum you can achieve)
Sound buffer card 100mS

/Logs
Append (don't overwrite)
Save Logs automatically ("Meteor scatter mode")

In the subsection "Saving logs automatically" my preference is "Very Poor" and "At least " 1 second

I save the log as csv and I set up the log template with semi-colons for separators - so that if a station sends out eg 87,9 FM in the PS field there is no confusion.

This is the template from my .srt file:

%rsdate% %rstime%;%rsdate% %time%;%PI%;%PS%;%ECC%;%BER% %;%PI.RELEVANCE%

you would need to add %frequency%; if you want to log the frequency. Remember it will only log the frequency you manually enter into RDSSpy

That should get you started. Just open the csv file in Excel or OpenOffice

Next step - recording a 10 MHz or 6 MHz wide spectrum during a meteor shower. The Perseids in August would be an excellent one to try. With AirSpy use Vasily's Baseband recorder and File Player with waterfall enabled and opened out. You will be amazed! many bursts (at least here in Europe result in reflections on many frequencies Here is just one of many from August 2015:
https://app.box.com/s/tkvsztiol62iop7co0d0amiih1ae73rz
https://app.box.com/s/tkvsztiol62iop7co0d0amiih1ae73rz

At 10 MHz a five minute recording needs about 11 Gbytes - I bought a USB 3.0 2Tb drive for around $80. It's full with recent - yet to be checked - Sporadic e recordings from the last few days. Wideband SDR opens a whole new door of activity.

Regards

David

The humble RTL dongle connected to the South facing FM5 has produced a huge pile of loggings - I've also got a chunk of recording to check - and I will be looking for the unusual.

In a way I hope for a couple of quiet days to be able to do this before another big opening pops up.

David
